LETTER OF TRANSMITTAL

August 15, 2023.

*Hon. Dr. Ashni K. Singh
Senior Minister
Office of the President
with Responsibility for Finance
Ministry of Finance
Main Street
Georgetown.*

Dear Minister,

As required under Section 57 of the Bank of Guyana Act 1998, No.19 of 1998, I have the honour to submit to you the Bank's Half Year Report for 2023.

Yours sincerely,

*Signed
Dr. Gobind N. Ganga
Governor*

I

THE GUYANA ECONOMY

1. SUMMARY

The global economy continues to gradually recover from the pandemic and the Russia-Ukraine conflict. The COVID-19 health crisis is officially over, and supply-chain efficiency have returned to pre-pandemic levels. Economic activity in the first half of the year proved resilient, despite the challenging environment where forces that hindered growth in 2022 remain persistent. Energy and food prices have come down sharply from their war-induced peaks, allowing global inflation pressures to ease faster than expected. Unemployment remained relatively stable at 4.8 percent in the advanced economies. According to the IMF's most recent estimate, global growth for 2023 is projected to be 3.0 percent. Advanced economies are expected to grow by 1.5 percent and emerging market and developing economies by 4.0 percent. Consequently, global inflation is projected to decline from 8.7 percent last year to 6.8 percent this year.

The Guyanese economy continued its growth momentum with a real oil GDP growth of 59.5 percent and non-oil GDP growth of 12.3 percent. Real oil growth benefited from crude oil production of 68.7 million barrels, while construction, agriculture, and the services sector activities were the major contributors to real non-oil growth. The Urban Consumer Price Index (CPI) recorded a deflation of 0.3 percent, reflective of declines in the prices of food (mostly vegetables, prepared meals and refreshments) as well as transport & communication due to moderation in crude oil prices and ease in supply constraints.

The current account recorded a higher surplus from increased crude oil exports however, the overall balance of payments recorded a larger deficit of US\$196.4 million compared to US\$100.0 million for the same period last year. This outturn reflected a capital account deficit which was relatively higher than the current account surplus. The shortfall in the capital account was due to the outflow of oil revenues to the Natural Resource Fund (NRF) as well as cost recovery (withdrawal of equity) by the oil and gas sector despite higher inflows to the private sector in the form of foreign direct investments (FDIs) which expanded from US\$1,946.3 million to US\$4,045.3 million. The overall deficit was financed by a drawdown on the Bank of Guyana's foreign reserves which stood at US\$736.0 million or 1 month of import cover at the end of June 2023. Guyana's net international investment position (NIIP) was estimated at US\$13,160.2 million at the end of June 2023, a deterioration of US\$1,413.8 million or 12.0 percent from the end-March 2023 position. This was the result of an increase in liabilities which more than offset the increase in assets.

Trade activities have caused total foreign exchange turnover to grow by 20.1 percent to US\$7,116.3 million. Increases are reflected in transactions through bank and non-bank cambios, foreign currency accounts and hard & soft currencies. Transactions through foreign currency accounts and cambios which accounted for 81.0 percent of the total volume recorded a 15.2 percent increase due to higher demand for foreign exchange. The Guyana dollar mid-rate, which is used for official transactions, remained unchanged at G\$208.50 while the market rate was G\$210.34

Notwithstanding the increases in economic activities and collection of revenues, the overall financial operations of the public sector registered a deficit of G\$7,607 million due to the budgeted deficit of the Central Government. Central government operations recorded a deficit of G\$5,893 million from a surplus of G\$13,831 million on account of an increase in the deficit of the capital account. The current account recorded a higher surplus of G\$110,889 million due to a 44.9 percent increase in current revenues. The capital account deficit of G\$116,782 million was due to a 152.5 percent increase in spending for roads & bridges, health care facilities and the housing programme. NFPE's recorded a deficit of G\$1,713 million due to higher capital expenditure.

The total stock of government's public and publicly guaranteed debt increased by 7.2 percent to US\$3,917 million reflecting an expansion in both domestic debt and external debt to fund budgeted spending. The stock of domestic debt rose by 9.7 percent to G\$476,586 million, primarily due to the increased issuance of treasury bills, while the stock of external debt increased by 3.8 percent, owing to an expansion in the stock of bilateral and multilateral debt. Total debt service was higher by 64.9 percent and amounted to US\$92 million. Domestic debt service payments increased by G\$6,083 to G\$8,798 million, primarily as a result of higher debt service payments made on the BOG Debenture, as well as debt service payments made on the NICIL bond. External debt service payments rose by 16.6 percent on account of higher interest repayments to multilateral creditors. The debt sustainability indicators remained below the pre-defined threshold, with debt at a manageable and sustainable level which implies greater fiscal space to facilitate further development projects.

Monetary aggregates of reserve money and broad money grew by 6.5 percent and 10.0 percent, respectively. The former was attributed mainly to an expansion in the net domestic assets of the Bank of Guyana while the latter reflected increases in net domestic credit and other items (net) which offset the decline in net foreign assets. Credit to both the public and private sectors rose by 410.1 percent and 5.0 percent, respectively. Commercial banks' interest rates trended downwards while the interest rate spreads remained relatively high. The financial resources of the Non-Bank Financial Institutions (NBFIs), which include depository and non-depository licensed financial institutions, grew by 9.5 percent or G\$41,933 million to G\$485,391 million due to a large increase in other local securities and other reserves of finance companies. The sector's share of total assets in the financial sector increased marginally from 35.3 percent to 36.3 percent at end-June 2023.

The Licensed Depository Financial Institutions (LDFIs) Capital Adequacy Ratio (CAR) remained well above the prudential benchmark of 8.0 percent, at 20.6 percent which was below the end-June 2022 level but above the end-December 2022 levels. The stock of non-performing loans (NPLs) improved when compared to the end-June 2022 and end-December 2022 levels. The LDFIs' ratio of reserve against NPLs moved to 65.0 percent, 6 percentage points and 7 percentage points above the end-June 2022 and end-December 2022 levels respectively.

The stress tests performed were aimed at determining the quantitative measures of vulnerability of LDFIs capital to hypothetical shocks under various scenarios in areas of investments, credit, foreign currency exposure, and liquidity. The results indicated that the industry's and individual institutions' shock absorptive capacities remained adequate under the various scenarios for foreign currency and liquidity. However, vulnerabilities were observed in the investment and credit portfolios.

Macroprudential analytic tools were used to identify and measure systemic risk where an event that will trigger a loss of economic value or confidence in a substantial portion of the financial system resulting in adverse nation-wide and

region-wide effects. At end-June 2023, there was no amplification in the level of systemic risk and no need for immediate policy actions.

The insurance sector, which comprises long-term insurance and general insurance, recorded assets of G\$195,996 million, an increase of 23.8 percent (G\$37,672 million) from the previous year. The sector accounted for 10.1 percent of total financial assets and 40.4 percent of non-bank assets as at end-June 2023. The sector was adequately capitalised as both the long term and general insurance sectors' assets exceeded their respective solvency requirements in keeping with the Insurance Act 2016. The long-term and general insurance sectors' assets exceeded liabilities by 293.8 percent (G\$98,738 million) and 364.4 percent (G\$47,188 million), respectively. The insurance sector's assets accounted for 5.8 percent of the country's GDP. The sector acts as a conduit for households and firms to transfer risks to entities that are better suited to handle them. In this way projects can be undertaken that might not be otherwise possible, and this contributes to the growth and financial stability of the economy.

The average per capita spending on insurance increased by 9.8 percent to G\$12.3 million, which indicated that there has been an increase in the density of the insurance products in the market. The sector's penetration into the domestic market fell marginally from the prior year (0.5 percent) as its total gross written premium represents 0.3 percent of the economy's GDP. Reinsurance for the long-term insurance sector increased by 14.4 percent (G\$36.9 million) to G\$292.6 million which indicated that more risks were being transferred to reinsurers in comparison to total gross premiums written. Reinsurance for the general insurance sector increased by 17.6 percent (G\$275.5 million) to G\$6,454 million. Potential risks the industry was exposed to, were prudently managed resulting in no adverse effect despite the volatility of the global financial conditions.

The assets of the private pension sector decreased by G\$9,143 million or 7.2 percent to G\$117,864 million from June 2022 due to a reduction in the market value of equity shares. This accounted for approximately 6.1 percent of the total financial sector's assets and 24.3 percent of NBFIs. The decline in assets may be attributed to a decrease in the fair value of equity investments.

The two major pension plans of Defined Benefit (DB) and Defined Contribution (DC) remained relatively stable. DB plans were sensitive to market risk, mainly because of the composition of their investment portfolios – large proportions were held in capital-uncertain assets: predominantly equities and real estate. Likewise, DC plans were vulnerable to the Deposit Administration Contracts (DACs) offered by the life insurance companies. Further, while investments in foreign assets were below the regulatory threshold, the unavailability of suitable diversifiable local investments also exposed pension funds to market risk. Regardless, the sector's exposure to credit risk remained insignificant.

The sector continued to have high liquidity levels that far surpassed the long-term nature of pension liabilities. Liquid assets (1 year and under maturity) totalled G\$16,365 million and accounted for 13.9 percent of total pension assets. Moreover, liquid assets were approximately 31 times greater than estimated pension payments for the coming quarter. Notwithstanding, the private pension sector maintained a more than sufficient funding level with an average of 304.5 percent.

Financial and monetary stability as well as financial system efficiency continued to be undertaken in a number of the Bank's operations. The Bank facilitated efficient intermediation through the issuance of notes and coins as well as

promotion of an enhanced payment system operation. During the first half of 2023, the Bank's role within Guyana's Payments System infrastructure has been on implementing the legal and regulatory framework, establishing and improving payment infrastructures, encouraging innovation and promoting awareness of digital payments. In addition the Bank continued to be the custodian of the nation's foreign reserves while also managing the Natural Resource Fund (NRF) as mandated in an operational agreement between the Bank and the Ministry of Finance. Additionally, Bank of Guyana continued to maintain the Depository Insurance Corporation (DIC) and Deposit Insurance Fund with the objective of fostering financial stability by protecting depositors and assisting in resolution financing. For the review period, the Bank achieved a net profit of G\$1,544 million against a budgeted profit of G\$660 million, resulting from the Bank's income being substantially higher than budgeted while containing expenses.

The conduct of monetary policy remained focused on price stability, ensuring an adequate level of liquidity in the banking system and creating an enabling environment for credit and economic growth. The Bank of Guyana utilised the issuance of treasury bills and foreign exchange intervention as the variable tools of monetary policy, while the discount rate was unchanged at 5.0 percent. At the end of June 2023, there was no redemption in government treasury bills issued for monetary purpose, while the Bank transacted net-purchases in foreign currencies of US\$4.0 million.

According to the IMF's World Economic Outlook, the global economy is estimated to grow by 3.0 percent in 2023, down from 3.5 percent recorded in 2022; remaining well below the historical (2000-19) annual average of 3.8 percent. Advanced economies continue to cause this decline in growth largely due to weaker manufacturing, and slower credit growth, offsetting stronger services activities. Moreover, global inflation is projected to decline from 8.7 percent last year to 6.8 percent this year.

The Guyanese economy is expected to benefit from the resilience of the world economy, despite challenges, to carry its strong growth momentum through to the end of 2023. Real GDP is projected to grow by 28.2 percent, placing Guyana amongst the top five fastest growing economies. This growth will be a direct result of higher oil production and the non-oil subsectors, fiscal infrastructure spending and accommodative monetary policies. The inflation rate at the end of the year is projected to be 3.8 percent, as prices of fuel and food continue to fall, both locally and abroad.

The overall balance of payments is expected to record a surplus, due to an enlarged current account surplus. The current account is expected to benefit from higher oil export earnings, additionally, non-oil export earnings is expected to increase. The capital account is projected to record a deficit, resulting from the outflow of oil revenue to the Natural Resource Fund and oil cost recovery (withdrawal of equity) by the oil and gas sector despite higher inflows of FDIs. Moreover, foreign exchange flows to the market are expected to adequately cover imports.

Consequently, the exchange rate of the Guyana dollar to the US dollar is expected to remain relatively stable due to a net supply of foreign exchange to the market.

Central government's overall balance is forecasted to record a wider deficit of G\$228,728 million mainly on account of the expansion of budgeted capital and current expenditures from G\$258,087 million to G\$469,159 million and G\$335,010 million to G\$378,416 million, respectively. The former is due to the acceleration of development projects while the latter is due to higher employment costs and payment of goods & services. The projected fiscal deficit is expected to be cushioned by the estimated drawdown of G\$208,944 million from the Natural Resource Fund as well as an estimated G\$34,275 million of inflows from the GRIF and Carbon Credit sales.

The NFPEs is projected to record an overall deficit at end 2023. This is primarily due to total expenditure outweighing total revenues. The latter is attributed to the anticipated expansion in capital works.

Total domestic debt stock and domestic debt service are projected to be higher to finance the 2023 budget deficit. The former is expected to result from the issuance of the 364-day treasury bills, while the latter is estimated to be on account of higher interest payments on 364-day treasury bills as well as debt service payments made on the BOG Debentures and CARICOM Loan.

External debt service payments are expected to rise from higher debt service repayments to multilateral and bilateral creditors. External debt stock will increase due to disbursements from multilateral creditors.

The monetary aggregates of reserve money and broad money are expected to reflect growth in economic activities. The former is likely to result from growth in net foreign assets of the Bank of Guyana while the latter is expected to stem from increased net foreign assets and net domestic credit. Interest rates are expected to remain relatively stable in 2023 reflective of the adequate level of liquidity within the banking system.

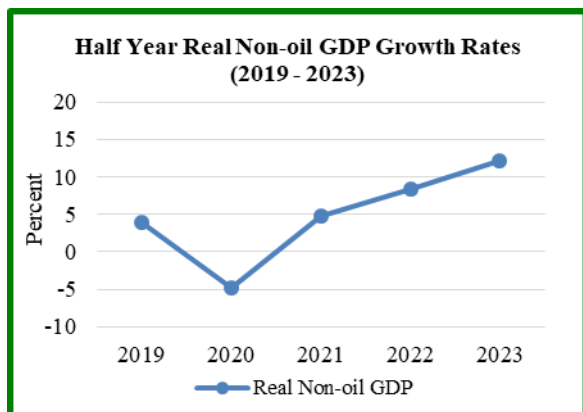

2. PRODUCTION, EMPLOYMENT, INCOME AND INFLATION

The Guyanese economy continued its growth momentum with a real oil GDP growth of 59.5 percent and non-oil GDP growth of 12.3 percent. Real oil growth benefited from crude oil production of 68.7 million barrels, while construction, agriculture, and the services sector activities were the major contributors to real non-oil growth. The Urban Consumer Price Index (CPI) recorded a deflation of 0.3 percent, reflective of declines in the prices of food (mostly vegetables, prepared meals and refreshments) as well as transport & communication due to moderation in crude oil prices and ease in supply constraints

GROSS DOMESTIC PRODUCT (GDP)

Real non-oil GDP and real oil GDP grew by 12.3 percent and 59.5 percent, respectively. These outturns reflected increased government spending on transformational infrastructure and social welfare programs, as well as higher levels of production within the oil and gas sector. While growth in the oil sector continued to improve following the additional FPSO vessel, simultaneously, effective government policies also influenced growth within the traditional, new and emerging non-oil pillars of the economy.

Figure I

PRODUCTION

Agriculture, Fishing & Forestry

The agriculture sector, which makes up 7.8 percent of Gross Domestic Product, increased by 7.6 percent, as all major sectors experienced growth when compared to one year earlier. The Other crops sub-sector, which represented 60.3 percent of the agriculture sector in 2022, experienced an increase of 9.4 percent. Traditional crops such as rice increased by 3.2 percent and sugar by 30.1 percent, as well as fishing and raising of livestock by 9.9 percent and 4.7 percent, respectively. Forestry activities experienced a 4.5 percent growth.

Sugar

Sugar output increased by 30.1 percent, to 17,034 tonnes, 101.0 percent of a targeted 16,875 tonnes, compared to 13,089 tonnes for the first half of 2022. The growth in output resulted from increased acreage planted, following the favourable weather conditions and high yield per acre, from improved quality of the sugarcane. Total hectares planted for the season amounted to 1,334, with total hectares harvested for the season totalling 5,962. Though the industry exceeded production targets, challenges faced included a 54.0 percent turnout of cane harvesters, weed infestations on the crops and rodent damages, which affected production. Further, yields were lower at 37.0 MT/hectare, compared to a yield of 39.3 MT/hectare at the same period, one year prior.

The industry plans to address these challenges in the second half of the year, to improve production and increase worker turnout. New transport methods are also being implemented, to further increase efficiency.

Table I

Selected Production Indicators Agriculture, Fishing & Forestry January - June			
Commodity	2021	2022	2023
Sugar (tonnes)	29,651	13,089	17,034
Rice (tonnes)	353,289	289,985	302,295
Fish (tonnes)	7,404	7,477	6,827
Shrimp (tonnes)	8,421	6,256	9,351
Poultry (tonnes)	24,325	27,323	29,123
Eggs ('000)	29,355	18,368	19,855
Total logs (cu.mt.)	103,815	165,930	174,448
Sawnwood (cu.mt.)	14,605	19,638	19,116
Plywood (cu. mt.)	5,598	5,428	7,654

Rice

The rice industry's production expanded by 4.2 percent to a total of 302,295 tonnes, or a 12,310 tonnes increase from end-June 2022, which exceeded projections by 0.6 percent for the first half of the year. In the first half of the year, 75,420 hectares were sown, a reduction of 4,314 hectares or 5.4 percent when compared to one year prior. Hectares harvested amounted to 75,042 hectares, a 0.3 percent decrease when compared to end-June 2022. Nevertheless, yields were higher at 6.2 t/ha, a 4.5 percent increase from the 5.9 t/ha one year earlier. Further, total loss amounted to 83 hectares, an 86.3 percent reduction from end-June 2022. This positive outturn was as a result of favourable weather conditions, which allowed farmers ease of access to their lands, resulting in improved harvesting. Further, input costs have eased significantly when compared to one year earlier. This improved performance is expected to continue to the end of the year as farmers implement recommended agronomic practices. With favourable weather and input costs remaining at current levels, production is expected to increase.

Figure II

Fishing and Livestock

The fishing industry recorded a 9.9 percent growth for the first half of the year. The production of prawns and small shrimps increased significantly by 181.0 percent and 49.2 percent respectively, due to favourable climatic conditions. Fish catches declined by 8.7 percent as a result of the presence of sargassum weed from mid-February to May.

The livestock industry's output recorded a growth of 4.7 percent. Beef and poultry meat production increased by 9.3 percent and 6.6 percent, respectively, while table eggs grew by 6.1 percent. In contrast, production of pork recorded a reduction of 3.8 percent.

Other Crops

Output of other crops grew by 9.4 percent, as higher production was recorded for all categories within the sector.

Coconut production increased by 77.3 percent, as recently cultivated acreage has now commenced its production cycle, thus resulting in an overall harvest throughout the country. Production of water coconuts grew by 185.9 percent since its demand is higher than that of dried coconuts, which experienced a decline in production by 36.2 percent.

Root crops production also increased by 14.4 percent mainly on account of increased production of eddoes by 67.2 percent. Other root crops production such as sweet potatoes, cassava and bitter cassava also experienced increases by 2.9 percent, 2.2 percent, and 1.6 percent, respectively.

Production of fruits increased by 5.4 percent, due to higher produce of passionfruit, soursop, and papaw by 27.2 percent, 13.3 percent, and 11.6 percent, respectively. However, production of mango, guava and lemon recorded the greatest decline among fruits by 23.2 percent, 19.3 percent, and 14.2 percent, respectively.

Further, production of vegetables also increased by 4.6 percent, as weather conditions remained favourable for farmers during the first half of the year. In particular, significant increase in production was recorded for lettuce, pakchoi, and bora, by 66.2 percent, 12.6 percent, and 9.0 percent, respectively. However, carrot production experienced a significant decline by 43.2 percent, due to unfavourable yield obtained during the trial and demonstration phase, thus resulting in fewer farmers pursuing its cultivation.

Production of spices and cole crops also increased by 3.0 percent and 3.3 percent, respectively.

Forestry

The forestry sector recorded a 4.5 percent growth compared with 47.1 percent growth for the same period last year. Total logs, which accounted for 84.9 percent of total production, recorded an increase of 5.1 percent compared to 59.8 percent in June 2022. This outturn was as a result of consistent demand for lumber. Roundwood production increased by 28.5 percent, while sawnwood production declined by 2.7 percent. Production of charcoal experienced a massive decrease of 85.1 percent as well as firewood production, which declined by 22.3 percent. Plywood production, on the other hand, increased by 41.0 percent.

Mining and Quarrying

The mining and quarrying sector recorded output growth of 89.9 percent, primarily from the petroleum & gas sector. Also, the other mining sector, which includes sand and stone declarations, recorded higher output. Greater crude oil production contributed to the sizeable growth of the petroleum sector, while growth in construction activities influenced increased declarations in the other mining sector.

Petroleum & Gas

The petroleum & gas sector expanded by 98.4 percent. The industry recorded crude oil production of 68.7 million barrels, an increase of 98.3 percent from the corresponding period last year. The average daily production for the period was 379,334 barrels, an increase of 96.1 percent when compared to the daily average of 228,880 barrels for the corresponding period in 2022, due to the additional FPSO.

Bauxite

Total bauxite production decreased by 19.4 percent at end-June 2023. Output performance was lower in all grades of bauxite, excluding Metallurgical Grade Bauxite (MAZ). RASC Grade Bauxite experienced an 8.9 percent decrease in production, when compared to one year prior. Similarly, Chemical Grade Bauxite (CGB) production decreased from 182,584 tonnes in June 2022 to 146,815 tonnes at end June-2023, a 19.6 percent decline. Production of the lower grade, Metallurgical Grade Bauxite (MAZ), increased by 96.9 percent to 11,669 tonnes.

Gold and Diamonds

Total gold declaration declined by 11.4 percent to 209,756 troy ounces at end-June 2023. This outturn reflected lower declarations by the small & medium scale miners, while the large scale miner registered an increase in declarations for the period. Labour shortages within small & medium scale operations

have contributed greatly to the decline in declarations. Small & medium scale miners, which accounted for 75.8 percent of total declarations, declined by 15.8 percent. Currently, Guyana Goldfields (ZIJIN Mining Group Co. Ltd) is the sole operating foreign gold mining company, as Troy Resources have paused operations since July 2021. Declarations by Guyana Goldfields (ZIJIN Mining) increased by 6.1 percent to 50,672 troy ounces from 47,772 troy ounces at the end of June 2022.

Diamond production decreased from 49,016 metric carats at end-June 2022, to 38,608 carats at end-June 2023. The decline in production is linked to the decrease in export prices when compared to the same period, one year earlier.

Other Mining

Sand declared increased by 52.6 percent to 3,545,432 tonnes from 2,323,238 tonnes, while crushed stone declared, similarly, increased by 71.7 percent to 727,701 tonnes, during the review period. The increase in declaration was driven by increased demand due to construction activities by both the private and public sector.

Manganese production decreased by 21.9 percent to 138,640 tonnes, from 177,513 tonnes, one year earlier.

Table II

Selected Production Indicators			
Mining & Quarrying			
January - June			
Commodity	2021	2022	2023
Bauxite (tonnes)	291,560	343,922	277,356
RASC	86,125	117,264	106,791
CGB	146,849	182,584	146,815
MAZ	17,176	5,925	11,669
Gold (oz)	240,318	236,728	209,756
Diamond (mt. ct.)	18,432	49,016	38,608
Stone (tonnes)	454,749	423,863	727,701
Crude Oil ('000 barrels)	20,230	34,625	68,660

Manufacturing

The manufacturing sector's output recorded a 17.7 percent expansion, compared with a contraction of 11.4 percent at end-June 2022. This improved performance was as a result of a 30.1 percent growth in sugar manufacturing, a 24.6 percent growth in Other Manufacturing, and a 1.3 percent growth in Rice Manufacturing. Other Manufacturing industries recorded increases in the categories of paints by 96.0 percent, putty by 34.5 percent, industrial flour by 15.9 percent, biscuits by 26.3 percent, and alcoholic beverages by 1.6 percent. Conversely, decreases were registered in the categories of detergents by 13.1 percent, acetylene by 7.0 percent and oxygen by 6.2 percent.

Table III

Selected Production Indicators			
Manufacturing			
January - June			
Commodity	2021	2022	2023
Alcoholic Beverages ('000 litres)	16,946	16,946	17,215
Malta ('000 litres)	283	249	286
Non-Alcoholic Beverages ('000 litres)	28,642	32,027	32,105
Liquid Pharmaceuticals ('000 litres)	501	336	262
Paints ('000 litres)	1,496	958	1,878
Electricity ('000 MWH)	455	491	534

Construction

The construction sector experienced sustained and robust growth, increasing by 44.1 percent at end-June 2023. This outturn reflects a continued increase in government infrastructure projects, along with rapid private sector development initiatives.

Services

The services sector activities increased by 9.1 percent reflecting growth within all the subsectors of services. This growth is linked to encouraging investments within the sector. Major growth was recorded in the subsectors of professional, scientific & technical services, administrative & support services, information & communication, wholesale & retail trade & repairs, accommodation and food services, and transport & storage.

The wholesale & retail trade & repairs sector recorded growth of 14.2 percent as infrastructural developments continue rapidly and consumers continue to spend more, a sign of confidence in the economy.

The administrative & support services subsector expanded by 16.1 percent as the petroleum sector continues its expansive growth.

In the information and communication subsector, growth was recorded at 19.8 percent. This expansion is as of result of both public and private investments into infrastructure within the sector.

The accommodation and food services industry experienced an expansion of 10.0 percent. The sector has positively influenced by increased occupancy rates across hotels and the opening of new hotels, and dining establishments.

The transport and storage industry grew by 6.7 percent. This outturn reflected the continued growth of the oil & gas sector which demanded more of these services.

Noteworthy performances were also recorded in the service sectors of professional, scientific & technical services by 36.9 percent, other service activities by 6.2 percent and financial & insurance activities by 6.2 percent.

EMPLOYMENT, INCOME & INFLATION

Public Sector Employment

Labour unrest, which was confined to GUYSUCO, registered a decrease in the number of work stoppages from 23 to 22 at end-June 2023. Man-days lost however, were higher at 2,205 from 2,142 at end-June 2022. Wages lost also increased by 11.9 percent to G\$7.3 million from G\$6.5 million for the same period last year.

Private Sector Employment

In the private sector, employment remained strong, primarily in the oil & gas and services sectors, as new establishments continued to launch during the first half of the year.

Income

Public sector minimum wage remained at G\$80,892 per month while the income tax threshold was unchanged at G\$85,000 per month during the first half of the year.

Inflation

The year-to-date change in the Urban Consumer Price Index (CPI) at end-June 2023 was -0.3 percent. This change in the price level was primarily due to a decline in prices within the category of food. The decrease in food prices was driven by lower world food prices, which continued to trend downwards according to the FAO Food Price Index. Further, local food prices also contributed to this decrease since weather conditions remained favourable.

Table IV shows that the deflation of 0.3 percent is reflected in the cost of food by 0.9 percent, housing by 0.3 percent, clothing by 0.1 percent, and medical care & health services by 0.1 percent. The category of food experienced a decline especially in categories of vegetables & vegetable products by 6.86 percent, prepared meals & refreshments by 6.82 percent, pulse & pulse products by 2.5 percent, oil & fats (excluding butter) by 2.2 percent, and sugar, honey & related products by 2.0 percent.

Housing price indices declined on account of lower prices within the category of fuel & power by 1.1 percent. This resulted from lower crude oil prices which were driven by both supply and demand market factors.

In contrast, the price level was also influenced by price increases in categories of miscellaneous goods & services by 1.1 percent, furniture by 0.7 percent, transport & communication by 0.2 percent, footwear and repairs by 0.1 percent, and education, recreation & cultural service by 0.1 percent.

Outlook for 2023

The Guyanese economy is expected to carry its strong growth momentum through to the end of 2023, with Real GDP projected to grow by 28.2 percent, placing Guyana amongst the top five fastest growing economies. This growth will be a direct result of

continuous fiscal spending and accommodative monetary policies by the Government. The inflation rate at the end of the year is projected to be 3.8 percent, as prices continue to fall, both locally and abroad. □

3. BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION

The overall balance of payments recorded a larger deficit of US\$196.4 million compared to US\$100.0 million for the same period last year. This outturn reflected a capital account deficit which was relatively higher than the current account surplus. The shortfall in the capital account was due to the outflow of oil revenues to the Natural Resource Fund (NRF) as well as cost recovery (withdrawal of equity) by the oil and gas sector despite higher inflows to the private sector in the form of foreign direct investments (FDIs) which expanded from US\$1,946.3 million to US\$4,045.3 million. The overall deficit was financed by a drawdown on the Bank of Guyana's foreign reserves which stood at US\$736.0 million or 1 month of import cover at the end of June 2023. Guyana's net international investment position (NIIP) was estimated at US\$13,160.2 million at the end of June 2023, a deterioration of US\$1,413.8 million or 12.0 percent from the end- March 2023 position. This was the result of an increase in liabilities which more than offset the increase in assets.

CURRENT ACCOUNT

The current account recorded a lower surplus of US\$83.9 million from a surplus of US\$765.9 million the previous year. This was mainly due to the decline in the merchandise trade surplus of US\$2,341.8 million compared to US\$2,597.5 million last year. This outturn reflected a US\$1,706.5 million increase in export receipts and a US\$1,962.1 million increase in import costs.

The non-oil current account deficit expanded by 40.7 percent to US\$760.2 million from US\$540.1 million a year ago. This deterioration resulted from a higher non-oil merchandise trade deficit of US\$1,161.2 million compared to US\$778.9 million for the same period last year, stemming mainly from higher non-oil import costs.

Merchandise Trade

The merchandise trade surplus declined by US\$255.7 million to US\$2,341.8 million from US\$2,597.5 million at end-June 2022. This outturn resulted from a 39.2 percent or US\$1,706.5 million growth in the value of exports while the value of imports increased by 111.8 percent or US\$1,962.1 million.

Table VI

Balance of Payments US\$ Million

Notes:

1) Guyana's portion of the oil revenues, deposited into the Natural Resource Fund is included here.

2) The portion of oil revenue received by EEPGL and its partners is included here.

Figure III

Exports

Total export receipts grew by 39.2 percent or US\$1,706.5 million to US\$6,059.1 million from US\$4,352.6 recorded at end-June 2022. The higher receipts stemmed from crude oil and sugar which grew by 49.3 percent and 6.1 percent respectively. In contrast, receipts from timber, bauxite, ‘other exports’, gold and rice declined by 24.5 percent, 19.8 percent, 17.2 percent, 8.7 percent and 1.6 percent respectively.

Sugar

Sugar export earnings amounted to US\$6.8 million, 6.1 percent or US\$0.4 million above the level at end-June 2022. This outturn was attributed to a 7.0 percent increase in the average price for the commodity despite a 0.8 percent decline in the volume of sugar exported. The volume of sugar exported amounted to 10,453 metric tonnes or 85 metric tonnes less than the level exported for the same period in 2022. As a percent of total sugar exports, the USA under the USA Bulk accounted for 55.5 percent while the CARICOM region accounted for 44.3 percent, compared to 21.2 percent last year.

Average export price for sugar increased by 7.0 percent or US\$44.55 to US\$62.25 per metric tonne,

compared with US\$609.70 per metric tonne at the end-June 2022.

Table VII

		Exports of Major Commodities		
		January – June		
Product	Unit	2021	2022	2023
Sugar	Tonnes	26,289	10,538	10,453
	US\$Mn.	10.5	6.4	6.8
Rice	Tonnes	282,053	194,142	182,089
	US\$Mn.	123.6	104.1	102.4
Bauxite	Tonnes	319,414	323,424	230,526
	US\$Mn.	41.0	48.2	38.6
Gold	Ounces	255,750	242,999	215,979
	US\$Mn.	438.1	434.6	396.7
Timber	Cu. Metres	29,591	41,827	20,487
	US\$Mn.	11.9	15.0	11.4
Crude Oil	'000 barrels	20,016	33,422	68,837
	US\$Mn.	1,296.6	3,612.2	5,393.8

Rice

Rice export earnings amounted to US\$102.4 million, 1.6 percent or US\$1.7 million below the level for the same period last year, resulting from lower volume of rice exported despite a 4.9 percent increase in prices. The volume of rice exported amounted to 182,089 metric tonnes, 6.2 percent or 12,052 metric tonnes less than the 194,142 metric tonnes exported one year ago. The EU’s share of rice exports declined to 25.5 percent from 37 percent in 2022, while CARICOM’s share grew to 29.7 percent from 27.8 percent one year ago. Latin America’s share grew to 37.9 percent compared with 27.6 percent in 2022.

The average export price of rice increased by 4.9 percent or US\$26.15 to US\$562.24 per metric tonne compared with US\$536.09 per metric tonne at the end-June 2022.

Bauxite

Bauxite export earnings amounted to US\$38.6 million, 19.8 percent or US\$9.5 million below the value for the corresponding period in 2022, due to lower export volume despite higher average price. The volume of

bauxite exported decreased by 28.7 percent or 92,898 metric tonnes to 230,526 metric tonnes.

The average export price for bauxite increased by 12.5 percent from US\$148.89 to US\$167.48 per metric tonne.

Figure IV

Gold

Gold export receipts amounted to US\$396.7 million, 8.7 percent or US\$38 million below the end-June 2022 level of US\$434.6 million. This was on account of a decline in the volume exported as prices improved. The volume of gold exported reduced by 11.1 percent or 27,020 ounces to 215,979 ounces as a result of lower declarations.

The average export price per ounce of gold was higher by 2.7 percent or US\$47.96 moving to US\$1,836.59 per ounce from US\$1,788.63 per ounce one year ago.

Timber

The value of timber exported was US\$11.4 million, 24.5 percent or US\$3.7 million lower than the US\$15.0 million recorded a year ago. This outturn reflected lower export volume since prices were higher. The volume of timber exported was 51.0

percent lower at 20,487 cubic metres. Earnings from other timber exports decreased by US\$3.7 million while there was no plywood exports for the period under review.

The average export price per cubic metre increased by 54.1 percent or US\$194.62 to US\$554.62 at the end June 2023.

Crude Oil

Crude oil export earnings amounted to US\$5,393.8 million, US\$1,781.6 million higher than the same period one year ago. The volume of crude oil exported increased by 106 percent to 68.8 million barrels from 33.4 million barrels one year ago. This increase was due to a second Floating Production Storage and Offloading (FPSO) which started production.

The average export price received for crude oil decreased by 27.5 percent or US\$29.72 to US\$78.36 per barrel from US\$108.08 per barrel one year ago.

Other Exports

Total earnings from all other exports, which included re-exports, were US\$109.4 million, 17.2 percent less than the value for the same period last year. This decline was primarily on account of lower receipts in the sub-categories of re-exports, 'other' (which consists of wildlife, personal effects, handicrafts and nibbi-furniture), prepared food, diamonds, pharmaceuticals, beverages and fish and shrimp by US\$18.6 million, US\$3.5 million, US\$2.3 million, US\$1.7 million, US\$1.0 million, US\$0.7 million and US\$0.1 million, respectively. All other sub-categories recorded higher earnings as shown in Table VII.

Table VIII

Commodities	Other Exports US\$ Million		
	January – June		
	2021	2022	2023

Re-Exports	15.0	33.4	14.8
Others ¹⁾	3.5	15.3	11.8
Total	100.4	132.1	109.4

Imports

The value of merchandise imports increased by 111.8 percent or US\$1,962.1 million to US\$3,717.3 million. This outturn was on account of higher imports of capital, intermediate and consumption goods and as shown in Table VIII, due to the importation of the third FPSO - Prosperity at a value of US\$1,763.1 million.

In the consumption goods sub-category, imports amounted to US\$383.1 million, 26.1 percent or US\$79.3 million more than the 2022 corresponding level. This was due to increases in the sub-categories of motor cars, food for final consumption, other non-durable goods, other durable, beverages & tobacco, clothing & footwear and other semi-durable goods by US\$34.5 million, US\$20.5 million, US\$16.5 million, US\$6.3 million, US\$0.6 million, US\$0.5 million and US\$0.4 million, respectively.

Table IX

Items	Imports US\$ Million		
	January – June		
	2021	2022	2023
Consumption Goods			
Food-Final Consumption	92.8	101.7	122.2
Beverage & Tobacco	26.8	30.3	30.9
Other Non-Durables	60.9	56.3	72.7
Clothing & Footwear	12.5	10.7	11.3
Other Semi-Durables	22.6	24.9	25.2
Motor Cars	36.9	32.2	66.7
Other Durables	46.5	47.7	54.0
Sub-total	298.9	303.8	383.1
Intermediate Goods			
Fuel & Lubricants	364.1	611.7	595.0
Food-Intermediate use	43.5	52.9	70.6
Chemicals	46.9	51.4	53.2
Textiles & Fabrics	2.7	2.6	3.2
Parts & Accessories	61.6	67.1	97.4
Other Intermediate Goods	127.5	182.7	186.1
Sub-total	646.3	968.5	1,005.5
Capital Goods			
Agricultural Machinery	46.3	50.2	72.7
Industrial Machinery	24.8	19.7	30.6
Transport Machinery	40.5	51.0	162.7
Mining Machinery	59.8	246.9	1,863.1
Building Materials	65.2	62.5	98.9
Other Goods	41.8	44.5	99.1
Sub-total	278.4	474.9	2,327.1
Miscellaneous	5.8	7.9	1.6
Total Imports	1,229.4	1,755.1	3,717.3

In the intermediate goods sub-category, imports increased by 3.8 percent or US\$36.9 million to US\$1,005.5 million from US\$968.5 million in 2022. This position was as a result of the higher import bill for parts & accessories by 45.1 percent or US\$30.3 million. Food for intermediate use, other intermediate goods, chemicals and textiles also increased by US\$17.6 million, US\$3.4 million, US\$1.7 million and US\$0.6 million, respectively. Lower import was recorded for fuel and lubricants by US\$16.7 million reflective of a decline in the average Brent oil price which fell by 24.6 percent to US\$79.84 per barrel.

Imports in the sub-category of capital goods grew by 390.1 percent or US\$1,852.3 million to US\$2,327.1 million. This was primarily attributable to an increase in the imports of mining machinery (the third Floating Production Storage and Offloading (FPSO) vessel –

Prosperity for use in the oil & gas sector) by US\$1,616.2 million. Higher imports were also realised for transport machinery, other capital goods, building materials, agricultural machinery and industrial machinery by US\$111.7 million, US\$54.5 million, US\$36.3 million, US\$22.6 million and US\$11.0 million respectively as shown in Table IX.

Services and Unrequited Transfers

The services account recorded a higher net payment of US\$2,799.3 million, an increase of 19.1 percent or US\$448.1 million from US\$2,351.2 million for the corresponding period in 2022, as shown in Table V. This resulted from higher payments for non-factor services by US\$362.0 million and factor services by US\$86.1 million. Net payments for factor services increased by 14.0 percent to US\$700.0 million from US\$614.0 million one year ago. Net payments for non-factor services was greater by 20.8 percent or US\$362.0 million due to higher payments for commercial services, freight and travel which amounted to US\$2,058.2 million, US\$243.4 million and US\$48.9 million respectively. In the other business services sub-category, payments for construction, technical, trade related & other business services and operating lease amounted to US\$1,576.5 million, US\$198.1 million and US\$216.3 million respectively, mainly for the oil and gas sector.

Net current transfers increased by 4.2 percent or US\$21.7 million to US\$541.3 million. This outturn was due to higher inflows to bank accounts.

CAPITAL ACCOUNT

The capital account recorded a lower deficit of US\$238.7 million from US\$939.0 million at end-June 2022. This was the result of net outflow of US\$658.4 million in oil revenue to the Natural Resource Fund (NRF) and US\$4,033.8 million in cost recovery (withdrawal of equity) by the oil and gas sector despite higher inflows to the private sector in the form of

Foreign Direct Investments (FDIs). Loans disbursed to the non-financial public sector increased by US\$74.3 million to US\$99.9 million and short-term private capital net recorded an outflow of US\$29.8 million from US\$21.5 million one year ago. This is explained by commercial banks' accumulation of foreign assets. Foreign direct investment inflows grew by 107.8 percent or US\$2,099.0 million to US\$4,045.3 million primarily due to the acquisition of FPSO –Prosperity

Capital grants received by the combined public sector amounted to US\$6.1 million.

Notes:

(1) This category includes Credits associated with the PetroCaribe Agreement.

Overall Balance and Financing

The overall balance of payments deficit widened to US\$196.4 million from US\$100.0 million due to a capital account deficit of US\$238.7 million which more than offset the current account surplus of US\$83.9 million. The overall deficit was financed by a drawdown on the Bank of Guyana's foreign reserves which moved from US\$932.4 million to US\$736.0 million at the end of the review period. The level of reserves provided an import cover of 1 month at the

end of the first half of the year with the exclusion of the FPSO.

or liabilities differ from gross reductions in these and vice versa.

Outlook for 2023

The overall balance of payments is expected to record a surplus at the end of 2023, due to a current account surplus inclusive of oil. The current account is expected to benefit from higher oil export earnings, additionally, non-oil export earnings is expected to increase. The capital account is likely to record a deficit, resulting from the outflow of oil revenue to the Natural Resource Fund and oil cost recovery (withdrawal of equity) by the oil and gas sector despite higher inflows of FDIs. The non-oil current account is estimated to record a deficit.

BALANCE OF PAYMENTS (BPM6 methodology)

Background

The Balance of Payments Manual 6th edition (BPM6) methodology and presentation will be used in the future to compile the BOP. The IMF's BPM6 comprises of the Current Account, the Capital Account and the Financial Account.

The Current Account includes net trade in goods (F.O.B.) and services, primary income (net earnings on cross border investments) as well as secondary income (net transfer payments).

The Capital Account records capital transfer, debt forgiveness and the acquisition and/or disposal of nonproduced, nonfinancial assets.

The Financial Account records changes in Guyana's external assets and liabilities. These assets and liabilities include foreign direct investments, portfolio investments and other investments such as currency & deposits, loans and reserve assets. Net changes in assets or liabilities arise when gross increases in assets

Review of the First Quarter 2023

An overview of the BOP in BPM6 format is shown in table XI below.

The current account for March 2023 reflected a surplus of US\$994.0 million, an improvement of US\$1,188.8 million when compared with the deficit of US\$194.7 million for the same period last year. This improvement was primarily due to a surplus on the goods and secondary income accounts which more than offset the deficits on the services and primary income accounts.

The surplus on the goods account increased by 203.2 percent or US\$1,432.2 million from US\$704.9 million to US\$2,137.1 million. This outturn reflected a US\$1,628.0 million growth in exports to US\$2,993.8 million. Higher export receipts came from crude oil with US\$2,676.3 million, gold with US\$210.6 million and rice with US\$32.4 million. Lower export receipts were from 'other export', bauxite, timber and sugar by US\$17.0 million, US\$3.5 million, US\$1.1 million

and US\$0.2 million, respectively. Merchandise imports (F.O.B.) increased by US\$195.8 million owing to higher capital, intermediate and consumption goods by US\$101.3 million, US\$57.4 million and US\$38.7 million, respectively. In the intermediate goods subcategory, fuel & lubricants import was higher by US\$10.1 million due to increased demand.

The services account recorded a larger deficit of US\$1,086.2 million, an increase of 15.2 percent or US\$143.4 million from one year ago. This resulted from higher payments for construction, freight and other business services which includes: technical, trade related & other business services and operating lease for the oil & gas sector. The Services debits reflected an US\$84.1 million increase in tourist expenditure. Visitor arrivals for the first quarter of 2023 were 24.9 percent higher than the same period in 2022.

The Primary Income account also recorded higher net payments of US\$367.2 million largely reflecting the repatriation of income on equity (oil profits) by the oil & gas sector.

The Secondary Income account recorded a higher surplus of US\$310.3 million compared to US\$250.8

million last year reflecting an increase in ‘other current transfers’.

The capital account registered a surplus of US\$2.1 million from a surplus of US\$0.4 million at end-March 2022, on account of higher receipt of capital transfers.

The Financial Account reflected a net borrowing position of US\$849.9 million for March 2023, primarily due to the cost recovery (withdrawals of equity) of the oil and gas sector. Foreign Direct Investment inflows amounted to US\$971.1 million largely related to investments in the oil and gas industry. Portfolio Investments reflected a net outflow of US\$17.3 million mainly on account of an increase in the acquisition of assets abroad by Deposit Taking Institutions. Net Other Investment inflows amounted to US\$22.7 million for the review period, a decrease of US\$110.3 million relative to March 2022. This was the result of the drawdown on currency and deposits held abroad by Government (NRF withdrawal).

Reserve Assets of the Bank of Guyana recorded a drawdown of US\$175.5 million.

NET INTERNATIONAL INVESTMENT POSITION

Guyana’s net international investment position (NIIP) was estimated at US\$13,160.2 million at the end of June 2023. This represented a deterioration of US\$1,413.8 million or 12.0 percent from the end March 2023 position, resulting from an increase of 11.1 percent in the stock of liabilities which more than offset the increase of 7.9 percent in the stock of assets. Assets increased by US\$273.9 million to US\$3,722.4 million resulting from an increase in deposits held abroad by US\$290.9 million. Liabilities increased by

US\$1,687.6 million to US\$16,882.6 million owing to an increase of US\$1,640.6 million in inward direct investment due to the acquisition of the third FPSO - Prosperity.

Table XII

International Investment Position

Portfolio Investment	-	-	-
Other Investments	6,652.7	6,394.0	6,440.9

4. FOREIGN EXCHANGE MARKET DEVELOPMENTS

Total foreign exchange turnover grew by 20.1 percent to US\$7,116.3 million. Increases are reflected in transactions through bank and non-bank cambios, foreign currency accounts and hard & soft currencies. Transactions through foreign currency accounts and cambios which accounted for 81.0 percent of the total volume recorded a 15.2 percent increase due to higher demand for foreign exchange. The Guyana dollar mid-rate, which is used for official transactions, remained unchanged at G\$208.50 while the market rate was G\$210.34.

OVERALL MARKET VOLUMES

The overall value of foreign currency transactions was US\$7,116.3 million, representing a 20.1 percent or US\$1,189.0 million increase from one year ago. Aggregate purchases and sales were both higher at US\$3,469.7 million and US\$3,646.7 million respectively, resulting in a net sale of US\$177.0 million.

Figure V

Transactions processed at the cambios amounted to US\$3,276.5 million, representing 40.0 percent of the total market turnover. Bank of Guyana's transactions amounted to US\$1,342.0 million or 18.9 percent of the market share. Foreign currency accounts and soft currency transactions were US\$2,487.9 million and

US\$9.9 million respectively, and together, accounted for 35.1 percent of the market share.

The turnover generated by the bank and non-bank cambios was US\$3,276.5 million, an increase of US\$313.8 million or 10.6 percent when compared with the same period last year. Cambio purchases were US\$1,647.2 million while sales were US\$1,629.3 million.

Total transactions for the six bank cambios was 10.6 percent higher at US\$3,240.8 million when compared with US\$2,930.6 million for the same period last year. The non-bank cambios' transactions increased by 11.1 percent to US\$35.7 million. Bank cambios' share of the market remained stable at 98.9 percent, likewise the market share of the non-bank cambios was stable at 1.1 percent.

Among the four major currencies transacted, the US dollar was dominant with a market share of 96.0 percent. This was followed by the Euro with 1.6 percent, the Pound Sterling with 1.5 percent and the Canadian dollar with 0.9 percent.

Official transactions processed by the Bank of Guyana were higher at US\$1,342.0 million when compared to US\$918.2 million in the corresponding period last year. Total receipts and payments were US\$575.6 million and US\$766.5 million respectively, compared

with US\$408.6 million and US\$509.6 million in the first half of 2022.

Receipts from the Natural Resource Fund, the Guyana Gold Board and the Guyana Revenue Authority were US\$400.0 million, US\$46.1 million and US\$24.5 million respectively, and accounted for 81.8 percent of total receipts. Payments for the importation of fuel oil and ‘other goods and services’ amounted to US\$326.9 million and US\$334.9 million respectively, and together represented 86.3 percent of total payments compared with 84.6 percent in the same period last year.

The combined transactions of the foreign currency accounts increased by 21.8 percent to US\$2,487.9 million from US\$2,042.0 million in the first half of last year. The debits and credits of these accounts were US\$1,241.9 million and US\$1,246.0 million respectively. Transactions by non-residents, government, hotel/tourism, engineering, ‘other’, forestry, insurance/finance, shipping and mining/dredging segments together accounted for 97.6 percent of total foreign currency accounts transactions.

Transactions of CARICOM currencies increased to US\$9.9 million from US\$4.5 million at the end of June 2022. The Trinidad & Tobago, Barbadian, and Eastern Caribbean dollars represented 92.6 percent, 5.4 percent and 2.0 percent respectively, of the total volume traded in regional currencies.

The interbank trade by the commercial banks was higher at US\$32.9 million compared with US\$9.0 million for the same period last year.

THE EXCHANGE RATES

The Guyana dollar mid-rate, relevant for official transactions, remained at G\$208.50 at the end of June 2023. The weighted average mid-rate was G\$210.34 compared with G\$206.92 for the corresponding period in 2022, thereby indicating a depreciation by 1.7 percent.

At the bank cambios, the average buying and selling rates of the US dollar were higher at G\$213.62 from G\$213.53 and at G\$215.59 from G\$215.43 in the corresponding period last year. The average buying and selling rates of the US dollar at non-bank cambios as at June 2023 depreciated to G\$206.44 from G\$201.76 and to G\$209.71 from G\$204.64 respectively from the corresponding period last year. Moreover, the banks’ spread was lower at G\$1.98 compared with the non-banks’ spread at G\$3.27.

Figure VI

The difference between the banks’ and non-banks’ buying rates declined to G\$7.18 from G\$11.77 at end-June 2022. The difference in the selling rates of the bank and non-bank cambios was G\$5.88 compared with G\$10.79 for the corresponding period in 2022.

At the end of June 2023, the Trinidad & Tobago dollar remained relatively stable at TT\$6.74, while the Jamaican dollar depreciated by 1.0 percent against the US dollar to settle at J\$154.47. The exchange rate regimes of Barbados, Belize and Eastern Caribbean remained fixed.

Outlook for 2023

The exchange rate of the Guyana dollar to the US dollar is expected to remain relatively stable due to a net supply of foreign exchange to the market. Moreover, foreign exchange flows to the market are expected to adequately cover imports. □

5. PUBLIC FINANCE

The overall financial operations of the public sector registered a deficit of G\$7,607 million due to the budgeted deficit of the Central Government. Central government operations recorded a deficit of G\$5,893 million from a surplus of G\$13,831 million on account of an increase in the deficit of the capital account. The current account recorded a higher surplus of G\$110,889 million due to a 44.9 percent increase in current revenues. The capital account deficit of G\$116,782 million was due to a 152.5 percent increase in spending for roads & bridges, health care facilities and the housing programme. NFPE's recorded a deficit of G\$1,713 million due to higher capital expenditure by GUYSUCO and GPL.

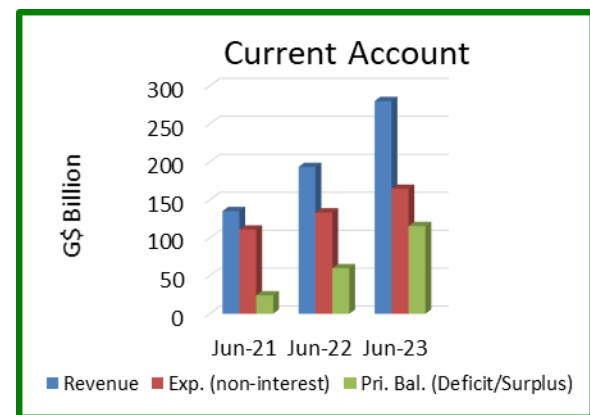

CENTRAL GOVERNMENT

Central Government recorded a deficit of G\$5,893 million¹ compared to a surplus of G\$13,831 million one year ago. This outcome was reflective of the enlarged budgeted capital account deficit, which expanded by G\$74,094 million to G\$116,782 million. The current account surplus grew by G\$54,370 million to G\$110,889 million.

Current Account

The current account surplus grew by G\$54,370 million to G\$110,889 million compared to a surplus of G\$56,518 million at end-June 2022 due to G\$86,791 million increase in current revenues to G\$280,089 million. Current expenditures increased by G\$32,421 million to G\$169,201 million. The higher current revenues is reflective of a growth in GRA tax revenues by G\$36,699 million, as well as Natural Resource Fund withdrawals, which expanded by G\$41,492 million to G\$83,192 million.

Figure VII

Revenue

Total current revenues (net of NRF, GRIF & CCS inflows) increased by 26.5 percent to G\$191,365 million at end-June 2023. This was due to greater tax collection by 25.3 percent to G\$181,850 million. Higher receipts were collected for income taxes, value added & excise taxes, trade taxes and other taxes, which as a percentage of half year nominal GDP were 6.5 percent, 3.0 percent, 1.0 percent and 0.6 percent, respectively.

¹ The half year (HY) fiscal deficit was 0.4 percent of HY nominal GDP. Conversely, the fiscal deficit (excluding NRF flows) was 12.8 percent of HY nominal non-oil GDP.

Income tax receipts increased by 32.7 percent to G\$106,555 million due to greater oil & gas related collection from private sector firms. Personal income taxes and withholding taxes expanded by 28.6 percent and 30.8 percent to G\$34,463 million and G\$29,859 million, respectively. Private corporation taxes rose by 34.7 percent to G\$40,305 million while public corporation taxes grew by 164.1 percent to G\$1,928 million.

VAT & excise taxes increased by 13.5 percent to G\$49,023 million. VAT collection rose by 21.5 percent to G\$34,287 million. However, excise taxes contracted by 1.6 percent to G\$14,736 million since the excise tax on petroleum products continued to be zero rated.

Trade taxes were higher by 21.9 percent to G\$15,803 million, mainly on account of higher import and export duties by 17.5 percent and 220.2 percent to G\$13,579 million and G\$73 million, respectively. Travel taxes grew by 55.2 percent to G\$2,151 million.

Other taxable current revenues expanded by 20.0 percent to G\$10,469 million. This was due to increases in property taxes, other custom duties (professional & other fees), environmental levy, capital gains and vehicle licensing by 15.8 percent, 48.1 percent, 1.2 percent, 178.6 percent and 16.4 percent to G\$6,088 million, G\$1,266 million, G\$1,245 million, G\$751 million and G\$705 million, respectively.

Non-tax revenues expanded by 55.3 percent to \$9,515 million due to higher revenues from fees, fines & charges by 20.6 percent to G\$1,023 million and other miscellaneous revenues by 28.7 percent to G\$2,647 million. In addition, Bank of Guyana contributions from profits grew by 35.7 percent to G\$4,338 million.

Table XIII

	Central Government Financial Operations		
	G\$ Million

Net Domestic Borrowing (+) / Savings (-) ¹⁾	5,055	(13,151)	(4,833)

Notes:

1) Domestic Financing includes other financing.

Expenditure

Total current expenditure (including debt charges) grew by 23.7 percent to G\$169,201 million, in line with budgetary spending.

Transfer payments grew by 32.5 percent to G\$75,066 million and represented 44.4 percent of total current expenditure. This mainly comprised subsidies & contribution to local & international organisations, pensions, as well as education subventions, grants & scholarships of G\$40,691 million, G\$21,706 million and G\$12,602 million, respectively.

Employment costs, which accounted for 27.1 percent of total current expenditure, grew by 19.5 percent to G\$45,859 million. Within this category of expenses, wages & salaries amounted to G\$38,984 million, while benefits & allowances totalled G\$6,875 million.

Purchases of other goods & services, which represented 25.8 percent of current expenditure, expanded by 13.8 percent to G\$43,647 million. This category mainly comprised of spending on miscellaneous goods & services, materials & supplies, electricity charges, maintenance of infrastructure,

transport, travel & postage, rental & maintenance of buildings and fuels & lubricants by G\$14,180 million, G\$10,913 million, G\$5,272 million, G\$4,228 million, G\$3,752 million, G\$2,651 million and G\$1,739 million, respectively.

Total interest charges expanded by 36.4 percent to G\$4,629 million. External interest costs increased by 25.2 percent to G\$3,247 million while domestic interest costs expanded by 72.7 percent to G\$1,381 million.

Capital Account

The capital account recorded a deficit of G\$116,782 million. Capital revenues in the form of project financing amounted to G\$1,268 million while capital expenditures were G\$118,068 million.

Capital outlays expanded by 152.5 percent to G\$118,068 million due to an improved execution rate of the expected capital budget by 25.2 percent compared to 18.1 percent of the budgeted amount for the similar period last year.

Disbursements for the construction and housing sectors were G\$44,849 million and G\$20,145 million, respectively. Together there were 55 percent or approximately over one-half of the total capital spending.

Overall Balance and Financing

The overall fiscal deficit of G\$5,893 million at end-June 2023 was financed by net external borrowing of G\$10,726 million. There was domestic savings of G\$4,833 million.

Figure VIII

Outlook for 2023

Central government's overall balance is forecasted to record a wider deficit of G\$228,728 million mainly on account of the expansion of capital and current budgetary expenditures from G\$258,087 million to G\$469,159 million and G\$335,010 million to G\$378,416 million, respectively. The former is due to the acceleration of development projects while the latter is due to higher employment costs and transfer payments. The projected fiscal deficit is expected to be cushioned by the estimated drawdown of G\$208,944 million from the Natural Resource Fund as well as an estimated G\$34,275 million of inflows from the GRIF and Carbon Credit sales.

NON-FINANCIAL PUBLIC ENTERPRISES

The overall balance of the NFPEs, which includes Guyana Sugar Corporation (GUYSUICO), Guyana Oil Company Limited (GUYOIL), Guyana National Shipping Company (GNSC), Guyana Power & Light (GPL), Guyana Post Office Corporation (GPOC) and the National Insurance Scheme (NIS) recorded a deficit of G\$1,713 million compared to a deficit of G\$3,394 million at end-June 2022. This was primarily due to relatively higher capital expenditures.

Current Account

The NFPEs' current account balance recorded a deficit of G\$249 million from a deficit of G\$3,292 million one year ago. This performance reflected a relatively lower non-interest current expenditure.

Receipts

Current receipts amounted to G\$75,835 million compared to G\$81,029 million last year. The lower level of receipts was due to declines in local sales, export receipts and debtors payments by G\$1,921 million, G\$134 million and G\$3,626 million to G\$35,177 million, G\$1,783 million and G\$16,471 million, respectively. Other grew by G\$926 million to G\$22,091 million from G\$21,164 million one year ago.

Total receipts of GUYOIL declined by 19.0 percent to G\$25,883 million while GPL revenues declined by 2.9 percent to G\$22,185 million. The former reflected lower receipt from debtors by 20.6 percent to G\$14,818 million while the latter was due to decreased local sales receipt by 1.9 percent to G\$21,335 million.

Conversely, total income of NIS grew by 12.8 percent to G\$17,620 million, reflecting greater contributions by employed and self-employed persons as well as arrears recovered by 10.4 percent, 12.8 percent and 66.4 percent to G\$15,383 million, G\$675 million and G\$1,180 million, respectively. However, investment income declined by 5.2 percent to G\$312 million.

Notes:

1) Domestic Financing includes other financing.

Expenditure

Total current expenses (including interest charges and taxes) declined by 9.8 percent or G\$8,200 million to G\$76,084 million.

Non-interest current expenditure declined by 9.7 percent to G\$76,075 million, due to reduction in payment to creditors by 34.0 percent to G\$19,783 million, materials & supplies by 2.5 percent to G\$21,874 million and other expenditure by 1.7 percent to G\$19,030 million. Conversely, employment costs increased by 9.5 percent to G\$11,216 million.

Interest payments declined by G\$37 million to G\$8.5 million. This was due to lower interest payments from GUYSUCO of G\$8 million from G\$44 million one year ago.

NIS experienced a marginal growth in current expenditure of 0.7 percent to G\$16,852 million relative to a growth of 11.9 percent for the corresponding period in 2022. This performance was attributed to increases in employment and administrative expenses by G\$116 million and G\$81

million to G\$1,029 million and G\$452 million, respectively. However, there was a reduction in the payment of benefits, which represents 91.2 percent of operating expenses, by G\$88.2 million to G\$15,364 million compared to an increase of G\$1,164 million at end-June 2022.

Capital Account

The NFPEs' capital account recorded a deficit of G\$1,465 million compared to G\$102 million for the same period last year on account of a 136 percent growth in capital expenditure. Capital expenses increased largely due to domestic capital spending by GUYSUCO, GPL and GUYOIL while capital revenues were capital transfers from Central Government to GUYSUCO.

Figure IX

Overall Balance and Financing

The NFPEs recorded an overall deficit of G\$1,713 million at end-June 2023. This deficit was financed by net domestic borrowings of G\$1,917 million, while net external savings were G\$203 million.

Outlook for 2023

The NFPEs is projected to record an overall deficit at end 2023. This is primarily due to total expenditure outweighing total revenues. The latter is attributed to the anticipated expansion in capital works. □

6. PUBLIC DEBT

The total stock of government's public and publicly guaranteed debt increased by 7.2 percent to US\$3,917 million reflecting an expansion in both domestic debt and external debt to fund budgeted spending. The stock of domestic debt rose by 9.7 percent to G\$476,586 million, primarily due to the increased issuance of treasury bills while, the stock of external debt increased by 3.8 percent, owing to an expansion in the stock of bilateral and multilateral debt. Total debt service was higher by 64.9 percent and amounted to US\$92 million. Domestic debt service payments increased by G\$6,086 to G\$8,798 million, primarily as a result of higher debt service payments made on the BOG Debenture, as well as debt service payments made on the NICIL bond. External debt service payments rose by 16.6 percent on account of higher interest repayments to multilateral creditors. The debt sustainability indicators remained below the pre-defined threshold, with debt at a manageable and sustainable level which implies greater fiscal space to facilitate further development projects.

Stock of Domestic Debt

The outstanding stock of government domestic debt, which consists of treasury bills, debentures, bonds and the CARICOM loan expanded by 9.7 percent to G\$476,586 million from the end-December 2022 position. The increase in the stock of domestic debt resulted primarily from a 21.8 percent growth in the stock of 364-day treasury bills. The outstanding balance on the stock of bonds declined by significantly by 93.7 percent or G\$4,125 million. Similarly, the CARICOM loan decreased by 16.7 percent or G\$18 million. Debentures recorded a decline by 1.6 percent or G\$3,274 million at end-June 2023.

Figure X

Table XV

Central Government Public and Public Guaranteed Debt ¹⁾

Overdraft ⁴⁾	0	0	0
Government Guaranteed Debt	500	500	500
NICIL Bond	0	0	0
Deposit Insurance Corporation	500	500	500

Notes:

- 1) The Government of Guyana made the decision to include publicly guaranteed debt so as to provide a complete picture of the country's debt position.
- 2) This category includes K-Series.
- 3) The NICIL bond was transferred to the books of the Government in December 2020.
- 4) The Central Government's gross overdraft with the Bank of Guyana was included in domestic debt with effect from December 2020 in order to regularize and accurately reflect government's liabilities.

The outstanding stock of treasury bills was G\$278,677 million when compared to the G\$228,977 million recorded at end-Dec 2022. This increase mainly reflected the expansion in the stock of 364-day treasury bills for budget financing. The stock of 182-day treasury bills was unchanged at G\$352 million similarly, the stock of 91-day treasury bills including the K-Series treasury bills remained unchanged at G\$997.3 million. The 364-day treasury bills accounted for 99.5 percent of the total stock of treasury bills, while the 182-day and K-Series bills accounted for the remaining 0.1 percent and 0.4 percent, respectively.

The share of the commercial banks' holdings of the outstanding stock of treasury bills was lower at 66.9 percent from 72.5 percent in December 2022. The Bank of Guyana holding of the outstanding stock of treasury bills increase by 58.8 percent to G\$80,997 million from \$50,997 million at end-December 2022.

The public sector's share, of which the National Insurance Scheme was the only stakeholder, fell to 0.5 percent from 0.6 percent at end-December 2022. Other financial intermediaries' share also declined to 3.5 percent compared with 4.6 percent at end-2022.

Total treasury bills issued during the first half of 2023 increased by 58.5 percent to G\$134,607 million. The issuance of 364-day bills increased by 60.2 percent or G\$49,700 million to reach G\$132,260 million during the review period. In contrast, the issuance of 182-day bills remained the same at G\$352 million. There was no issuance of 91-day treasury bills. Redemption of treasury bills increased by 60.4 percent to G\$84,907 million from G\$52,937 million at end-June 2022. Redemption of 182-day bills remained the same at G\$352 million while that of the 364-day bills increased by 22 percent to G\$82,560 million.

The stock of treasury bills issued for fiscal purposes totalled G\$277,680 million from G\$227,980 million at end-December 2022 and accounted for 99.6 percent of the total stock of treasury bills. The stock of treasury

bills issued for monetary purposes remained unchanged at G\$997 million end-December 2022.

Domestic Debt Service

Total domestic debt service payments increased by G\$6,086 million to G\$8,798 million, primarily on the account of higher debt service payments made on the BOG Debenture and the NICIL Bond. Total principal payments rose by G\$5,505 million from G\$1,912 million at end-June 2022, mainly as a result of increase in principal repayments on the BOG Debentures. Further, principal repayments for tranche 1 of the NICIL bond amounted to G\$4,125 million at end-June 2023. Total interest payments increased by G\$581.4 million to G\$1,381 million, on account of higher interest payments made on treasury bills and BOG Debenture. Interest payments on 364-day treasury bills increased by 69.4 percent or G\$350 million when compared to June-2022. In contrast, interest paid on bonds and the CARICOM loan were lower by G\$97 million and G\$1 million, respectively, to G\$100 million and G\$2.7 million, respectively.

The average yield on the 364-day treasury bill was higher at 1.08 percent, an increase of 4 basis points from end-June 2022. In contrast, the average yield on the 182-day Treasury bill was stable at 0.99 percent. The yield for 91-day treasury bills remained unchanged at 1.54 percent.

Table XVI

	Domestic Debt Service G\$ Million		
	Jun	Dec	Jun
	2022	2022	2023
TOTAL DEBT SERVICE	2,712	13,552	8,798
Principal Payments ¹⁾	1,912	9,680	7,417
Total Interest	800	3,872	1,381
Treasury Bills	514	1,457	864
91-day ²⁾	8	15	8
182-day	2	3	2
364-day	505	1,438	855
CARICOM Loans	4	7	3
Debentures	85	2,029	414
Other ³⁾	0	0	0
NICIL Bond ⁴⁾	197	379	100

Notes:

1) Treasury bills issued for fiscal purposes are rolled over upon maturity. The principle amount is only included here for accounting purposes.

2) This category includes K-Series.

3) Unpaid Interest on Treasury bills to Bank of Guyana.

4) Debt Service payments on the NICIL bond have been included under domestic debt service with effect from November 2020.

Outlook for 2023

Total domestic debt stock and domestic debt service are projected to be higher to finance the 2023 budget deficit. The former is expected to result from the issuance of the 364-day treasury bills, while the latter is estimated to be on account of higher interest payments on 364-day treasury bills as well as debt service payments made on the BOG Debentures and CARICOM Loan.

Stock of External Debt

The stock of outstanding public and publicly guaranteed external debt increased by 3.8 percent to US\$1,631 million from the end-December 2022 level. This increase resulted mainly from higher bilateral debt owed to the EximBank of China and UK Export Finance (UKEF) and higher multilateral debt to the International Development Association (IDA).

Table XVII

	Structure of External Public Debt US\$ Million		
	Jun	Dec	Jun
	2022	2022	2023
TOTAL EXTERNAL PUBLIC DEBT	1,371	1,572	1,631
Multilateral	914	1,092	1,107
Bilateral	426	449	494
Suppliers' Credit	13	13	13
Financial Markets/Bonds	19	18	18

Obligations to multilateral creditors, which accounted for 67.8 percent of total external public debt, increased marginally by 1.3 percent to US\$1,106.5 million. This was attributed to a rise in liabilities to IDA that rose by 11.2 percent to US\$131 million. Likewise, indebtedness to 'other' multilateral creditors increased by 9.4 percent to US\$33 million. In contrast, the obligations to the Inter-American Development Bank (IADB) and Caribbean Development Bank (CDB) declined marginal by 0.1 percent and 0.7 percent, respectively, to US\$787 million and US\$156 million, respectively due to debt service payments.

Total bilateral obligations, which accounted for 30.3 percent of total external debt, increase by 10.1 percent to US\$494 million. This outcome was on account of higher disbursements from bilateral creditors, particularly, the EximBank of China and UK Export Finance (UKEF) which increase by US\$21 million and US\$11 million, respectively, during the first half of 2023. Furthermore, disbursements from China CAMC Engineering CO of US\$14 million were recorded during the review period.

In the private creditor's category, total obligations fell by 1.3 percent or US\$0.4 million, reflecting a 3.7 percent reduction in liabilities to Republic Bank (T&T).

External Debt Service

External debt service payments grew by 16.6 percent to US\$50 million from its end-June 2022 level, accounting for 3.7 percent of Central Government's current revenue and 0.8 percent of exports of goods and non-factor services. Principal and interest payments amounted to US\$32 million and US\$18 million, respectively.

Payments to multilateral creditors increased by 25.8 percent to US\$31 million, and accounted for 61.9 percent of total external debt service. Debt service payments to the IADB and CDB, which jointly accounted for 54.1 percent of total external debt service, increased by 33.6 percent and 19.4 percent, respectively, to US\$20 million and US\$7 million, respectively.

Payments to bilateral creditors also increased by 4.5 percent to US\$18 million, and accounted for 36.2 percent of total external debt service. The growth was primarily as a result of increased debt service payments to the EximBank of China, which accounted for 23.3 percent of total external debt service, by 9.8 percent during the first half of 2023.

Payments to private creditors remained unchanged at US\$1 million during the review period.

Table XVIII

External Debt Service Payments			
US\$ Million			
	Principal	Interest	Total
End-June 2023			
Total	32.4	17.7	50.1
Multilateral	17.3	13.8	31.1
Bilateral	14.7	3.5	18.2
Private Creditors	0.5	0.4	0.9
End-June 2022

Multilateral	16.5	8.1	24.7
Bilateral	14.1	3.3	17.4
Private Creditors	0.5	0.5	0.9

HIPC Assistance and Multilateral Debt Relief Initiative

Heavily Indebted Poor Countries (HIPC) assistance under Original and Enhanced HIPC Initiatives increased by 3.2 percent to US\$2.2 million. This reflected a 4.6 percent rise in assistance to US\$1.9 million under the O-HIPC Initiative. Contrary, the E-HIPC Initiative decline by 7.1 percent to US\$0.25 million at end-June 2023. Similarly, assistance under the Multilateral Debt Relief Initiative (MDRI) increased by 7 percent to US\$12 million at end-June 2023. Relief from the IADB, which accounted for 66.4 percent of total assistance, increased by 23.6 percent to US\$10 million while relief by the IDA decreased by 23.9 percent to US\$3 million.

Table XIX

E-HIPC	0.2	0.0	0.3
End-June 2022			
TOTAL	11.6	1.8	13.4
MDRI	9.7	1.6	11.2
Total HIPC	1.9	0.2	2.2
O-HIPC	1.7	0.2	1.9
E-HIPC	0.2	0.0	0.3

Debt Sustainability Analysis

Guyana's total debt stock as a percent of GDP stood to 26.4 percent at end-June 2023. The solvency indicators for both domestic and external debt, remained below the debt sustainability thresholds for middle income countries. Moreover, other liquidity indicators were lower than the pre-defined thresholds. Total debt service accounted for 1.5 percent of exports

and 7 percent of Central Government's current revenue. Overall debt remained at a manageable level, which implies greater fiscal space for taking on additional debt, to facilitate further development projects

Outlook for 2023

External debt service payments are expected to rise from higher debt service repayments to multilateral and bilateral creditors. External debt stock will increase due to disbursements from multilateral and bilateral creditors.

7. FINANCIAL SECTOR DEVELOPMENTS

Monetary aggregates of reserve money and broad money grew by 6.5 percent and 10.0 percent, respectively. The former was attributed mainly to an expansion in the net domestic assets of the Bank of Guyana while the latter reflected increases in net domestic credit and other items (net) which offset the decline in net foreign assets. Credit to both the public and private sectors rose by 410.1 percent and 5.0 percent, respectively. Commercial banks' interest rates trended downwards while the interest rate spreads remained relatively high. The financial resources of the Non-Bank Financial Institutions (NBFIs), which include depository and non-depository licensed financial institutions, grew by 9.5 percent or G\$41,933 million to G\$485,391 million due to a large increase in other local securities and other reserves of finance companies. The sector's share of total assets in the financial sector increased marginally from 35.3 percent to 36.3 percent at end-June 2023.

MONETARY DEVELOPMENTS

Reserve Money

Reserve or base money expanded by 6.5 percent to G\$361,701 million. This performance resulted from an increase in net domestic assets by 43.2 percent or G\$63,085 million while net foreign assets declined by 21.1 percent or G\$40,952 million.

The growth in reserve money reflected an 11.2 percent or G\$22,198 million increase in currency in circulation resulting from higher cash transactions during the review period. Liabilities to the commercial banks declined marginally to G\$140,847 million from G\$140,912 owing mainly to a 7.8 percent or G\$1,014 million contraction in currency in commercial banks' vaults while deposit liabilities increased by 0.7 percent or G\$948 million.

Table XX

	Reserve Money G\$ Million		
	Jun 2022	Dec 2022	Jun 2023

Non-bank Fin. Inst.	(57,804)	(56,426)	(53,347)
Net Foreign Assets	245,493	283,874	249,133
Other Items (Net) ¹	112,765	133,720	147,851

Notes:

1) Other items (net) includes commercial banks' undistributed profits and other assets of the Bank of Guyana.

Broad and Narrow Money Supply

Broad money (M2) increased by 10.0 percent, owing to higher net domestic credit and other items (net) which increased by G\$88,188 million and G\$14,131 million, respectively. Net foreign assets declined by 12.2 percent or G\$34,741 million.

Broad money growth reflected expansions in both narrow and quasi money by 10.8 percent and 8.9 percent, respectively. The increase in narrow money resulted from a 12.9 percent and 11.2 percent growth in demand deposits and currency in circulation, respectively, while there was a 52.0 percent decline in cashiers' cheques & acceptances. The growth in quasi

money was attributed to a 20.3 percent and 7.8 percent expansion in time and savings deposits, respectively.

Figure XI

COMMERCIAL BANKS DEPOSITS AND INVESTMENTS

Residents' deposits with commercial banks, comprising the private and public sectors as well as the non-bank financial institutions, amounted to G\$713,353 million, an increase of 6.8 percent from the end-December 2022 position.

Deposits

Private sector deposits, which accounted for 75.8 percent of total deposits, grew by 10.5 percent or G\$49,197 million at end-June 2023. Both business enterprises and individual customers' deposits were higher by 14.7 percent and 8.6 percent, respectively, to G\$171,732 million and G\$344,771 million, respectively.

Public sector deposits amounted to G\$110,254 million, 2.4 percent lower than the December 2022 position. This contraction was due to a 7.8 percent decline in the deposits of the public non-financial enterprises.

The deposits of the non-bank financial institutions decreased by 5.8 percent to G\$54,370 million

compared with a decline of 2.0 percent for the corresponding period last year.

Domestic Investments

Commercial banks’ gross investments amounted to G\$427,069 million or 50.0 percent of the banks’ total assets. Loans and advances, inclusive of the public sector loans, which accounted for 53.1 percent of the total domestic investments, increased by 4.0 percent to G\$226,851 million. Securities which accounted for the remaining 46.9 percent of the banks’ investment portfolio also rose by 10.4 percent to G\$200,218 million.

Holdings of government securities in the form of treasury bills and debentures increased by 12.7 percent to G\$196,511 million. Conversely, investments in other local private securities fell by 2.9 percent or G\$90 million to G\$3,031 million.

BANKING SYSTEM

Net Domestic Credit

Net domestic credit of the banking system increased by 34.5 percent to G\$343,889 million compared with a growth of 14.8 percent at the end of June 2022. This performance resulted from increases in both credit to the private and public sectors.

Net Position of the Public Sector

The public sector recorded a net credit of G\$51,911 million with the banking system compared to a net deposit of G\$16,741 million at end–December 2022. This resulted from a higher Central Government’s (net) credit owing to increased issuance of treasury bills for Central Government’s budgetary financing. At the end of June 2023, the Central Government’s (net) credit position increased by 70.2 percent to G\$187,005 million from G\$109,845 million. Public enterprises (net) deposits decreased by 10.3 percent to G\$70,702 million on account of lower deposits by Central Housing & Planning Authority (CHPA) and

Guyana Geology & Mines Commission (GGMC) at local commercial banks. Net deposits of the other category of the public sector, which includes local government and the National Insurance Scheme (NIS), rose by 34.9 percent to G\$64,391 million at end-June 2023.

Credit to the Private Sector

Private sector credit grew by 5.0 percent to G\$345,325 million due to expansions in credit to all sectors except the distribution and “other” category of the private sector. Credit to the mining sector expanded by 16.2 and resulted from increased credit to the “other mining”. Lending to the construction & engineering sector rose by 13.7. Loans to the other services sector were higher by 10.5 percent. Real estate mortgage loans and manufacturing loans grew by 7.3 percent and 4.7 percent, respectively. While loans to the agriculture sector grew by 3.6 percent mainly on account of growth in other farming. Lending to the distribution and the “other” category of the private sector, which comprises commercial banks investments in private securities, fell by 8.8 percent and 3.3 percent, respectively.

Figure XII

Figure XIII

Net Position of the Non-Bank Financial Institutions

The non-bank financial institutions' net deposits grew by 5.7 percent to G\$65,990 million compared with a decline of 2.2 percent for the corresponding period last year. This outturn stemmed mainly from a 9.3 percent or G\$4,719 million growth in the five dollar and save and prosper shares by the residents.

Net Foreign Assets

Net foreign assets of the banking system declined by 12.2 percent to US\$1,195 million at end-June 2023. This contraction resulted from a decrease in the net foreign assets of the Bank of Guyana while that of the commercial banks expanded. The net foreign assets of the Bank of Guyana fell by 21.1 percent to US\$732.5 million owing to a 21.1 percent or US\$196.4 million reduction in gross foreign assets to US\$736.0 million while foreign liabilities remained unchanged at US\$3.4 million. The net foreign assets of the commercial banks rose by 6.9 percent to US\$462.4 million on account of a 5.6 percent or US\$33.3 million increase in the gross foreign assets to US\$627.1 million despite the 2.2 percent or US\$3.5 million increase in foreign liabilities to US\$164.8 million.

Interest Rates and Spreads

The Bank rate was stable at 5.0 percent during the first six months of 2023. The yield on the 182-day treasury bill declined marginally to 0.99 percent from 1.00 percent while that of the 364-day bill remained unchanged at 1.09 percent. The weighted average time deposit rate of the banks declined to 0.93 percent from 0.95 percent while the weighted average lending rate fell by 25 basis points to 8.29 percent. The small savings and the prime lending rates remained unchanged at 0.81 percent and 8.38 percent, respectively.

Table XXII

Commercial Banks			
Selected Interest Rates and Spread			
All interest rates are in percent per annum			
	Jun	Dec	Jun
	2022	2022	2023
1. Small Savings Rate	0.81	0.81	0.81
2. Weighted Avg. Time Deposit Rate	0.89	0.94	0.93
3. Weighted Avg. Lending Rate	8.59	8.54	8.29
4. Prime Lending Rate	8.38	8.38	8.38
5. End of period 91-day Treasury Bill Discount Rate	1.54	1.54	1.54
Spreads			
<i>A (3-1)</i>	<i>7.78</i>	<i>7.73</i>	<i>7.48</i>
<i>B (4-1)</i>	<i>7.57</i>	<i>7.57</i>	<i>7.57</i>
<i>C (5-1)</i>	<i>0.73</i>	<i>0.73</i>	<i>0.73</i>
<i>D (3-2)</i>	<i>7.70</i>	<i>7.60</i>	<i>7.36</i>
<i>E (4-2)</i>	<i>7.49</i>	<i>7.43</i>	<i>7.44</i>

The commercial banks' spread between the prime lending rate and small savings rate as well as the spread between the 91-day treasury bill rate and the small savings rate remained unchanged at 7.57 percent and 0.73 percent, respectively. The spread between the weighted average time deposit rate and the weighted

average lending rate fell by 24 basis points to 7.36 percent.

Liquidity

Total liquid assets of the commercial banks amounted to G\$287,650 million or 5.7 percent above the end-December 2022 level. This position was due primarily to increase issuance of treasury bills. The ratio of excess liquid assets to required liquid assets was 82.8 percent compared with 146.4 percent for the corresponding period last year.

Total reserves deposited with the Bank of Guyana were G\$130,586 million, 1.4 percent lower than the level at end-December 2022. The required statutory reserves of the commercial banks was G\$84,315 million creating an excess over the minimum requirement of G\$46,271 million.

Outlook for 2023

The monetary aggregates of reserve money and broad money are expected to reflect growth in economic activities. The former is likely to result from growth in net foreign assets of the Bank of Guyana while the latter is expected to stem from increased net foreign assets and net domestic credit. Interest rates are expected to remain relatively stable in 2023 reflective of the adequate level of liquidity within the banking system.

NON-BANK FINANCIAL INSTITUTIONS

The financial resources of the Non-Bank Financial Institutions (NBFIs), which include depository and non-depository licensed financial institutions, grew by 9.5 percent or G\$41,933 million to G\$485,391 million due to a large increase in other local securities and other reserves of finance companies. The sector's share of total assets in the financial sector increased marginally from 35.3 percent to 36.3 percent at end-June 2023.

This performance resulted largely from increases in other liabilities and deposits. Other liabilities which mainly comprises capital & reserves, expanded by 17.6 percent or G\$36,803 million to G\$246,202 million, primarily as a result of a 17.9 percent or G\$29,756 million increase in other reserves by insurance companies and finance companies. Likewise, deposits increased by 5.7 percent or G\$3,568 million to G\$65,990 resulting from a 7.7 percent or G\$748 million increase in residents' shares. Foreign liabilities also increased by 1.9 percent to G\$50,515 million. Similarly, insurance premiums and pension funds saw an increase of 1.6 percent and 0.5 percent, respectively.

Table XXIII

NON-BANK FINANCIAL INSTITUTIONS

Non-Residents	46,817	48,195	47,145
Other Assets	44,929	44,880	49,189

Private sector investments, which represented 68.3 percent of total assets, grew by 14.1 percent or G\$40,891 million to G\$331,646 million primarily as a result of increased investments by finance companies in other local securities. Other assets increased by 9.6 percent or G\$4,309 million to G\$49,189 million. Claims on the public sector fell by 6.7 percent or

G\$691 million to G\$9,690 million. Additionally, claims on the banking system and the non-resident sector decreased by 3.1 percent or G\$1,525 million and 2.2 percent or G\$1,051 million, respectively at end-June 2023.

The New Building Society

Total resources of the New Building Society (NBS), which accounted for 17.7 percent of total assets of the NBFIs, increased by 4.6 percent or G\$3,758 million to G\$85,987 million. This expansion was due mainly to the 5.5 percent increase in share deposits alongside the 4.9 percent growth in foreign liabilities. Other deposits and other liabilities also increased by 4.0 percent and 2.1 percent, respectively at end-June 2023.

Table XXIV

Non-Residents	-	-	-
Other Assets	2,784	2,893	2,768

Funds mobilized by the NBS were mainly invested within the private sector which grew by 16.4 percent to G\$58,240 million. Investments in the form of loans and advances given to individuals increased by 28.4 percent or G\$12,882 million at end-June 2023. Claims on the banking system and the public sector decreased

by 16.2 percent or G\$3,344 million and 11.4 percent or G\$992 million, respectively. Acquisition of other assets also decreased by 4.3 percent or G\$125 million. There were no claims on the non-resident sector for the period in review.

Trust Companies

The resources of the trust companies, which comprises Hand-in-Hand Trust Corporation Incorporated and Trust Company Guyana Limited, increased by 7.1 percent or G\$993 million to G\$15,033 million and accounted for 3.1 percent of total assets of the NBFIs. This performance was due to the 7.6 percent or G\$665 million expansion in deposits and a 6.8 percent or G\$341 million growth in other liabilities.

Claims on the banking system increased by 22.7 percent to G\$1,742 million. Claims on the non-resident sector increased by 11.1 percent to G\$2,651 million. While, claims on the private sector, which accounted for 67.06 percent of total assets of the NBFIs, increased by 4.3 percent to G\$10,081 million. Mortgages accounted for 96.7 percent of private sector investments. The two companies' holdings of other loans and advances, which include agricultural and personal loans, accounted for 48.2 percent of total loans and advances. Acquisition of other assets decreased by 1.3 percent or G\$8 million to G\$560 million. There were no claims on the public sector for the period ending June 2023.

Finance Companies

The resources of the finance companies, which include microfinance companies: Institute of Private Enterprise Development (IPED) and Small Business Development Trust (SBTD), grew significantly by 43.9 percent to G\$101,703 million. This performance was mainly due to the large increase in other local securities and other reserves by 56.6 percent or G\$31,008 million and 59.7 percent or G\$30,781 million, respectively, at end-June 2023. This accounted for 21.0 percent of total assets of the NBFIs. The resources were mobilized primarily in the form of other liabilities and retained earnings. Other liabilities, inclusive of capital & reserves grew by 55.0 percent or G\$29,844 million while retained earnings increased by 10.1 percent or G\$1,465 million. Loans received decreased by 48.3 percent or G\$869 million. Foreign liabilities experienced change of G\$609 million within the finance component (Secure International finance Company Inc.) as a result of foreign-funded loans from its parent company, subsidiaries & affiliates at end-June 2023.

Claims on the private sector, which represented 88.88 percent of finance companies' total assets, increased by 51.4 percent or G\$30,692 million. Acquisition of other assets increased by 7.9 percent or G\$626 million. Claims on the banking system and investments in the foreign sector declined by 43.2 percent to G\$173 million and 6.4 percent to G\$2,577 million, respectively.

Notes:

(1) Finance Companies consist of: one stock broker (Beharry Stock Brokers Limited), one investment company (Secure International Finance Company Incorporated), one merchant bank (Guyana Americas Merchant Bank Inc.) and two micro-finance institutions (Institute of Private Enterprise Development and Small Business Development Trust).

Asset Management Companies

The resources of the asset management companies, which comprises Guyana Co-operative Financial Service (GCFS) and Guyana National Co-operative Bank (GNCB), grew by 0.9 percent or G\$188 million and represented 4.5 percent of total assets of the NBFIs. Provision for loan, which represented 54.1 percent of total liabilities, grew by 1.7 percent to G\$11,770 million.

Interest receivable increased by 1.7 percent and accounted for 54.1 percent of total assets. Claims on the private sector and the acquisition of other assets remained unchanged at G\$7,476 million and G\$2,340 million, respectively. Deposits with local commercial banks decreased by 3.4 percent to G\$157 million at end June-2023. There were no claims on the public sector.

Pension Schemes

The consolidated resources of the pension schemes increased by 0.6 percent to G\$117,739 million and represented 24.3 percent of total assets of the NBFIs. This increase was owing to growth in other liabilities and pension fund contributions by 16.9 percent and 0.5 percent, respectively, at end-June 2023.

Acquisition of other assets and claims on the public sector saw an increase of 12.7 percent or G\$236 million and 12.7 percent or G\$206 million, respectively. The investments in the public sector

resulted as an increase of securities in the form of treasury bills by 27.2 percent or G\$388 million. Investments in the private sector, which accounted for 70.9 percent of total assets, decreased marginally by 0.2 percent to G\$83,530 million at end June-2023. This resulted due to a decline of 11.5 percent or G\$10,393 million in other local securities within the private sector during the review period. Claims on the banking system increased by 0.6 percent or G\$53 million at end-June 2023.

Domestic Insurance Companies ²

The total resources of the domestic insurance companies (life and non-life segments) increased by 3.8 percent to G\$143,185 million and represented 29.5 percent of the total assets of the NBFIs. The life component, which accounted for 69.3 percent of the industry's resources, decreased by 5.8 percent or G\$6,109 million, likewise, the non-life component, which accounted for 30.7 percent of the industry's

² The data reported here represents unaudited figures from nine (9) insurance companies while that under the Insurance Sector Review represents audited figures from sixteen (16) companies.

resources, also decreased by 2.2 percent or G\$1,008 million.

Total insurance premiums increased marginally by 1.6 percent or G\$98 million to G\$6,363 million. Local life premiums, which accounted for 43.2 percent of total premiums, increased by G\$28.1 million due to a growth in sales of life insurance policies. Non-resident premiums decreased by G\$40.1 million and accounted for 58.6 percent and 23.4 percent of life insurance fund and life insurance foreign liabilities, respectively.

Total public sector investments increased from G\$96 million to G\$181 million as a result of an 80.6 percent or G\$120.6 million increase in other local government securities. Investments in other assets grew by 18.9 percent to G\$21,249 million, while claims on the banking system increased by 8.9 percent to G\$19,440 million. Private sector investments increased by 2.1 percent to G\$81,927million. Total loans & advances, which constituted 67.0 percent of total private sector investments, increased by 5.2 percent or G\$236 million. Conversely, the non-resident sector decreased by 6.9 percent or G\$1,511 million to G\$20,388 million at end June-2023.

Interest Rates

The interest rate structure of the NBFIs remained mainly unchanged for the first half of 2023. The small savings rate of the NBS was 1.4 percent while the rates of the five dollar shares and save & prosper shares were 1.5 percent and 2.75 percent, respectively. During the third quarter, end-September 2022, the low-income mortgage rate and the average ordinary mortgage rate changed to 3.5 percent and 4.73 percent, respectively. The interest rates offered by Hand-in-Hand Trust on domestic and commercial mortgages were 10.0 percent and 13.0 percent respectively while the average deposit rate remained unchanged at 1.51 percent at end-June 2023.

II

FINANCIAL STABILITY ASSESSMENT

1. SUMMARY

The Licensed Depository Financial Institutions (LDFIs) Capital Adequacy Ratio (CAR) remained well above the prudential benchmark of 8.0 percent, at 20.6 percent which was below the end-June 2022 level but above the end-December 2022 levels. The stock of non-performing loans (NPLs) improved when compared to the end-June 2022 and end-December 2022 levels. The LDFIs' ratio of reserve against NPLs moved to 65.0 percent, 6 percentage points and 7 percentage points above the end-June 2022 and end-December 2022 levels respectively.

The stress tests performed were aimed at determining the quantitative measures of vulnerability of LDFIs capital to hypothetical shocks under various scenarios in areas of investments, credit, foreign currency exposure, and liquidity. The results indicated that the industry's and individual institutions' shock absorptive capacities remained adequate under the various scenarios for foreign currency and liquidity. However, vulnerabilities were observed in the investment and credit portfolios.

The macroprudential analytic tools were used to identify and measure systemic risk where an event that will trigger a loss of economic value or confidence in a substantial portion of the financial system resulting in adverse nation-wide and region-wide effects. At end-June 2023, there was no amplification in the level of systemic risk and no need for immediate policy actions.

The insurance sector, which comprises long-term insurance and general insurance, recorded assets of G\$195,996 million, an increase of 23.8 percent (G\$37,672 million) from the previous year. The sector accounted for 10.1 percent of total financial assets and 40.4 percent of non-bank assets as at end-June 2023. The sector was adequately capitalised as both the long term and general insurance sectors' assets exceeded their respective solvency requirements in keeping with the Insurance Act 2016. The long-term and general insurance sectors' assets exceeded liabilities by 293.8 percent (G\$98,738 million) and 364.4 percent (G\$47,188 million), respectively. The insurance sector's assets accounted for 5.8 percent of the country's GDP. The sector acts as a conduit for households and firms to transfer risks to entities that are better suited to handle them. In this way projects can be undertaken that might not be otherwise possible, and this contributes to the growth and financial stability of the economy.

The average per capita spending on insurance increased by 9.8 percent to G\$12.3 million, which indicated that there has been an increase in the density of the insurance products in the market. The sector's penetration into the domestic market fell marginally from the prior year (0.5 percent) as its total gross written premium represents 0.3 percent of the economy's GDP. Reinsurance for the long-term insurance sector increased by 14.4 percent (G\$36.9 million) to G\$292.6 million which indicated that more risks were being transferred to reinsurers in comparison to total gross premiums written. Reinsurance for the general insurance sector increased by 17.6 percent (G\$275.5 million) to G\$6,454 million. Potential risks the industry was exposed to, were prudently managed resulting in no adverse effect despite the volatility of the global financial conditions.

The assets of the private pension sector decreased by G\$9,143 million or 7.2 percent to G\$117,864 million from June 2022 due to a reduction in the market value of equity shares. This accounted for approximately 6.1 percent of the total financial sector's assets and 24.3 percent of NBFIs. The decline in assets may be attributed to a decrease in the fair value of equity investments.

The two major pension plans of Defined Benefit (DB) and Defined Contribution (DC) remained relatively stable. DB plans were sensitive to market risk, mainly because of the composition of their investment portfolios – large proportions were held in capital-uncertain assets: predominantly equities and real estate. Likewise, DC plans were vulnerable to the Deposit Administration Contracts (DACs) offered by the life insurance companies. Further, while investments in foreign assets were below the regulatory threshold, the unavailability of suitable diversifiable local investments also exposed pension funds to market risk. Regardless, the sector's exposure to credit risk remained insignificant.

The sector continued to have high liquidity levels that far surpassed the long-term nature of pension liabilities. Liquid assets (1 year and under maturity) totalled G\$16,365 million and accounted for 13.9 percent of total pension assets. Moreover, liquid assets were approximately 31 times greater than estimated pension payments for the coming quarter. Notwithstanding, the private pension sector maintained a more than sufficient funding level with an average of 304.5 percent.

The conduct of monetary policy remained focused on price stability, ensuring an adequate level of liquidity in the banking system and creating an enabling environment for credit and economic growth. The Bank of Guyana utilised the issuance of treasury bills and foreign exchange intervention as the variable tools of monetary policy, while the discount rate was unchanged at 5.0 percent. At the end of June 2023, there was no redemption in government treasury bills issued for monetary purpose, while the Bank transacted net-purchases in foreign currencies of US\$4.0 million.

Financial and monetary stability as well as financial system efficiency continued to be undertaken in a number of the Bank's operations. The Bank facilitated efficient intermediation through the issuance of notes and coins as well as promotion of an enhanced payment system operation. During the first half of 2023, the Bank's role within Guyana's Payments System infrastructure has been on implementing the legal and regulatory framework, establishing and improving payment infrastructures, encouraging innovation and promoting awareness of digital payments. In addition the Bank continued to be the custodian of the nation's foreign reserves while also managing the Natural Resource Fund (NRF) as mandated in an operational agreement between the Bank and the Ministry of Finance. Additionally, Bank of Guyana continued to maintain the Depository Insurance Corporation (DIC) and Deposit Insurance Fund with the objective of fostering financial stability by protecting depositors and assist in resolution financing. For the review period, the Bank achieved a net profit of G\$1,544 million against a budgeted profit of G\$660 million, resulting from the Bank's income being substantially higher than budgeted while containing expenses.

According to the IMF's World Economic Outlook, the global economy is estimated to grow by 3.0 percent in 2023, down from 3.5 percent recorded in 2022; remaining well below the historical (2000-19) annual average of 3.8 percent. Advanced economies continue to drive this decline in growth largely due to weaker manufacturing, and slower credit growth, offsetting stronger services activities. Moreover, global inflation is projected to decline from 8.7 percent last year to 6.8 percent this year.

2. MICROPRUDENTIAL REVIEW

The Licensed Depository Financial Institutions (LDFIs) Capital Adequacy Ratio (CAR) which remained above the prudential benchmark of 8.0 percent, at 20.6 percent was above the end-December 2022 but marginally below the end-June 2022 levels. The stock of non-performing loans improved when compared to end-December 2022 and end-June 2022 levels. The LDFIs ratio of reserve against NPLs rose to 65.0 percent, 6 percentage points and 7 percentage points above end-June and end-December 2022 respectively. The increase from end-June 2022 resulted from a 30.8 percent decrease in NPLs despite a 23.7 percent contraction in reserve for loan losses.

CAPITAL ADEQUACY PROFILES

Composition of Capital

The Bank commenced using the Basel II/III Supervisory Framework to assess the adequacy of LDFIs capital from January 2022. The Basel II/III framework requires LDFIs to hold capital against market risk and operational risk in addition to credit risk, compared to the Basel I framework which required capital for credit risk only.

The Capital Adequacy Ratio (CAR) for the LDFIs was 20.6 percent at end-June 2023, 4.8 percentage points above the end-December 2022 ratio and 0.4 percentage points below the end-June 2022 ratio. The Tier I ratio was greater than end-December 2022 and the corresponding period of the previous year by 4.7 percentage points and 0.2 percentage points respectively.

Qualifying capital increased by 27.7 percent above the end-December 2022, while Tier I capital increased by 25.8 percent due to an increase in Tier I capital by 25.8 percent. When compared to end-June 2022, total qualifying capital grew 8.0 percent, on account of a 10.9 percent growth in Tier 1 capital.

Table XXX

Licensed Depository Financial Institutions (LDFIs) Capital Adequacy Profiles G\$ Million			
	Jun 2022	Dec 2022	Jun 2023
Total Qualifying Capital	104,765	66,616	113,135
Total Tier I capital (Net)	103,453	91,200	114,694
Risk-weighted Assets (Net)	499,200	561,558	548,852
	Percent		
Average CAR	21.0	15.5	20.6
Tier I ratio	20.7	16.2	20.9

Risk-weighted Assets

The aggregate net risk-weighted assets of the LDFIs at end-June 2023 was 2.3 percent below and 9.9 percent above the end-December 2022 and end-June 2022 respective levels. The decrease from end-December 2022, reflected respective contractions in operational risk weighted assets by 26.1 percent and credit risk weighted assets by 2.7 percent. The growth over the corresponding period in the previous year was due to the increased exposure of assets to market and operational risk by 129.1 percent and 59.1 percent respectively.

ASSET QUALITY

The LDFIs' NPLs at end-June 2023, of G\$15.5 billion represented a 30.8 percent (G\$6.9 billion) improvement when compared with end-June 2022, and accounted for 3.7 percent of total loans. The improvement in NPLs from the June 2022, level was attributed to decreases by seven of the LDFIs ranging from 23.6 percent to 100 percent. Compared with end-December 2022, NPLs as a percentage of total loans stood 1.4 percentage points lower as a result of a 23.2 percent decrease in NPLs and a 6.8 percent expansion in total loans.

Sectoral Non-Performing Loans

On a sectoral basis, NPLs in the business enterprises sector and the household sector reduced by 39.1 percent and 20.4 percent respectively, when compared with the first half of 2022. All of the sub-sectors within the business enterprises sector recorded decreases as follows: agriculture by 49.0 percent; services by 39.8 percent; manufacture by 39.5 percent; and mining & quarrying by 19.8 percent.

When compared with the end-December 2022 levels, the agriculture, manufacture, services and mining & quarrying sub-sectors recorded improvement in NPLs of 38.3 percent, 32.5 percent, 26.0 percent and 18.2 percent respectively.

NPLs in the households sector recorded a 17.0 percent decline compared with end-December 2022.

NPLs in the services sub-sector represented 24.0 percent of the LDFIs' aggregate NPLs, with the distribution (wholesale and retail trade) category accounting for 54.2 percent of that sub-sector's NPLs. The construction & engineering category represented 36.4 percent of the manufacture sub-sector's NPLs, while the sugar cane category was 45.0 percent of NPLs in the agriculture sub-sector. The gold category had the highest concentration at 90.8 percent of the mining and quarrying sub-sectors NPLs.

Table XXXI

Licensed Depository Financial Institutions (LDFIs) Sectoral Distribution of Non-Performing Loans			
G\$ Million			
	Jun	Dec	Jun
	2022	2022	2023
Economic Sector			
Business Enterprises	12,398	10,593	7,547
Agriculture	1,183	979	604
Mining & Quarrying	885	868	710
Manufacturing	4,147	3,715	2,509
Services	6,183	5,031	3,724
Households	9,987	9,573	7,946
Total	22,385	20,166	15,493

The 20.4 percent (G\$2 billion) improvement of NPLs in the households sector from end-June 2022 resulted mainly from decreases in the housing category by 19.0 percent (G\$1.6 billion).

Reserve for loan losses

The ratio of reserve for loan losses to NPLs at end-June 2023, was 65.0 percent, up 6 percentage points and 7 percentage points from end-June 2022 and end-December 2022 respectively. The increase from end-June 2022 resulted from the 30.8 percent decrease in NPLs despite reserve for loan losses contracting by 23.7 percent from end-June 2022.

Risk Assessment

The overall assessment of the banks' credit risk was 'moderate and decreasing'. Three banks were assessed as having decreasing credit risk; two as increasing; and one as stable. The two non-banks credit risk were rated as 'high and decreasing'.

Loan Concentration

The top twenty borrowers' exposures amounted to G\$104.2 billion at end-June 2023, 16.5 percent above the G\$89.4 billion reported at end-June 2022. This expansion was due to the increases recorded by four of the eight LDFIs' ranging from 34.8 percent to 120.2 percent. Loans and overdrafts and bonds/securities/debentures represented 85.3 percent and 13.2 percent of the top twenty borrowers' exposures, compared with 77.4 percent and 21.2 percent respectively at end-June 2022. The largest exposure (excluding treasury bills) was to the Guyana Shore Base Group, which accounted for 13.0 percent of the industry's aggregate top twenty exposures.

Loans to Related Parties

As at June 30, 2023, Loans to related parties expanded by 9.6 percent from the end-June 2022 level. Three LDFIs were responsible for this increase, ranging from 18.2 percent to 46.9 percent. The ratio of such loans to total loans was 4.5 percent, 0.2 percentage points lower when compared to end-June 2022.

Risk Assessment

The LDFIs' concentration risk was assessed as *'moderate and stable'*. The industry's top twenty borrowers to total loans ratio was 24.7 percent at end-June 2023. All of the top twenty borrowers' facilities were performing.

Earnings

Income

The LDFIs aggregate operating income amounted to G\$27.5 billion as at June 30, 2023, 25.1 percent above the end-June 30, 2022 level. Respective increases were observed in all sources of income. Foreign exchange gains increased by 29.4 percent, fees & commission by 24.7 percent, interest income by 24.4 percent and other operating income by 18.5 percent.

Table XXXII

Profitability Ratios - Percent (%)			
Return on Assets (ROA)	0.81	1.03	1.02
Return on Equity (ROE)	5.13	7.20	7.46

Expenses

LDFIs aggregate operating expenses amounted to G\$14.6 billion, 26.3 percent above the end-June 2022 level. LDFIs made 3.1 percent more provisions for loan losses compared with June 2022, while bad debts written off (net of recoveries) amounted to G\$675 million. Interest expense reflected an increase of 24 percent, while salaries & other staff cost and other operating expenses increased by 18.9 percent and 12.6 percent respectively.

Net income and profitability ratios

LDFIs net income before tax was 23 percent above the end-June 2022 level at G\$12.8 billion, while after tax

profits of G\$9.1 billion was 17 percent (G\$1.3 billion) over the end-June 2022 level.

ROA was 10 basis points below end-June 30, 2022 while ROE grew 26 basis points over the same period.

Risk Assessment

The overall risk to earnings was assessed as ‘*moderate and stable*’.

LIQUIDITY

The financial sector remained highly liquid at the end of the first half of 2023, with individual LDFIs excess liquid assets ranging between less than one percent and 313 percent. The average liquid assets held at end-June 2023 exceeded the statutory liquid assets requirement by 55.1 percent (G\$90.7 billion), compared with 132.5 percent (G\$147.5 billion) at end-June 2022.

The average level of liquid assets held by LDFIs at end-June 2023 amounted to G\$255.5 billion, 1.3 percent (G\$3.3 billion) below the average level recorded for the June 2022 period. This contraction resulted mainly from declines in marketable obligations of public sector of 39.8 percent (G\$17.5 billion), net due from head office and branch of 65.8 percent (G\$11.4 billion), net due from banks abroad of 26.5 percent (G\$8.1 billion), and net due from LDFIs in Guyana of 21.7 percent (G\$5.4 billion). On the other hand deposits with Bank of Guyana rose by 38.7 percent (G\$35.4 billion) while holdings of local treasury bills increased by 6.1 percent (G\$2.3 billion).

The average liquid asset ratio (LAR) recorded a 190 basis points fall from the end-June 2022 position to

reach 27.1 percent. The ratio of customer deposits to total (non-interbank) loans ratio, increased by 5.7 percentage points to 191.9 percent at end-June 2023.

Table XXXIII

Licensed Depository Financial Institutions (LDFIs)			
Liquidity Indicators			
G\$ Million			
January - June			
	2021	2022	2023

Endnote: This section examines the stability and soundness of the financial system. In particular, it analyses the performance of the following Licensed Depository Financial Institutions (LDFIs) as at end-June 2022: Republic Bank (Guyana) Limited (RBGL); Guyana Bank for Trade & Industry Limited (GBTI); Demerara Bank Limited (DBL); Citizens Bank (Guyana) Incorporated (CBI); Bank of Baroda (Guyana) Incorporated (BOB); Bank of Nova Scotia (BNS); Hand in Hand Trust Corporation Incorporated (HHT) and New Building Society (NBS).

Risk Assessment

The Liquidity risk for four LDFIs were assessed as ‘*moderate and increasing*’, while the other four were assessed as ‘*moderate and stable*’. □

3. STRESS TESTING

Stress tests performed were aimed at determining the quantitative measures of vulnerability of LDFIs' capital to hypothetical shocks under various scenarios in areas of investments, credit, foreign currency exposure, and liquidity. The results indicated that the industry's and individual institutions' shock absorptive capacities remained adequate under the various scenarios for foreign currency and liquidity. However, vulnerabilities were observed in the investment and credit portfolios.

a) INVESTMENTS

The investment stress test estimates the impact on LDFIs' capital when their investment portfolios were assumed to suffer three levels of shocks as follows:

- **Level 1** – the investment portfolio will assume provisioning requirements on each investment based on credit ratings,
- **Level 2** – the credit rating of each investment will be downgraded by one provisioning level for sovereign securities only, corporate securities only, and both sovereign and corporate securities simultaneously and assessed in two areas (the Caribbean and unspecified countries) and,
- **Level 3** – a further provisioning of 20 percent will be estimated on speculative graded investments.

The results revealed a resilient industry and banking sector, with an 8.5 percentage points decline from the banking sector's initial CAR was recorded under the Level 3 shock on the entire foreign investment portfolio. However, two institutions (banks) displayed significant vulnerability to the shocks.

b) CREDIT

The credit stress test measures the impact on banks' provisioning requirements and capital by economic sectors and the default of largest borrowers of each institution (large exposure).

SECTORAL STRESS TEST

The banking sector's and individual banks' shock absorptive capacity was adequate to withstand the 20 percent shock on the sectoral stress test, requiring an estimated 75.8 percent deterioration of the total portfolio to reduce the industry's CAR to the prudential minimum.

LARGE EXPOSURE STRESS TEST

This test assessed the largest borrowers under three default levels:

- **Level 1** – the top borrower of each institution,
- **Level 2** – the top 3 borrowers of each institution and,
- **Level 3** – the top 5 borrowers of each institution.

The banking sector failed the Level 2 shock while the industry passed all three levels of stress on the top 20 largest exposures. However, six (6) institutions failed at the Level 3 shock.

c) FOREIGN CURRENCY

The foreign currency stress test estimates the impact on the banks' capital of a depreciation or appreciation of the Guyana dollar (G\$) against the four major trading currencies (US\$, EURO, GBP & CAN), as well as all other foreign currencies in which the banks have assets and liabilities.

The industry remains significantly resilient to exchange rate changes, requiring a 134 percent appreciation (50.1pp above December 2022) of the Guyana dollar to reduce CAR to the prudential minimum. However, only two banks showed vulnerability to this extreme shock.

d) LIQUIDITY

The liquidity stress test sought to determine the number of days an institution can withstand a deposit run before exhausting its liquid assets given no infusions of liquidity from external sources.

The respective run-off rates and percentage of liquidity drawn from 'other assets' are standardized to reflect three scenarios: 5/5, 3/7 and 0/10.

Across all three scenarios the industry on average, would withstand a run on total deposits for three days (compared to four days as at December 2022). However, when only demand deposits were assessed, the industry on average of the three scenarios, endured thirteen (13) days. When savings and time deposits were assessed, the industry endured on average eight (8) days.

4. MACROPRUDENTIAL REVIEW

Macroprudential analytic tools were used to identify and measure systemic risk where an event that will trigger a loss of economic value or confidence in a substantial portion of the financial system resulting in adverse nation-wide and region-wide effects. At end-June 2023, there was no amplification in the level of systemic risk and no need for immediate policy actions.

Tools currently used to measure systemic risks include:

1. Micro-prudential Index
2. Absorption Ratio
3. Banking Stability Index
4. Macro-financial 'Signals' Index
5. Credit to GDP Gap
6. Composite Indicator for Systemic Stress (CISS)
7. Aggregate Financial Stability Index (AFSI)
8. Financial Stability Cobweb

1. Micro-prudential Index (Guyana's Banking Sector)

The Micro-prudential Index (MiPI) continued to exhibit relative stability in the banking sector. Compared to the tranquil period, the index over the last fourteen quarters (Mar 2020 to Jun 2023) ranged between 20 and 40 points. At end-June 2023, the index signalled 20 points compared to 21 points at end-June 2022 (see Figure XIV). Nine (9) indicators signalled stable risk levels while three (3) signalled decreased risk levels and two (2) signalled increased risk levels when compared with end-June 2022.

Particularly, one each of the liquidity, asset quality and earnings & profitability indicators signalled subdued risk while one liquidity and one asset quality indicator signalled a slight uptick in risk.

Figure XIV

Note: The MPI is a signal-based index computed using scores for indicators based on the number of standard deviations of each indicator from the 'tranquil period' mean value. The higher the aggregate score, the more severe the signal of financial vulnerability.

At end-June 2023, improved asset quality indicators significantly contributed to the overall subdued risk level. Increased write-off of bad debts, coupled with higher provisions for non-performing loans saw improved asset quality indicators. Commercial banks earnings & profitability indicators also showed improvements. While ROA & ROE signalled constant low risk levels, earning assets to average total assets signalled lower risk level at end-June 2023, relative the corresponding period 2022 (see Figure XV).

Notwithstanding, the ratio of reserves for loan losses to non-performing loans continued to signal high risk in the MiPI on account of the revised Supervision Guideline No. 5 which now requires 100 percent provisions for loss loans three years and older.

Figure XV

Additionally, commercial banks liquidity ratios showed mixed signals as the deposits to gross assets ratio showed a significant reduction in risk level while the liquid assets to total demand and time liabilities reflected a slight increase in risk. However, the overall liquidity risk level was lower than the corresponding 2022 period.

In relation to capital indicators, the MiPI reflected a stable risk level relative to the end-June 2022 level, despite slightly lower capital ratios levels.

Table XXXIV

	Asset Quality Ratios Guyana's Banking Sector				
	Jun 2022	Sep 2022	Dec 2022	Mar 2023	Jun 2023
Risk Ratios					
RLL/NPLs	65.83	65.72	66.91	68.25	74.40
NPLs/GL	5.64	5.19	4.69	4.27	3.38
NPLs/C&R	18.65	17.25	15.81	14.12	11.66
ROE	4.44	5.39	4.08	4.08	4.50
ROA	0.57	0.70	0.52	0.51	0.56

2. Absorption Ratio

The value of the 'standardised shift' in the Absorption Ratio (SAR) measures the degree of linkage of asset returns across the banking portfolios as reflected in their return on assets (ROA). This quarter the SAR of negative 0.4 represents a continuous decoupling in the

asset portfolios of commercial banks when compared to the end-December 2022 position of negative 0.5.

However, when compared with the end-June 2022 ratio of 0.3, which showed a higher degree of commonality of commercial banks assets, the SAR signalled a lower risk to contagion at end-June 2023.

Figure XVI

3. Banking Stability Index

The Banking Stability Index (BSI) stood at 0.63 percent at end-June 2023, compared to 0.92 percent at end-June 2022. The downward movement in the BSI was driven primarily by weaker liquidity, foreign exchange and capital adequacy indicators.

Figure XVII

Table XXXV

Weighted Components of the Banking Stability Index			
	Jun 2022	Dec 2022	Jun 2023
BSI	0.92	0.90	0.63
Capital Adequacy	(0.04)	(0.08)	(0.07)
Asset Quality	0.68	0.77	0.07
Profitability	0.04	0.07	0.07
Liquidity	0.05	0.09	(0.28)
Interest Rate Risk	0.17	0.16	0.17
Foreign Exchange Risk	0.02	0.02	(0.03)

However, the worsening in the liquidity, foreign exchange and capital adequacy were partly offset by improvements in asset quality, and profitability indicators. The banking sector’s asset quality indicator improved 0.77 percent from 0.68 percent at end-June 2022. The slight improvement in asset quality was due to a 2.26 percent improvement in non-performing loans (NPLs) to total loans at end-June 2023, over the corresponding period in 2022, while reserve for loan loss to NPLs stood at 74.40 percent, 8.57 percent above the same period.

Further, the banking sector showed a higher degree of profitability due to a marginal increase in return on equity by 6 basis points when compared to end-June 2022.

4. Macro-Financial ‘Signal’ Index

The Early Warning Index (EWI) recorded a score of 44 points in the second quarter of 2023, 5 points above the end-December 2022, level and 10 points above the end-June 2022 level, signalling heightened ‘medium’ risk exposure. Relative to the end-December 2022 level, three indicators (the 12-month growth in stock market capitalisation, volatility in inflation and the Guyana/US T-bill rate differential), signalled increased risk levels.

Figure XVIII

Likewise, when compared to the end-June 2022 level, three indicators (the central government balance to GDP ratio, volatility in inflation, and the Guyana/US T-bill rate differential), also signalled increased risk levels.

On the other hand, the current account balance to GDP ratio and the lending rate minus deposit rate indicated reduced vulnerability.

Relative to its tranquil period, the EWI signalled heightened risk at end-June 2023, largely on account of spill-over effects to Guyana’s economy from an already weakened global economy, stemming from persistent inflation, coupled with policy tightening and reduced global investment. Nevertheless, private sector credit continues to expand and net foreign assets to total assets are expected to increase while the interest rate spread is expected to remain stable.

Box 1

Macro-Financial ‘Signal’ Index

The Macro-financial Early Warning Index (EWI) is constructed to reflect the influences of the financial sector, real sector, private sector, public sector, and the external sector on the banking system’s soundness. As such, the framework shows the potential impact of the macroeconomic environment on commercial banks’ fragility. It is based on the performance of a basket of key macroeconomic and financial indicators, each scored by severity levels ranging from 0 point (no or minimal amount of risk) to 5 points (most severe). An increase in this index indicates an elevation in the overall level of risk in the system, while a fall demonstrates declined vulnerability of systemic threats.

While the EWI currently signals a ‘medium’ risk level, suppression of some pivotal indicators are likely to occur in the near term. Therefore, ongoing surveillance, risk-assessments, and prudent policies are needed to prevent any worsening of risk indicators.

5. Credit to GDP Gap³

As at end-June 2023, the Credit to GDP Gap (non-oil real GDP at constant base prices) stood at negative 2 percentage points (pp), indicating the credit to GDP ratio was below its long-run trend. The private sector credit to GDP gap was negative 3 pp while the public sector credit to GDP gap stood at 0.2 pp, signifying no heightened risks from rapid credit growth as the gaps are close to zero.

The commercial banking sector credit grew by 12.6 percent year-on-year and 5.4 percent from end-December 2022. Private sector credit of G\$342 billion was a major contributor to total credit growth, recording an increase of 11.9 percent from the

³ The credit to GDP gap captures the build-up of credit relative to the long run. It is used as an early warning indicator of financial stress or crisis. The gap is measured by the difference between the

previous year and 5.1 percent from December 2022. The year-on-year increase in private sector credit was supported by increases in all three subcomponents: business credit of G\$181 billion represented an increase of 12.8 percent; real estate mortgage loans of G\$113 billion represented an increase of 14.2 percent; and household credit of G\$49 billion represented an increase of 4 percent.

Figure XIX

The credit to the public sector of G\$2.9 billion increased by 77.9 percent from the corresponding period in 2022 and by 201.1 percent over the end-December 2022 quarter. The banking sector ratio of non-performing loans to total loans declined over the review period to 3.4 percent at end-June 2023, resulting from an 8.8 percent reduction in NPLs from end-June 2022.

6. Composite Indicator for Systemic Stress (CISS)

The Composite Indicator of Systemic Stress (CISS) captures the potential stress in the banking system by assessing the vulnerabilities arising from the correlation of individual stress levels in Guyana’s four

credit to GDP ratio and the ratio’s long term trend. The trend is computed using the one-sided Hodrick-Prescott filter.

key markets (housing, credit, money and foreign exchange).

The CISS remained relatively stable with a slight uptick in the composite stress level at end-June 2023, compared to the end-December 2022. However, relative to the corresponding 2022 period, the CISS signalled the same level of stress. Three of the four markets signalled heightened stress levels relative to the end-June 2022 and end-December 2022 levels respectively.

Figure XX

Commercial banks total credit expanded 12.6 percent (G\$37.8 billion) over the end-June 2022 level, signalling continued confidence in the economy. Consequently, the credit gap increased 49.7 percent over the end-June 2022 level. On the other hand, commercial banks NPLs was G\$5.8 billion below the end-June 2022 level, resulting in a less risky increase in the stress level in the credit market at end-June 2023.

Figure XXI

Loans for housing (mortgage loans) expanded 14 percent (G\$20.4 billion) over the end-June 2022, increasing the loan gap above its long-run trend to G\$8.1 billion. On the other hand, housing NPLs were 19 percent, (G\$1.6 billion) below the end-June 2022, resulting in a housing NPLs gap below its long-run trend at end-June 2023 level. Consequently, the continued expansion in housing showed no adverse effect on the overall housing market.

Figure XXII

The relative stability in the foreign exchange market saw a slight repress in the market's stress levels below the June 2022 level. Total supply of foreign currency was sufficient to meet demand as the regulatory maximum three dollars (G\$3.00) spread of the US to G\$ buying & selling rate continued to be the catalyst

to the relative stability in the foreign exchange market. At end-June 2023, the bid-ask spread stood at G\$3.00 compared to G\$2.77 at end-June 2022.

Figure XXIII

The money market signalled increased stress levels over the end-June 2022. The US 3-month T-bill volatility was up 176 basis points above the end-June 2022 level, at 2.15 percent at end-June 2023. Alternatively, the differential between the 364-days and 182-days local treasury bills was up less than 1 basis points above the end-June 2022 level.

The lack in sale of the 182 and 92-days T-bills relative to the increase demand for the 364-days T-bills coupled with the higher volatility in the US 3-month T-bills rate pushed the money market above the end-June 2022 and end-December 2022 levels respectively.

7. Aggregate Financial Stability Index (AFSI)

In June 2023, the Aggregate Financial Stability Index (AFSI) registered an index of 0.1100, signalling increased vulnerabilities from an index of 0.1238 in the corresponding period in 2022. This was driven by the increased vulnerability in the sub-indices measuring Financial Vulnerability (FVI), Financial Soundness (FSI), and the Financial Development Index (FDI). The World Economic Climate Index

(WECI) on the other hand, showed marginal improvement from the corresponding period in 2022.

Figure XXIV

Box 2

Aggregate Financial Stability Index (AFSI)

The Aggregate Financial Stability Index (AFSI), which can be used as an early warning system, is an aggregate of four component indicators or sub-indexes covering microeconomic, macroeconomic, and international measures of vulnerability, used to capture and forecast the stability of the financial system. An increasing index signals improvement in the stability of the financial system, while a decreasing index signals deterioration.

Fluctuations in the AFSI, or seasonal changes in the macroeconomic environment, are mainly responsible for the pattern of the AFSI curve. According to trending data, economic activities in Guyana usually peaks in the latter half of the year, predominantly in the fourth quarter, where productivity, trade, and debt increases at the same time, thus increasing vulnerabilities to the economy; therefore, reducing the overall AFSI-Index. Subsequently, comes a general slowdown in the first quarter, followed by elevated activities and lower debt in the second quarter, and in the third quarter begins the preparations for heighten activities in the fourth quarter.

The FVI (Financial Vulnerability Index), FSI (Financial Soundness Index), FDI (Financial Development Index), and WECEI (World Economic Climate Index) represent 40, 35, 10, and 15 percent respectively of the AFSI.

The Financial Vulnerability Index (FVI) also signalled increased vulnerability, largely on account of the increasing deficit of the total fiscal balance to GDP and the decline of the commercial banks net foreign assets to total assets ratio. Nevertheless, there were significant improvements in the ratios of the current account balance to GDP and the M2 to international reserves. Moreover, the increased vulnerability of the Financial Development Index (FDI), was mainly led by a reduction of the stock market capitalisation to GDP ratio.

The World Economic Climate sub-index (WECEI), which measures stability in the international environment, slightly improved from last year despite the persistence of several shocks to the already weakened global economy. The market volatility index was essentially accountable for this improvement, thereby indicating a higher level of confidence in the markets. Nonetheless, as a small open economy, Guyana remains vulnerable to shocks in the global environment. Thus, appropriate fiscal and monetary policies are essential to support the continued stability of the economy.

The IMF reiterates that building financial resilience, strengthening growth potential, and enhancing inclusiveness remain overarching goals for all countries.

8. Financial Stability Cobweb

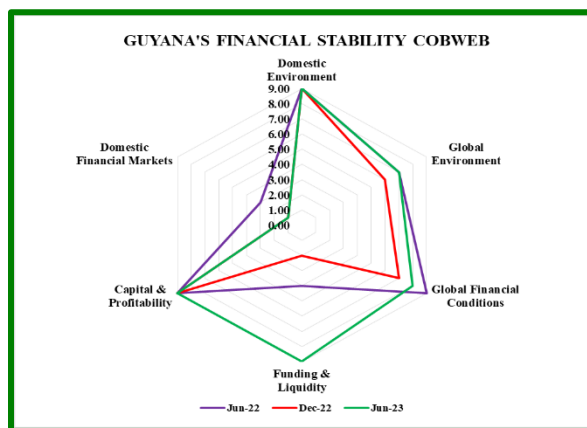

The Financial Stability Cobweb is a six (6) dimension measure of a financial system's risks that aids in identifying stress in the domestic and global macroeconomic environments and financial market conditions that can trigger major difficulties for financial institutions. The ability of financial institutions to absorb shocks is reflected by the capital & profitability, and funding & liquidity dimensions (indicators). Reduction in financial stability risk is represented by movement towards the core of the cobweb diagram and vice versa for increased financial stability risk.

For the period end-June 2023, the funding & liquidity dimension signalled heightened risk to financial stability relative to the end December 2022 and end-June 2022 levels. This resulted primarily from lower levels of liquid assets to total assets and liquid assets to total demand & time liabilities at end-June 2023 relative to the end-December 2022 and end-June 2022 periods.

On the other hand, the domestic financial markets and global financial conditions signalled reduced risk

relative to the two comparative periods. The lower risk in the domestic financial market stemmed from the tapering of growth in stock market capitalisation observed in the previous periods and the narrowing of the Guyana T-Bills to US T-bills rate differential. At end-June 2023, the differential between the Guyana T-Bills and US T-Bills fell to negative 3.62 compared to negative 2.71 at end-December 2022 and 0.05 at end-June 2022.

Figure XXV

In relation to the global financial conditions, the financial system stands to benefit from improved confidence in the global economy. The uptick in the Chicago Board Options Exchange Market Volatility Index (VIX) and narrowing of the JP Morgan EMBI Global Spread are positive indicators to Guyana's financial stability.

The other three dimensions assessed by the Cobweb showed sustained risk levels relative to the end-June 2022 level, with the global environment signalling a slightly lower risk to financial stability at end-December 2022.

The global economy showed an estimated growth of 3.20 percent mid-year same as the corresponding 2022 period's level. However, growth at end-December 2022 was estimated at 3.40 percent, amidst a negative world economic climate with the persistence of COVID in China and the Ukraine/Russian war. These

variables continue to signal a high risk to financial stability for Guyana.

In the domestic environment, inflation fell to 1.89 percent at end-June 2023, compared with 7.24 percent at end-December 2022, and 5.01 at end-June 2022. Total fiscal balance to GDP fell to negative 10.60 percent for the quarter end-June 2023, relative to negative 51.1 percent at end-December 2022 and 2.65 percent at end-June 2022. Additionally, total sovereign debt stock to GDP increased to 223 percent, 1.4 basis points and 17.1 basis points above the end-December 2022, and end-June 2022 respectively. Further, M2 to international reserves were up to 483 percent, 137 and 68 basis points respectively over the end-December 2022 and end-June 2022 levels.

In regards to the capital & profitability dimension, the lower tier 1 capital to risk-weighted assets resulting from the enhanced supervisory framework saw an industry capital ratio of 18.9 percent (10.9 over the prudential minimum) at end-June 2023. The average ratio over the comparative period was 18.4 percent compared to an average of 28.5 percent under the previous supervisory framework. The new framework requires commercial banks to hold capital against additional risk categories resulting in higher overall risk weights. Notwithstanding, commercial banks profitably measured by the ROA averaged 0.55 percent over the three comparative periods.

At end-June 2023, the risk to financial stability was relatively stable when compared with the level risk at end-December 2022 and end-June 2022 respectively.

Conclusion

As a small open economy, Guyana remains vulnerable to shocks in the global environment. Appropriate fiscal and monetary policies coupled with enhance regulation and supervision of the financial sector are essential to support the continued growth of the economy and the safety, soundness and stability of the financial system. The IMF reiterates that building

financial resilience, strengthening growth potential, and enhancing inclusiveness remain overarching goals for all countries.

The financial stability cobweb signalled heightened risk to financial stability from the liquidity & funding dimension while the domestic financial market and the global financial market dimensions signalled repressed risk levels. The AFSI indicated an improved world economic climate while the financial soundness, financial vulnerability and financial development indices signalled some heightened vulnerability. Moreover, the EWI (macro-financial ‘signal’ index) emphasised a ‘medium’ risk with the increased vulnerability observed in the central government balance to GDP ratio, volatility in inflation and the Guyana to US T-Bills rate differential.

Notwithstanding, the Guyanese economy is resilient, its financial sector adequately capitalised and holds sufficient liquidity to meet demand despite the marginal decline in the liquid assets ratio over the review period. The upgrade of the supervisory framework to Basel II/III continues to enhance the banking sector’s resilience. Moreover, lower level of

NPLs has significantly aided the banking sector’s stability.

The financial sector and the economy’s growth continued to be supported by credit growth which has not shown any signs of overheating as the collective market stress level remained constant. Credit-to-GDP still stands marginally below its long-run trend being propelled by the private sector credit. The banking sector remains profitable and stable. NPLs have significantly reduced and the risk of contagion remains low.

While there is no need for immediate policy actions, ongoing monitoring would continue with close attention on the domestic environment, particularly the inflation rate and total sovereign debt stock relative to GDP. Further, all efforts would be made to continually enhance Guyana’s resilience to global financial shocks and policy makers should stand ready to make prompt decisions to preserve the stability of the financial system and economy at large. □

5. INSURANCE SECTOR REVIEW

The insurance sector, which comprises long-term insurance and general insurance, recorded assets of G\$195,996 million, an increase of 23.8 percent (G\$37,672 million) from the previous year. The sector accounted for 10.1 percent of total financial assets and 40.4 percent of non-bank assets as at end-June 2023. The sector was adequately capitalised as both the long term and general insurance sectors' assets exceeded their respective solvency requirements in keeping with the Insurance Act 2016. The long-term and general insurance sectors' assets exceeded liabilities by 293.8 percent (G\$98,738 million) and 364.4 percent (G\$47,188 million), respectively. The insurance sector's assets accounted for 5.8 percent of the country's GDP. The sector acts as a conduit for households and firms to transfer risks to entities that are better suited to handle them. In this way projects can be undertaken that might not be otherwise possible, and this contributes to the growth and financial stability of the economy.

The average per capita spending on insurance increased by 9.8 percent to G\$12.3 million, which indicated that there was an increase in the density of insurance products in the market. The sector's penetration into the domestic market fell marginally from the prior year (0.5 percent) and its total gross written premium represents 0.3 percent of the economy's GDP. Reinsurance for the long-term insurance sector increased by 14.4 percent (G\$36.9 million) to G\$292.6 million which indicated that more risks were being transferred to reinsurers in comparison to total gross premiums written. Reinsurance for the general insurance sector increased by 17.6 percent (G\$275.5 million) to G\$6,454 million. Potential risks the industry was exposed to, were prudently managed resulting in no adverse effect despite the volatility of the global financial conditions.

Capital to Total Assets

Capital to total assets ratio for the long-term and general insurance sectors stood at 80.3 percent and 79.2 percent relative to 67.4 percent and 76.6 percent respectively in 2022. The increases by both sectors reflected an increased risk in the asset portfolio of insurers relative to their capital.

Net Premiums to Capital

The long-term insurance sector's net premiums to capital ratio decreased as at end-June 2023 to 2.5 percent from 3.6 percent, and the general insurance sector decreased to 9.7 percent from 11.2 percent. The decreased ratios indicated that companies were unable to maximise their full potential.

Investment Assets to Total Assets

The industry's investment assets portfolio was fairly stable. The ratio of investment assets to total assets for the long-term and general sectors were 80.6 percent and 73.5 percent as at end-June 2023 when compared with the previous year's 77.7 percent and 70.2 percent respectively. The large investment asset portfolio of the insurance sector indicated that there was a large portfolio of income generating assets as part of the companies' asset portfolio. The sectors' investments were mainly in the form of cash, equities and fixed interest securities. The large investment asset portfolio is however susceptible to the changing investment climate as a result of the country's status as an oil producer.

Reinsurance

This ratio measures the risk transferred from the insurer to the reinsurer. It was observed that most companies in the sector had policies in place to ensure that risks are ceded to top-rated and credit worthy reinsurers. However, it should be noted that companies are not reinsured for pandemics. The financial strength of the reinsurers is monitored on an annual basis.

The cession rates varied depending on the level of risks arising from exposures estimated by various companies. Reinsurance risks were only ceded for Class 1 (General Life) business for the long-term insurance sector while for the general insurance sector, risks were ceded for all classes of business. Cession rates, which measure the risks ceded to reinsurance, increased to 9.6 percent for the long-term insurance category and 26.8 percent for the general insurance category, compared to the respective 8.9 percent and 25.9 percent ceded the previous year.

The increased cession rate by the sectors indicated that companies were transferring a larger portion of risk in relation to any potential claims incurred.

Actuarial Liabilities

Net technical provision to average of net written premium in the last three years for the long-term sector was 712.2 percent, a decline from 790.7 percent at end-June 2022. This ratio indicated that the long-term sector's actuarial liabilities were approximately 7.1 times its average triennial net written premiums. This suggested that the sector would be required to increase its annual premiums by approximately seven times in order to adequately meet these liabilities solely from its net written premium. However, the actuarial liabilities represent amounts accumulated over time and as such the companies would have accumulated reserves to meet these liabilities.

Combined Ratio (Claims + Expense Ratios)

The combined ratio for the general insurance sector marginally declined to 72.4 percent from 75.3 percent. The decreased ratio by this sector resulted from a 5.2 percent fall in management expenses against a smaller increase (2.3 percent) in claims expenses. The combined ratio indicated that the sector generated increased underwriting profit, thus signalling an improvement in the underwriting performance of the companies in this sector.

Return on Assets

Returns on assets were 1.0 percent and 3.0 percent respectively for the long-term and general insurance sectors. Comparatively for June 2022, these were 0.9 percent and 3.1 percent, respectively. The ratios indicated that the sector's utilization of its assets was consistent with its performance in the previous year.

Return on Equity

Returns on Equity were 1.2 percent and 3.8 percent respectively, for the long-term and general insurance sectors. Comparatively for June 2022, these ratios were 1.4 percent and 3.9 percent respectively. The marginal decreases by the sectors were largely as a result of the declines in net profits after tax.

Investment Income to Invested Assets

The ratios of investment income to invested assets for the long-term sector was slightly lower than the prior year at 0.6 percent compared with 0.7 percent (June 2022). The general insurance sector's ratio marginally decreased to 0.7 percent from 0.8 percent at the end of the previous year. These marginal decreases in the ratios were, in the main, as a result of a small increase in the investment income earned by both sectors when compared the significant growth in investment assets.

Liquidity

The industry's liquid assets to current liabilities ratios for the long-term and general insurance sectors were 478.9 percent and 216.5 percent respectively, at end-June 2023, when compared with the previous year's 474.7 percent and 245.2 percent respectively. The high liquidity levels reflect the sectors' ability to meet its current financial obligations from its available liquid assets.

Outlook & the Way Forward

Companies continue to take advantage of the technology through the facilitation of online payments of premiums and the online settlements of claims.

The Bank has resumed onsite inspection of insurers in light of the declaration of the end of COVID 19 as a public health emergency.

The stability of the insurance sector continues to be actively monitored through the performance of insurers with a view of maintaining an efficient, fair, safe and stable insurance market for the benefits and protection of policyholder and to enhance public confidence in those market. The Bank of Guyana also seeks to ensure that measures are in place to facilitate business continuity and to maintain strong financial positions. □

6. PENSION SECTOR REVIEW

The assets of the private pension sector decreased by G\$9, 143 million or 7.20 percent to G\$117,864 million from June 2022 due to a reduction in the market value of equity shares. This accounted for approximately 6.1 percent of the total financial sector's assets and 24.3 percent of NBFIs. The decline in assets was mainly attributed to a decrease in the fair value of equity and fixed income investments.

The two major pension plans of Defined Benefit (DB) and Defined Contribution (DC) remained relatively stable. DB plans were sensitive to market risk, mainly because of the composition of their investment portfolios – large proportions were held in capital-uncertain assets: predominantly equities and real estate. Likewise, DC plans were vulnerable to the Deposit Administration Contracts (DACs) offered by the life insurance companies. Further, while investments in foreign assets were below the regulatory threshold, the unavailability of suitable diversifiable local investments also exposed pension funds to market risk. Regardless, the sector's exposure to credit risk remained insignificant.

The sector continued to have high liquidity levels that far surpassed the long-term nature of pension liabilities. Liquid assets (1 year and under maturity) totalled G\$16,365 million and accounted for 13.9 percent of total pension assets. Moreover, liquid assets were approximately 31 times greater than estimated pension payments for the coming quarter. Consequently, the private pension sector maintained a more than sufficient funding level with an average of 304.5 percent.

Systemic Risk

The pension sector's assets continued to exhibit positive growth, while the sector's relationship to systemic risk remained diminutive. As at the end of June 2023 pension assets represented 6.1 percent of total financial assets and 24.3 percent of the assets of NBFIs. Moreover, the sector's role as an important institutional investor increased; the GDP ratio decreased from 4.0 percent to 3.5 percent as at end-June 2023. In addition, there was a significant increase in investments in stocks and shares.

Funding Risk

Funding risk, the risk that a pension plan cannot meet its past-service pension liabilities, is particularly important for DB pension plans. As at the end of June 2023, the sector's pension plans did not experience any measurable funding risk. The sector's pension

funds' approximate funding level was 304.5 percent. This signalled that pension assets were more than sufficiently able to meet its current pensionable obligations. Moreover, the pension funds were in surplus by an estimated 211.0 percent. By nature, DC pension plans are fully funded and DB plans average funding ratio was approximately 311.0 percent. This signals that the funding level is more than adequate to pay pensions' obligations. However, it is noteworthy that as much as the funding level is more than adequate, there were still a few DB plans in deficit which were still to implement actuarial recommendations.

Liquidity Risk

At the end of June 2023, there continued to be a surplus of liquidity in the pension sector. This was as a result of pension plans' excessive investments in liquid assets (13.9 percent of total assets) with at most

one year to maturity. Furthermore, the sector's level of liquidity exceeded its estimated pension payments in the quarter by 31 times. Pension plans' liabilities have an inherently long-term nature and this level of liquidity failed to correspond with the long-term nature of pension funds' liabilities.

Market Risk

Asset Allocation

Market risk emerges from the pension funds' investments in capital-uncertain assets. At the end of June 2023, pension assets were allocated in four investment categories. In particular, investments in equities as well as time and savings deposits represented 56.1 percent and 17.4 percent of total assets respectively. Pension assets' foreign exposure marginally increased, accounting for 17.3 percent of total assets as at June 30, 2023, compared to 16.0 percent at June 2022. In fixed interest securities, bonds represented 9.3 percent and in DACs, offered directly by insurance companies, represented 14.0 percent.

DB & DC Investments

DB pension plans were sensitive to market risk emanating from their investments that were mainly held in equities and bonds. In aggregate, these investments were 89.9 percent of DB assets of which 54.9 percent represented DB assets invested in equities. On the contrary, DC pension plans were exposed to the life insurance companies' investment arrangements under their DACs, which represented approximately 80.7 percent of DC assets as at end-June 2023.

Foreign Exposure of Pension Assets

Investments in foreign assets by pension funds remained constrained to a maximum limit of 30 percent. Nonetheless, pension funds' foreign investments of 17.3 percent were below the threshold as at end-June 2023. Moreover, a greater portion of pension assets were invested locally, of which 66.7

percent were invested in equities, 16.2 percent in DACs, 12.0 percent in time and savings deposits, 2.9 percent accounted for public and private securities, 0.1 percent in real estate and loans while 1.9 percent was allocated to other investments. Additionally, the lack of available and suitable domestic investment opportunities for pension funds also contributed to market risk in the sector.

Inflation Risk

Inflation risk is particularly applicable to pension funds when there is volatile domestic inflation that negatively impacts real interest earnings. At the end of June 2023, the sector's assets exposure to domestic inflation volatility increased to 25.4 percent when compared to 23.4 percent in the corresponding period in 2022. Further, nominal gross investment returns decreased to 3.0 percent from 2.7 percent in June 2022. Also, due to inflation, real investment returns earned by pension funds in the sector had negative gross and net rates of 8.5 percent and 8.6 percent respectively as at end of June 2023.

Credit Risk

Credit risk, which arises as a consequence of the non-payment of monies owing to pension funds, was insignificant at the end of June 2023. Accounts receivable as a ratio of total assets remained comparably low and stable at 0.9 percent. Credit risk may also emerge due to the insolvency of companies that issue corporate bonds; the credit risk ratio as a result of investment portfolios of pension funds was marginally higher, 64.5 percent at end of June 2023 compared to 63.9 percent at end of June 2022, however, its impact on the pension sector remained insignificant.

Quality of Management

The quality of management is an expression of the sector's coverage, that is, the number of individuals who benefit directly from contributions to a pension

plan. At the end of June 2023, limited coverage remained a great impediment to the private pensions sector. At the end of the review period, an estimated 6.0 percent of the labour force contributed to a private pension plan and for every covered individual, approximately \$7.0 million of pension assets was under management. Moreover, payments with respect to early withdrawals decreased to 56.5 percent of total benefit payments during the first half of 2023. The fluctuating rate of early withdrawals was directly due to long vesting periods, and a lack of locking-in and portability provisions in pension plans' rules which allow the premature withdrawal of pension benefits and in turn, a reduction of the coverage of the sector.

The Way Forward

Regarding the second half of the year, the sector is expected to grow consistently and continuously. It is envisaged that positive changes in the values of its major investment vehicles will continue to propel the sector forward given favourable market conditions. Therefore, it is equally important to experience conducive capital market outcomes, especially positive changes in stock market prices and positive impacts of inflation volatility on real interest rates. However, the sector will continue to experience returns that are reflective of the investments accessible to domestic pension funds. Continued low returns are projected given constrained local investment opportunities. Pension funds must seek suitable alternatives in order to match the long term nature of its liabilities. Regardless, the sector's total assets reserve is forecast to improve upon its surplus position. Continued regulatory monitoring is expected to focus on DB pension funds' actuarial valuation

reports in order to ensure that the actuary's recommendations are being executed expediently.

New, comprehensive legislation - the Private Pensions Act - is currently in its draft phase and has concluded its second round of consultations with industry stakeholders. The consultations with respect to regulations accompanying the Pensions Act, are expected to continue in the latter half of the year. This legislation aims to give the regulator the enhanced powers to ensure efficient and lawful functioning of the sector. Ongoing Trustee training is also planned, to ensure persons responsible for the daily management of pension plans are equipped to do same. The National Pension Awareness Programme (NPAP) is also projected to commence in the final half of the year and aims to provide improved pensions' knowledge of all stakeholders. □

III

INTERNATIONAL ECONOMIC AND MONETARY DEVELOPMENTS

The World Economy

The global recovery from the COVID-19 pandemic and the Russia-Ukraine conflict, is slowing amid widening divergences among economic sectors and regions. The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a “global health emergency”. Supply chains have largely recovered, and shipping costs and suppliers’ delivery times are almost back to pre-pandemic levels. However, forces that hindered growth in 2022 such as elevated inflation, high interest rates, and reduced investment remain persistent. Inflation continues to erode household purchasing power while policy tightening by central banks in its response has raised the cost of borrowing, constraining economic activity. According to the IMF’s World Economic Outlook, the global economy is estimated to grow by 3.0 percent in 2023, down from 3.5 percent recorded in 2022; remaining well below the historical (2000-19) annual average of 3.8 percent. Advanced economies continue to drive this decline in growth largely due to weaker manufacturing, and slower credit growth, offsetting stronger services activities. Moreover, global inflation is projected to decline from 8.7 percent last year to 6.8 percent this year.

Advanced Economies

Output

Growth in advanced economies is expected to significantly slowdown to 1.5 percent in 2023, from 2.7 percent in 2022, according to the IMF’s recent estimates. About 93 percent of advanced economies are projected to have lower growth in 2023. Growth in the USA is projected to slow from 2.1 percent in 2022 to 1.8 percent in 2023 primarily due to declined consumption as a result of largely depleted excess savings accumulated during the pandemic while the Federal Reserve is expected to further raise interest rates. In the Euro Area, growth is projected to fall from 3.5 percent in 2022 to 0.9 percent in 2023 mainly due to pressures from its high interest rate environment. Germany’s growth is forecasted to fall into recession by the end of 2023 by -0.3 percent, whereas France, Italy and Spain are expected to grow by 0.8 percent, 1.1 percent and 2.5 percent respectively. Growth in the

UK is projected to decline to 0.4 percent in 2023 from 4.1 percent in 2022 as the energy price shock due to the Russia-Ukraine conflict disrupted recovery while the Brexit-related uncertainty remains. In Canada, growth is expected to fall to 1.7 percent in 2023 from 3.4 percent last year. The Japanese economy is forecasted to grow 1.4 percent in 2023 up from 1.0 percent in 2022 buoyed by pent-up demand and accommodative policies.

Inflation

Inflation eased in most advanced economies but remain persistent. Inflation is estimated at 2.3 percent for 2023, down from 6.1 percent recorded in 2022. In the USA, the inflation rate stood at 3.0 percent, down from its peak of 9.1 percent in June 2022. Inflation in the UK dropped to 7.9 percent in June 2023, marking the lowest level since March 2022, mainly due to a slump in fuel prices. Likewise, inflation in Canada fell to 2.8 percent in June 2023 as gasoline prices declined

further. Inflation in the Euro Area slowed for the second consecutive month to 5.5 percent in June 2023, while the inflation rate in Japan edged up to 3.3 percent in June 2023 resulting from a hike in utility bills added to a steady increase in food and daily necessity prices.

Unemployment

In advanced economies, unemployment remained relatively stable at 4.8 percent. In the USA, labour markets remained tight, with a low 3.6 percent unemployment rate. The rate for Canada was 5.4 percent - its second consecutive increase reflecting some softening in the Canadian labour market. In the UK, the unemployment rate increased to 4.0 percent – the highest since the last quarter of 2021. The Euro Area’s unemployment rate remained at a record low of 6.4 percent while in Japan, the rate edged lower to 2.5 percent.

Monetary and Exchange Rates

Global central banks continue to exhibit a hawkish tone as it relates to monetary policy during the quarter. The US Federal Reserve raised their benchmark interest rates by 25bps earlier in the second quarter before easing off with a pause in rate hikes at its FOMC meeting in June. This position was taken after the implementation of three rate hikes during the first half of the year. As at end-June 2023, the Federal Funds target range stood at 5%-5.25%, and it is expected that two more rate hikes are likely to occur before the end of 2023. The European Central Bank approved two 25 bps rate hikes during the second quarter of 2023 taking their interest rate to 4%, up from 3.5%, while the Bank of England opted for an overall 75 bps rate increase, taking its interest rate level to 5%. On the other hand, the Bank of Canada only had one rate hike of 25 bps after pausing earlier in the quarter, increasing their benchmark rate to 4.75% as at end-June 2023.

Compared to the end of 2022, the currencies of other advanced economies fluctuated against the US dollar.

The Canadian dollar appreciated by 2.4 percent to \$1.32, the British Pound by 4.8 percent to £0.79, the Euro by 1.7 percent to €0.92. On the other hand, the Japanese Yen depreciated by 10.1 percent to ¥144.31 for USD\$1.

EMERGING MARKET & DEVELOPING ECONOMIES

Growth

Growth in emerging market & developing economies (EMDEs) is projected to be broadly stable at 4.0 percent in 2023. Growth in emerging and developing Asia, is estimated to rise to 5.3 percent in 2023. In China, growth is forecasted at 5.2 percent owing mainly to increased demand and consumption as well as stronger-than-expected net exports, despite the underperformance of investment due to the ongoing real estate downturn. Growth in India is estimated at 6.1 percent for 2023.

Growth in emerging and developing Europe, is projected to increase to 1.8 percent in 2023. In particular, Russia’s GDP growth for 2023 is projected to be 1.5 percent, after withstanding a recession in 2022. This is as a result of a strong first half of the year, driven by large fiscal stimulus.

The Latin America and Caribbean region estimates a growth decline from 3.9 percent in 2022 to 1.9 percent in 2023. This reflects the recent fading of rapid growth during 2022 after the pandemic reopening, as well as lower commodity prices. Brazil’s GDP growth for 2023 is estimated to be 2.1 percent as low investment and consumption growth weigh on the outlook. In Mexico growth of 2.6 percent is estimated and this is impacted mostly by delayed post-pandemic recovery in services.

In the Middle East and Central Asia, growth is projected to decline from 5.4 percent in 2022 to 2.5 percent in 2023. This is mainly attributable to a steeper-than-expected slowdown in Saudi Arabia, from 8.7 percent in 2022 to 1.9 percent in 2023. This

downgrade reflects oil production cuts announced in April and June in line with an agreement with OPEC+ in support of a stronger non-oil GDP growth.

In Sub-Saharan Africa, growth is projected to decline to 3.5 percent in 2023. Growth in Nigeria is estimated to decline reflecting security issues in the oil sector, whereas growth in South Africa is projected to decline to 0.3 percent in 2023 on account of power shortages.

Inflation

Headline inflation in emerging markets and developing economies continued to decline during the first half of the year and is forecasted at 8.3 percent in 2023, down from 9.8 percent in 2022. Recent estimates indicate that Brazil's inflation receded to 3.2 percent in June 2023 while inflation in Mexico eased for the fifth straight month to 5.1 percent. In China, inflation dropped by 0.3 percent, the first decrease since February 2021, primarily due to the fall in food prices. In contrast, India's inflation rate accelerated for the first time in five months to 4.8 percent in June 2023 mainly on account of rising food prices. Likewise, Russia's inflation rate rose to 3.3 percent - the highest in three months.

Unemployment

The unemployment situation was varied among EMDEs. Recent estimates show that the unemployment rate in China stood at 5.2 percent, representing one of the lowest levels recorded in sixteen months. In Brazil, the unemployment rate averaged 8.0 percent in June 2023, while in Mexico, it declined to 2.7 percent from 3.3 percent in the corresponding period a year ago. In India, the unemployment rate rose to 8.5 percent, whereas in Russia, it declined to 3.1 percent.

Exchange Rates

Compared to the end of 2022, The Brazilian Real appreciated by 9.4 percent to R\$4.79, the Mexican Peso by 12.1 percent to \$17.13 and the Indian Rupee

by 0.8 percent to ₹82.10. The Chinese Yuan depreciated by 5.2 percent to ¥7.25 and the Russian Ruble by 20.5 percent to P88.83.

CARIBBEAN ECONOMIES

Growth

Following strong growth of 7.9 percent in 2022, output in the Caribbean economies is set to expand by 5.1 percent in 2023. Tourism continue to recover towards pre-pandemic levels and remains an important contributor to growth, supporting employment, investment and exports. The region's outlook partly reflects the oil boom in Guyana, where GDP growth is recorded at 59.4 percent at June 2023 as production at new oil fields continue to ramp up. Barbados' economy is expected to grow by 4 to 5 percent in 2023 while growth in Jamaica and Suriname is expected to be 4.2 percent and 2.3 percent respectively.

Inflation

The strength of the post-pandemic recoveries has varied across the region. The global rebound of commodity prices from the pandemic lows, further boosted by the Russia-Ukraine conflict, has generally supported the recovery of commodity exporters, while constraining those that depend on commodity imports (tourism-dependent Caribbean economies). The upward trend of commodity prices seems to be reversing, as the global financial conditions tighten. As such, recent estimates indicate a deflation rate of 0.3 percent in Guyana. Contrary, inflation is recorded at 5.7 percent in Trinidad and Tobago, 6.2 percent in Jamaica and 54.2 percent in Suriname, all lower than previous forecasts.

Unemployment

In the Caribbean, labour markets recovered from the severe impact of the COVID-19 pandemic crisis in 2020. The improvements in labour participation rates and unemployment rates that began in 2021 continued into 2023. Recent estimates show that the unemployment rate in Barbados continued to decline

and stood at 7.2 percent at the end of June 2023. In Jamaica, the unemployment rate also declined to 6.6 percent.

Exchange Rates

Over the quarter, the Barbados, Belize and the ECCU continued to maintain fixed exchange rates with the US dollar of Bds\$2, BZ\$2 and EC\$2.7 respectively. The Bank of Guyana exchange rate also remained at GY\$208.5 for US\$1. Compared to the end of the last quarter, the Trinidad & Tobago dollar slightly depreciated against the US dollar to TT\$6.77 while the Jamaican dollar also depreciated to J\$154.50 for US\$1.

COMMODITY PRICES

Commodity prices are expected to fall by 21 percent in 2023, reflecting the sharpest drop since the pandemic. Average energy prices are expected to be 23 percent lower than in 2022. The risks to the forecast are tilted to the upside, primarily because many of the factors that caused shocks to commodity markets in recent times still remain. These factors include possible disruptions in the supply of energy and metals, intensifying geopolitical tensions, a stronger-than-anticipated recovery in China's industrial sector, and adverse weather events. Disappointing global growth is the major downside risk.

Compared to the end of the last quarter, the price of rice increased by 8.0 percent to US\$514 per metric ton while the price of sugar also increased by 19.8 percent to US\$0.54 per kg. Oil prices pushed upwards at the beginning of the second quarter reaching a high of \$87.33/bbl. However, oil experienced a significant dip during the latter half of April and early-May, falling by approximately \$15/bbl., attributed mainly to higher interest rates coupled with weaker industrial activity contributing to recessionary concerns and a potential downward shift in global oil demand. Oil prices fluctuated throughout May and June reaching its lowest level for the quarter at \$71.84/bbl.

Notwithstanding, oil prices rebounded towards the end of the quarter following a meeting between OPEC+ and its allies as they indicated their intentions to further cut oil production by 1 million bpd in July. To close the quarter, oil was traded at \$74.90/bbl.

At the start of the quarter, gold traded at US\$1969.28 per ounce before trending upwards, reaching its highest value for the quarter at US\$2050.28 per ounce. However, this surge in gold prices was short lived as the asset experienced tremendous selloffs for the remainder of the quarter caused by a stronger US dollar and the expectations of future hawkish monetary policy measures from global central banks. Continuing on a downward trend, gold reached its lowest value for the quarter at US\$1907.32 per ounce in June before closing the quarter at US\$1919.35 per ounce.

Outlook for 2023

According to the IMF's most recent estimate, global growth for 2023 is projected to be 3.0 percent. Advanced economies are expected to grow by 1.5 percent and emerging market and developing economies by 4.0 percent. The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking, reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation is predicted to remain high and can even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China's recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for

tight monetary policy, and domestic demand could again prove more resilient.

IV MONETARY POLICY

The conduct of monetary policy remained focused on price stability, ensuring an adequate level of liquidity in the banking system and creating an enabling environment for credit and economic growth. The Bank of Guyana utilised the issuance of treasury bills and foreign exchange intervention as the variable tools of monetary policy, while the discount rate was unchanged at 5.0 percent. At the end of June 2023, there was no redemption in government treasury bills issued for monetary purpose, while the Bank transacted net-purchases in foreign currencies of US\$4.0 million.

MONETARY POLICY

Monetary policy recommendations were determined within the framework of monetary programming and the evolving circumstances impinging on inflation expectance, liquidity condition and macroeconomic stability. The Bank's principal instrument of monetary control continued to be the auction of treasury bills in the primary market. The monetary policy stance was signalled through the volume of treasury bills issued with implications for the general level of interest rates.

MONETARY PROGRAMMING

In principle, monetary programming allowed the Bank to set a targeted path for the growth of broad money, consistent with economic growth and inflation. Its foundation rested on the observation that the Bank controls the supply of reserve or base money, which comprises currency in circulation and commercial banks' reserves at the Bank. The underlying assumption for the effective operation of the reserve money programme is the long term stability of the money multiplier, which is defined as the relationship between reserve money and broad money supply.

Reserve money is influenced mainly by the operations of the Bank. Changes in the Bank's net foreign assets and net domestic assets (which are largely affected by

the operations of the central government) impact on the level of reserve money. The Bank's intervention in the foreign exchange market by buying or selling foreign currency affected the liquidity condition in the system. Since the counterparties to the Bank's foreign currency transactions are the commercial banks, the transactions affect the net foreign assets and the net domestic assets of the commercial banks.

A sale of foreign currency by the Bank will increase the net foreign assets and reduce the net domestic assets of the commercial banks and vice versa. On the Bank's balance sheet a sale of foreign currency will reduce its net foreign assets, as well as its liabilities to commercial banks and reserve money. On the other hand, a purchase of foreign currency by the Bank will increase its net foreign assets as well as reserve money.

The operations of the government will either add or withdraw liquidity from the system. An increase in net credit to the government, which will increase the net domestic assets of the Bank, results in an increase in reserve money. This usually occurs through a relative increase in expenditure compared with the increase in revenue. The net deposits of the central government are therefore affected.

During the review period, weekly forecasts of the Bank's balance sheet were produced based on

estimated liquid reserve positions of the commercial banks and the public. These forecasts were compared with the weekly targeted monetary growth which was consistent with the set nominal output objective. The deviations established by this comparison indicated the baseline scenario level of the open market operation necessary to bring the forecasted money supply in line with its targeted annual growth. The actual weekly intervention was determined by the Open Market Operation Committee (OMOC) on the baseline scenario and prevailing developments.

The OMOC adopted a consultative approach during the review period by liaising closely with agencies which impacted directly on liquidity in the financial sector. Additionally, other information such as the state of the foreign exchange market, the interbank market, the structure of interest rates and the liquidity position of the non-bank financial institutions facilitated more informed decisions by the OMOC.

At the end-June 2023 reserve money was G\$361.7 billion, G\$22.1 billion more than the end-December 2022 level due to an expansion in net domestic assets of the Bank of Guyana. Both treasury bills issued for monetary purposes and redemptions amounted to G\$2.0 billion, resulting in a net redemption of G\$0.0 billion. The commercial banks held no treasury bills issued for monetary purposes at end-June 2023.

The liquidity condition varied among commercial banks and was reflected by interbank market activities. Twenty seven (27) trades were made on the interbank market during the first half of 2023 totaling G\$60.3 billion compared with thirty one (31) trades totaling G\$54.3 billion for the corresponding period in 2022. The inter-bank market interest rate remained at 4.5 percent during the review period

Monetary policy was able to control the liquidity condition in the banking system which contributed to the maintenance of macroeconomic stability and an environment for fostering economic growth in the economy. □

V OPERATIONAL ACTIVITIES

Financial and monetary stability as well as financial system efficiency continued to be achieved in a number of the Bank's operations. The Bank facilitated efficient intermediation through the issuance of notes and coins as well as the promotion of an enhanced payment system operation. During the first half of 2023, the Bank endeavoured to strengthen and improve Guyana's Payments System infrastructure by implementing the legal and regulatory framework, establishing and improving the payment infrastructures, encouraging innovation and promoting awareness of digital payments. Additionally, the Bank continued to be the custodian of the nation's foreign asset reserves while also managing the Natural Resource Fund (NRF) as mandated in an operational agreement between the Bank and the Board of Directors of the NRF. The Bank of Guyana continued to provide support to the Depository Insurance Corporation (DIC) and manage the Deposit Insurance Fund with the objective of fostering financial stability by protecting depositors and assist in resolution financing. For the review period, the Bank achieved a net profit of G\$1,544 million against a budgeted profit of G\$660 million, resulting from the Bank's income being substantially higher than budgeted while containing expenses.

CURRENCY OPERATIONS

The Bank has a statutory obligation to issue the country's notes and coins under Section 21(1) of the Bank of Guyana Act 1998, No. 19 of 1998. The Bank continued to discharge its obligation to meet the demand for currency.

The total supply of currency increased by 11.0 percent for June, 2023. This increase was due to a higher opening stock when compared to 2022.

Notes

The total value of currency notes in circulation (including notes held in the vaults of commercial banks) at the end of June 2023 amounted to G\$231.5 million, an increase of 26.0 percent when compared to G\$183.5 million at the end of June 2022. In terms of the total amount issued the \$5000 accounted for 89.2 percent, the \$2000 accounted for 2.1 percent, the \$1000 for 6.3 percent, the \$500 for 0.8 percent, the \$100 for 1.1 percent, the \$50 for 0.2 percent and \$20 for 0.4 percent.

Table XXXVI

Supply & Disposal of Bank of Guyana Currency Notes			
Thousands of Notes			
	Jun	Jun	Jun
	2021	2022	2023
Opening Stock	43,504	25,314	40,959
Purchased	6,000	23,250	20,100
Withdrawn from circulation	55,716	49,208	47,433
TOTAL SUPPLY	105,220	97,772	108,492
Issued	55,705	50,497	54,400
Destroyed	7,053	4,173	10,855
TOTAL DISPOSAL	62,758	54,670	65,255
End-of-Period Stock	42,462	43,102	43,237
New Notes	39,466	33,560	39,077
Re-Issuable Notes	2,231	308	1,931
Other Notes ¹⁾	765	9,234	2,228

Notes:

(1) Notes awaiting sorting, cancellation and destruction.

The policy of ensuring that acceptable quality notes are in circulation continued during the review period. This was achieved by regular destruction of mutilated, defaced or otherwise poor quality notes and replacing them with new notes. Mutilated, defaced and poor

quality notes amounting to G\$443.4 million were submitted for replacement for the first half of 2023 compared with G\$372.2 million for the first half of 2022.

Coins

Coins issued by the Bank of Guyana amounted to G\$1,243 million at the end of June 2023, an increase of 2.6 percent above the G\$1,212 million in June, 2022. The G\$10 coin continued to account for the highest proportion of the total value of coins, followed by the G\$5, \$1 and G\$100 coins respectively. In value terms, the share of G\$100 coin accounted for 2.7 percent, the G\$10 coin accounted for 45.3 percent, the \$5 coin accounted for 37.8 percent and the G\$1 coin for 14.2 percent.

In terms of the total quantity of coins issued, the share of G\$1 coin accounted for 54.0 percent, and those of the G\$5, G\$10 and G\$100 coins accounted for 28.7 percent, 17.2 percent and 0.1 percent, respectively.

PAYMENTS SYSTEM OVERSIGHT

The Bank of Guyana Act 1998 and the National Payments System (NPS) Act 2018 mandates the Bank of Guyana (BOG) with the responsibility for the regulation, supervision and oversight of the Payments System to ensure its efficiency, competitiveness and soundness. The NPS Act 2018 was the major step in the process of modernizing the payment system in Guyana.

The Bank's role within the NPS in Guyana, where it is guided by the Principles of Financial Market Infrastructure (PFMI), has been the implementation of the legal and regulatory framework, establishing and improving payment infrastructures, encouraging innovation and promoting awareness of digital payments.

Since 2021, there has been significant growth in the use of digital financial services with the establishment of the Guyana Real Time Gross Settlement (G-RTGS)

system, Guyana Central Securities Depository (G-CSD) system, upgrade of the Guyana Automated Clearing House (G-ACH) system comprising the Guyana Electronic Funds Transfer (G-EFT) and Guyana Electronic Cheque Clearing (G-ECC) sub-systems, upgrade of BOG's Sunsystem (Accounting GL), software modifications to Ministry of Finance (MOF), Guyana Revenue Authority (GRA) and the National Insurance Scheme (NIS) core systems for integration with the G-RTGS, G-CSD and G-ACH systems and fiber interconnectivity together with Virtual Private Networks (VPN) security devices among all NPS participants. As the NPS has been evolving, emphasis on collaboration with stakeholders to promote digital financial services while ensuring safety and efficiency has been ongoing.

Legal and Regulatory Framework

The existence of a sound and predictable legal environment for payments is considered to be the basis for a sound and efficient NPS. According to Principle 1 of the Principles on Financial Market Infrastructure (PFMI) which consist of twenty-three (23) Core Principles, "a Financial Market Infrastructure should have a well-founded, clear, transparent and enforceable legal basis for each material aspect of its activities."

The Legal and Regulatory Framework was established with the NPS Act 2018. In addition, six (6) supporting regulations on Agents, Electronic Funds Transfer, Electronic Money, Oversight, Dematerialization of Government & Bank Securities and Settlement & Treatment of Collateral were adopted to govern compliance by all licensed participants of the modern and efficient payments system.

Table XXXVII

List of Licensed Participants
Bank of Nova Scotia (BNS)
Bank of Baroda (BOB)
Citizens Bank Guyana Inc. (CBGI)
Demerara Bank Ltd. (DBL)
Guyana Bank for Trade and Industry (GBTI)
Republic Bank Guyana Ltd. (RBL)
Mobile Money Guyana Inc. (MMG)

The two (2) Regulations on; (i) Dematerialization of Government & Bank Securities; and (ii) Settlement & Treatment of Collateral, provide for conversion of records of Government securities into electronic format and for the issuance, of both Bank and Government of Guyana dematerialized securities functions thereby facilitating simultaneous delivery and payment for such securities.

Infrastructure

The Bank has identified the following five (5) payment system infrastructures as systemically important for oversight and assessment:

- (i) Guyana Real Time Gross Settlement (G-RTGS) System
- (ii) Guyana Central Securities Depository (G-CSD) System
- (iii) Guyana Automated Clearing House (G-ACH) System
- (iv) Guyana Electronic Funds Transfer (G-EFT) System – Part of the G-ACH System
- (v) Guyana Electronic Cheque Clearing (G-ECC) – Part of the G-ACH System

The newly implemented, G-RTGS and G-CSD systems which were launched in March 2021, are fully

integrated and operational with the previously existed G-ACH system. The G-ACH system comprises the G-EFT and the G-ECC sub-systems which together with the G-RTGS & G-CSD systems have formulated a modern and unified payments system infrastructure for all Guyanese and in the process meeting the required international standards and demands.

G-RTGS System

The G-RTGS System is an electronic fund transfer system which allows the transfer of funds between one bank/financial institution to another takes place in "real-time" and on a "gross" (transaction by transaction) basis, without bundling or netting with any other transaction. As an operator of the payment system and based on the mandate given by the NPS Act 2018, BOG installed and is operating the G-RTGS System for large value and critical payments.

Integral to the settlement in the G-RTGS system is the availability of funds to ensure settlement therefore, liquidity management is pivotal. To support liquidity for settlement, participants in the G-RTGS can pledge securities in favour of BOG to provide collateral for the extension of an intraday liquidity facility (ILF). The availability of adequate collateral is a necessary precondition to access these funds hence the G-RTGS and the G-CSD systems are interlinked.

BOG issued G-RTGS System Rules and participating agreement which regulates the membership criteria, responsibilities of members, settlement rules, operating procedures of the G-RTGS system. The minimum limit for value of credit transfers in the G-RTGS system is G\$5,000,000. G-RTGS operation has eased the large value and critical payment process in BOG's General Ledger (GL) system. Further, it is expected that the G-RTGS System will enhance the trust and confidence in the payment system as it significantly reduces settlement risk in the payment mechanism. It helps to increase the velocity of money and boost economic activities.

For the first half of year 2023, 2,374 transactions valued at G\$306.0 billion were processed through the G-RTGS system. This showed an increase of 26.1 percent in volume and 17.2 percent in value when compared to the volume of 1,883 and value of G\$261.2 billion for the same period in 2022.

G-CSD System

The G-CSD system allows change of ownership through a simple account transfer versus transferring paper ownership that is vulnerable to human errors. Efficiency gains can materialize as the cost of performing transactions through the G-CSD is more cost effective than performing transactions with certificates of ownership. The electronic recording of securities ownership enables smooth processing of securities transactions to achieve Delivery versus Payment (DvP).

The recording of securities ownership in electronic form also enables efficient usage of those securities as collateral for liquidity support in the G-RTGS system and also for repo and other Open Market Operations (OMO) of BOG.

G-ACH System

The G-ACH system enables electronic clearing and settlement of retail-value payments. It also enables all participants to offer credit transfers that can be used for a variety of retail payment needs, such as salary, bill and tax payments. The G-ACH system comprises two (2) sub-systems, namely the G-EFT and G-ECC systems. The G-EFT system processes transactions below G\$5,000,000 per transaction and up to 1,000 transactions per batch. Recently entities such as Guyana Gold Board (GGB), Guyana Revenue Authority (GRA) and the National Insurance Scheme (NIS) would have commenced using and processing related transactions.

G-ACH System – G-EFT Sub-System

Transactions totaling 646,742 were processed through the G-EFT sub-system in the first half of year 2023 and represented an increase of 18.7 percent when compared with the same period in 2022. The value for 2023 was G\$250.1 billion which represents an increase of 25.3 percent over the value of G\$199.6 billion recorded for 2022.

ACH System – G-ECC Sub-System

During the period January to June 2023, a total of 443,058 low value transactions (LVT) were settled through the National Clearings House (NCH), an increase of 5.1 percent when compared with the volume recorded for the same period in 2022. The volume of high value transactions (HVT) increased by 13.6 percent to 62,497.

Table XXXVIII

	Selected Data on Transactions Cleared through the National Clearing House (G\$ Million)		
	January – June		
	2021	2022	2023
Daily avg. number of LVT	3,325	3,400	3,662
Daily avg. value of LVT	2,086	2,607	3,195
Avg. value of LVT	0.6	0.8	0.9
Daily avg. number of HVT	499	444	517
Daily avg. value of HVT	3,117	2,819	3,380
Avg. value of HVT	6.2	6.3	6.5
Total number of LVT	412,292	421,579	443,058
Total value of LVT	258,604	323,298	386,714
Total number of HVT	61,856	55,002	62,497
Total value of HVT	386,539	349,645	408,957
	LVT - Low Value Transactions		
	HVT - High Value Transactions		

There was an increase in total high-value transactions which rose to G\$409.0 billion. Similarly, the total low-value transactions increased to G\$386.7 billion. The total of LVT and HVT increased by 21.5 percent to reach \$818.0 billion. The shares of HVT in total transactions remained at 51.0 percent. The share of LVT volume fell to 86.58 percent in 2023 from 87.47 percent in the previous period. The average total HVT rose to G\$6.5 million, while the average total LVT rose to G\$0.87 million.

Currently there are ten (10) participants of the NPS, namely: BOG, the six (6) commercial banks, Ministry of Finance (MOF), Guyana Revenue Authority (GRA) and the National Insurance Scheme (NIS).

Mobile and Internet Banking

Mobile and Internet banking services are provided by Mobile Money Guyana Inc. (MMG) and the

Commercial Banks to their customers which allows users to perform financial transactions such as Electronic Funds Transfer (EFT) and utility payments, using digital mode.

The number of Mobile Money accounts for the first half of 2023 increased by 14.4 percent from 45,965 to 52,574.0 while the value of payments increased by 61.5 percent from G\$1,454.5 million to G\$2,349.6 million. The number of merchants accepting mobile money payments also increased from 296 to 446 as at June 2023. MMG's e-wallet increased to G\$900.0 million as at June 2023 from G\$575.0 million.

The use of mobile payment applications and internet banking continues to grow steadily in Guyana's emerging environment.

The use of the electronic VISA switch continued in 2023. The value of transactions settled through the VISA switch increased to G\$3.6 billion at June 2023 from G\$2.3 billion for the same period in 2022.

Cards

Although the majority of payments are still made through cash and cheques in Guyana, transactions through digital payment instruments (ATM, E-Wallet, POS machine, etc.) are gradually increasing.

Reporting and Monitoring

The Bank conducted its oversight through offsite activities with the analysis of monthly reports that included values and volumes of processed transactions.

The implemented and integrated G-RTGS, G-CSD and upgraded the G-ACH (G-EFT & G-ECC) systems have significantly reduced legal, systemic, operational, settlement and liquidity risks of all participants within the payments ecosystem.

Further, with the enactment of the NPS Act 2018 and six (6) supporting Regulations, legal risk was

mitigated. The Bank observed the large value payment components have been in place with irrevocable continuous settlement and hence contributed to alleviate systemic risks. There were minimal failed internal procedures or human errors in the payments, clearing and settlement system. Consequently, operational risk has been at a minimum. In addition, all contractual obligations have been met in the settlement system in a timely manner which relieved settlement, financial and liquidity risks and non-contributed to credit risk.

New Architecture

The current infrastructure has developed over the years and as a result, has technical limitations. These limits restricts the NPS capabilities. Customer needs are rapidly evolving and the current infrastructure, although versatile cannot be responsive to all future user needs. There is a vision for a new architecture for retail interbank payments, popularly known as Fast Payments which is the culmination of a number of initiatives.

The Fast Payments System will allow a payer to send money to a payee conveniently with immediately. Payments can be initiated using a wide variety of entry points including mobile, internet banking, in person at a Bank and delivered to recipients so that those recipients could have access to the funds in the shortest possible time of the transfer.

Usually, Fast Payment System are available continuously throughout the year (24 hours a day, 7 days a week, 365 days a year) with the common use of the ISO 20022 message standard. Fast Payment System is also referred to as Instant Payment or Real-Time Payments System. The Bank expects to complete the implementation of a Fast payment System infrastructure by the end of the first quarter of 2024. This system will further promote inclusion and comprehensive interoperability within the payments ecosystem.

Innovation and Inclusion

The Bank has been engaging in initiatives to ensure the safety and efficiency of Guyana's Payments System. It will continue to support innovation and interoperability for financial inclusion within the payments system for the benefit of the consumers. This will enhance the foundation that has already been laid that requires technical, semantic and business system compatibility so that all users can transact business the electronic payment system both domestically and internationally. This approach will facilitate the use of artificial intelligence, reduce systemic risks and at the same time enhance consumer protection. The Bank continues to place emphasis on interoperability as it will greatly facilitate financial inclusion and reduce the costs associated with traditional cash and paper-based payment instruments.

The Bank further strengthened its internal consumer protection capabilities, and ensured that effective dispute resolution mechanisms are established so that users may resort to affordable and time-efficient means to settle payment-related claims. Moreover, the Bank continued to keep pressure on the payments industry to deploy adequate technological and organizational resources to minimize breaches of information security and privacy.

Connectivity and Cybersecurity

The required fibre optic interconnectivity or networking supported with VPN Devices, linking all participants of the NPS are in place with high level security features to ensure the integrity of the payments system. This service is provided by the National Data Management Authority (NDMA).

Further, the Central Bank has partnered with the Government of Guyana on Cybersecurity in collaboration with the World Bank to further strengthen the current infrastructure, with the aim of gaining confidence and promoting the progressive use of the modern payments system by stakeholders and to move away drastically from the cash oriented culture

that currently exists. The areas of focus is the development of a Cybersecurity Strategy inclusive of Network Security, Asset Management, Server, Database, Applications and Endpoint Security, and Data Protection, among others, which will ensure a robust and reliable cybersecurity infrastructure.

Technology continued to play a critical role in the payment system. There were shifts away from cash to cheques, from cards to online payments and to payments using mobile devices. More businesses are now embracing this changing trend. The use of mobile payment applications and internet banking are increasing. Electronic payments are evolving at a rapid pace with the introduction of new providers and platforms.

FOREIGN RESERVE MANAGEMENT

The Bank continued to be the custodian of the nation's reserves of foreign balances. The Bank has established investment guidelines which were approved by the Board of Directors. Management of the Foreign Assets Reserves is guided by an investment committee chaired by the Governor, and consists of senior managers of the Bank. The Committee considers investment proposals and monitors the risk associated with the investment portfolio.

The Bank's gross foreign assets decreased from US\$932.40 million as at end-December 2022 to US\$735.98 million as at end-June 2023. The decrease in the portfolio was due to higher payment for goods and services during the period. The reserves are divided into two tranches – working balance and investment tranches. The working balance tranche represents 12.42 percent of the portfolio while the investment tranche represents the remaining 87.58 percent.

The working balance tranche comprised mainly deposits with foreign banks (11.39 percent) and foreign currency notes (1.04 percent). The Bank's

investment tranche comprises US treasury bonds (0.72 percent), Supranational bonds (20.97 percent), US Agencies bonds (25.98 percent), Structured Notes (1.75 percent), Emerging market bonds (28.69 percent) and Caribbean bonds (9.46 percent).

The rates of return for these assets ranged from 0.5 percent to 10.0 percent per annum. The annual weighted return for the portfolio was estimated at 2.95 percent as at June 30, 2023 compared with end-December 2022 performance of 2.51 percent.

As a percent of total reserves, US dollar holdings were 92.44 percent. EURO holdings accounted for 6.45 percent while Pound Sterling and SDR holdings accounted for 0.49 percent and 0.60 percent respectively.

NATURAL RESOURCE FUND

The Natural Resource Fund was established by the enactment of the Natural Resource Fund Act 2019, which was passed by the President on January 23, 2019. This act was subsequently replaced with the Natural Resource Fund Act 2021 which was passed in the National Assembly on December 29, 2021 and assented to by the President on December 30, 2021. The Act gives the Bank of Guyana the responsibility for the operational management of the Fund.

A renewed agreement was signed with the Reserve Advisory and Management Partnership (RAMP) of the World Bank on September 30, 2022 for RAMP to provide technical support to the management of the Fund extending the agreement until September 30, 2025. The Bank also signed an updated operational agreement with the Board of Directors of the Natural Resource Fund on January 18, 2023, which details the obligations of the Bank and outlines the management principles. The Bank began managing the Fund in the first quarter of 2020.

The Board of Directors of the Natural Resource Fund at its meeting held on June 26, 2023 approved the updated investment mandate for the Fund. It was

mandated that the funds be maintained in the deposit account held at the Federal Reserve Bank of New York earning overnight deposit interest at the prevailing federal funds rate of 5.05 percent. It was also agreed that the Bank of Guyana will continue to monitor the overnight interest rate and inform the Chairman of any changes by the Federal Reserve Bank to consider redeploying cash.

The Fund opened the year with G\$298.0 billion (US\$1.4 billion). During the first half of the year, the Fund received G\$114.2 billion (US\$547.6 million) from 7 profit oil payments and G\$23.1 billion (US\$110.9 million) from 2 royalty payments.

During the first half of 2023, the Federal Reserve increased its target range for the federal funds rate three times with the current range being 5.00 percent - 5.25 percent. As a result of these increases, along with higher account balances, the Fund was able to earn a higher amount of interest on overnight deposits. For the first half of 2023, the interest earned amounted to G\$7.4 billion (US\$35.6 million) taking the total interest earned since inception to G\$11.1 billion (US\$53.2 million).

A total of G\$83.4 billion (US\$400 million) was transferred from the Fund to the Government of Guyana’s Consolidated Fund account during the first half of the year which accounted for 39.9 percent of the estimated amount budgeted to be withdrawn in 2023 - G\$208.9 billion (US\$1,002 million).

As at June 30, 2023, the Fund totalled G\$359.3 billion (US\$1,723.5 million).

DEPOSIT INSURANCE CORPORATION

The Deposit Insurance Corporation (the Corporation) and Deposit Insurance Fund (DIF/ the Fund) was established under the Deposit Insurance Act 2018 (DIA) to strengthen the financial safety net of Guyana. Through this legislation, the Corporation will operate

under a pay-box plus mandate, with functions and powers crucial to foster financial stability by protecting depositors and assisting the Bank in resolution financing. The core function of the Corporation is to reimburse funds held by insured depositors at a failed member financial institution up to the insured limit of G\$2 million. The Fund is financed through bi-annual premiums contributed by member financial institutions, which are the eight licensed deposit-taking financial institutions, as required under section 29 (1) of the DIA.

The Board of Directors is currently responsible for oversight of the Corporation. As provided for under the DIA, the Bank has entered into an agreement with the Corporation’s Board to share its resources and serve as the investment manager of the Fund, governed by an investment policy. Sharing of supervisory information is also mandated.

In keeping with section 6 (1) of the DIA, the BOG has contributed the authorised capital of G\$300 million to the DIF. Additionally, the Bank has made an initial contribution of G\$500 million to the Fund which was guaranteed by the Ministry of Finance, in accordance with section 28 (1) and (2) of the DIA, and is expected to be repaid in full following the attainment of 5 percent of insured deposits by 2029.

Figure XXVI

For the second bi-annual premium of 2022, member financial institutions have completed payments at the Board approved rate of 0.25 percent, as instructed under section 29 (6) of the DIA, which amounted to G\$463 million. As at June 30, 2023, the aggregate fund stood at G\$3,995 million and accounted for 2.1 percent of average insured deposits over the first half of the year, as the target size of five percent is expected to be achieved before 2029 in accordance with section 27 (1) of the DIA.

The payments for the first bi-annual premium of 2023 were received from member financial institutions between July and August. The premiums have amounted to G\$488 million, which will increase the fund size ratio to an estimated 2.3 percent of the total insured deposits at end-June 2022.

BOG'S FINANCIAL PERFORMANCE

During the first half of 2023, the global economy continued to be affected by supply shortages, rising inflation and hawkish monetary policy measures from major global central banks. The IMF projects global growth for 2023 at 3 percent, a decrease from its previous forecast of 3.5 percent for 2023.

Economic growth was adversely affected by the ongoing Russia-Ukraine War, and the emergence of a potential banking crisis which contributed to supply shortages in the food and energy markets and global financial instability respectively. However, the potential banking crisis was averted, and the US Federal Reserve indicated that poor risk management by the failed banks was evident, elaborating that the banking sector is sound and resilient.

Moreover, the lingering effects of the COVID-19 pandemic, which has generally subsided, and the addition of supply shortages caused by the Russia-Ukraine War exacerbated global inflation causing major central banks to maintain their hawkish monetary policy tone.

During the first half of the year, the US Federal Reserve increased its federal funds target range by 75 bps moving from 4.25-4.5 percent to 5-5.25 percent. The European Union Central Bank and the Bank of England both followed suit as their benchmark interest rates were increased by 150 bps and closed June 30, 2023, at 4 percent and 5 percent respectively. The increase in interest rates by global central banks, has resulted in the global economy benefited from higher yields. Interest rates on 10-year US Treasury notes ranged from 3.30 percent to 3.95 percent over the first half of the year and closed at 3.81 percent on June 30, 2023 while interest rates on overnight deposits at the Federal Reserve Bank closed at 5.03 percent on that date.

Bank of Guyana achieved net profit of G\$1,544 million for the period January 01 – June 30, 2023 against a budgeted profit of G\$660 million. This favourable outturn resulted from the Bank's income being substantially higher than budgeted while containing expenses.

The increased yields on the international bond markets impacted the earnings of the Bank's overseas foreign assets. During the first six months of 2023, BOG exceeded its investment income targets by \$747 million driven mainly by higher interest rates and a higher level of import of goods and services. On the flip side, the Bank did not achieve its income targets from trade of bonds and gold. Elevated gold prices during the period was viewed as a risk which the Bank wanted to mitigate while the high yield environment did not present many opportunities for trading in bonds.

The Bank was able to contain overall expenses during the first six months of 2023. Total cost was lower than budgeted by G\$137 million as the Bank was able to contain cost in most categories of expenditure during the half year. The Bank was also able to contain overall expenses through improved efficiency and prudent spending.

Strong contractionary monetary policy in developed economies to combat high inflation including higher yields are expected to prevail for the second half of 2023. Diversification strategies will be adopted in order to capitalize on investment opportunities arising from the prevailing higher interest rate environment. The Bank will continue to realign its investment portfolio to the changing investment environment to maximise earnings without significantly increasing risk. Due to the above and continued prudent spending, budgetary targets over the next six months are likely to be achieved.

OVERVIEW OF FINANCIAL SYSTEM

As at end-June 2023, a total of G\$1,351 billion in financial sector assets distributed across four (4) sectors and comprised 141 institutions, were regulated by the Bank of Guyana. Financial sector assets remained concentrated among the six (6) commercial banks which accounted for 62.3 percent (G\$841 billion) of total financial sector assets as at end-June 2023. The distribution of the banking sector assets were between the domestic owned and foreign owned institutions – three (3) domestic banks accounting for 51.7 percent (G\$435.4 billion) while the three (3) foreign owned banks accounted for 48.3 percent (G\$406 billion). The Building Society maintained its dominance in the non-bank sector (which comprised seven (7) institutions), which accounted for 14.5 percent (G\$195.4 billion) of total financial sector assets.

Figure XXVII

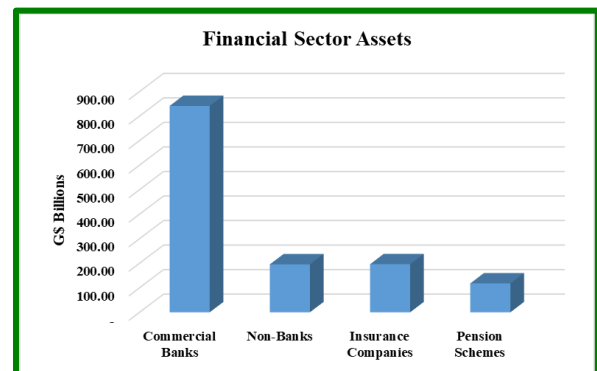

Figure XXVIII

The seventeen (17) insurance companies represented 14.5 percent (G\$196 billion⁴) of the financial sector assets. Twelve (12) of these registered insurance companies were domestic companies and accounted for 95.5 percent (G\$187.1 billion) of the insurance companies' total assets. The five (5) life insurance companies represented 67.9 percent (G\$133.1 billion) of total insurance assets, with the sole foreign company accounting for 1.3 percent (G\$2.5 billion) of the life insurance companies' total assets.

Pension schemes accounted for 8.7 percent (G\$117.9 billion) of financial sector assets regulated by the Bank. At end-June 2023, there were 111 registered pension schemes of which defined benefits plans

⁴ Data on the insurance and pension sectors as at June 30, 2023 are projections.

accounted for 89.9 percent (G\$106 billion) of pension funds.

The financial sector remained a significant contributor to GDP. As at end-June 2023, total financial sector assets were equivalent to 193.4 percent of Guyana’s non-oil GDP. The banking sector assets were equivalent to 120.5 percent of non-oil GDP while the non-banks were equivalent to 28 percent. Insurance companies and pension schemes equated to 28.1 percent and 16.9 percent of non-oil GDP respectively at end-June 2023.

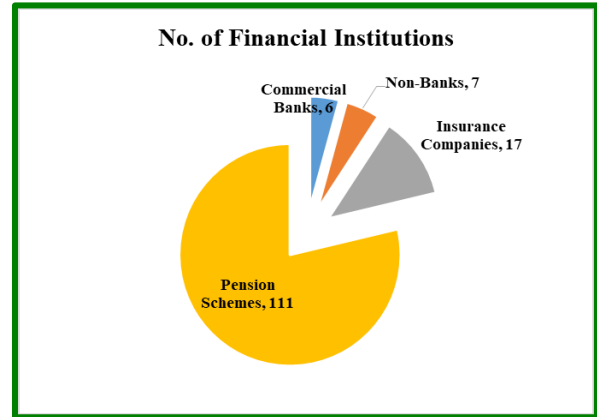

Figure XXIX

The Bank also regulates Money Transfer Agencies (MTAs) and their Agents as well as Cambios. At end-

June 2023, there were three (3) licensed MTAs with 152 agents, and fourteen (14) non-bank Cambios.

Source: Commercial Banks

Notes:

¹⁾ Statutory reserve deposits are included in the calculation of the required liquid assets.

²⁾ Commercial banks' holdings of treasury bills at book value.

³⁾ The Liquid Assets Ratio was temporarily amended to 20 percent of demand liabilities and 15 percent of time liabilities with effect from August 24, 2020 to August 31, 2022 in keeping with the agreement between the Bank of Guyana and the Commercial Banks in relation to COVID-19 supplementary relief measures.

Notes:

- 1) End of period rates.
- 2) The prime lending rate reported by the banks has been weighted by the amount of loans issued at the corresponding rate.
- 3) The average prime lending rate actually used by commercial banks applicable to loans and advances.
- 4) Small savings rate
- 5) Effective November 2009, the mortgage rate for New Building Society is reflected as an average rate.

Sources: Ministry of Finance and Bank of Guyana.

Notes:

1. From year 2017 the capital revenue will follow the MOF format; therefore, the figure will show a reduced amount due to the exclusions of all grants and debt reliefs.
2. Figures revised from 2008 to reflect the computation of Central Government on an accrual basis.

CENTRAL GOVERNMENT: CURRENT REVENUE
(G\$ Million)

Source: Ministry of Finance

¹⁾ Total Current Revenue include funds from the Natural Resource Fund and Guyana REDD Plus Investment Fund.

²⁾ As of 2003, Companies Income Tax includes self-employed, corporation and withholding income taxes.

³⁾ As at March-2017, 'other income tax' will not include capital gains (it was relocated under 'other tax revenue').

⁴⁾ Value Added Tax (VAT) and Excise Tax were implemented on January 01, 2007.

⁵⁾ Revised Figures for 3rd and 4th quarters are not available.

CENTRAL GOVERNMENT: CURRENT EXPENDITURE

Source: Bank of Guyana.

¹⁾ The Government of Guyana made the decision to include publicly guaranteed debt so as to provide a complete picture of the country's debt position. This amount excludes non-interest bearing debentures.

²⁾ In May 2018, the Bank of Guyana commenced issuance of Treasury Bills, on behalf of the Government, for budgetary support.

³⁾ In September 2016, there was an issuance of 20 Non-Negotiable Debenture to NIS with a total value of G\$4,882.4 million, to assist in recovering from losses due to their investment in CLICO.

⁴⁾ Includes the outstanding balance on the NICIL Bond, which was transferred to the books of the Government in December 2020.

⁵⁾ The CARICOM Loan was contracted to finance the construction of the CARICOM Secretariat.

⁶⁾ Comprises the Central Government's gross overdraft with the Bank of Guyana was included in domestic debt with effect from December 2020 in order to regularize and accurately reflect government's liabilities.

⁷⁾ Includes the 5-year syndicated NICIL Bond which was guaranteed by the Government of Guyana in May 2018. In December 2020, a decision was taken to have this Bond transferred to the books of the Central Government. The guarantee of the Deposit Insurance Corporation amount of G\$500 million from June 2019 is also included in this

Source: Bureau of Statistics and Guyana Gold Board.

Notes:

¹ R.A.S.C: Refractory "A" Grade Super Calcined Bauxite

² C.G.B: Chemical Grade Bauxite

³ M.A.Z: Metal Grade Bauxite

⁴ Includes Road Grade Bauxite, Tailings and Capping as well as output by First Bauxite Company for which no specific grade was provided.

⁵ Reflects output of Guyana Goldfields Inc. and Troy Resources Ltd.

PRODUCTION INDICATORS: AGRICULTURE

I. GENERAL NOTES

Symbols Used

- ... Indicates that data are not available;
- Indicates that the figure is zero or less than half the final digit shown or that the item does not exist;
- Used between two period (e.g. 2010-11 or July-September) to indicate the years or months covered including the beginning and the ending year or month as the case may be;
- / Used between years (e.g. 2010/11) to indicate a crop year or fiscal year.
- = Means incomplete data due probably to under-reporting or partial response by respondents.
- * Means preliminary figures.
- ** Means revised figures.

In some cases, the individual items do not always sum up to the totals due to rounding.

Acknowledgement

The Bank of Guyana wishes to express its appreciation for the assistance received from the Ministry of Finance, State Planning Secretariat, Commercial Banks, Bureau of Statistics, some Public Corporations and other Private Sector agencies in the compilation of the data.

II. NOTES TO THE TABLES

TABLE 1.1: Bank of Guyana: Assets

Foreign Assets

Balances with Foreign Banks: Deposits of the Central Bank with Foreign Banks. The data also include holdings of foreign notes and gold. Figures from December 2005 to December 2006 were restated to reflect the audited statements.

Gold Tranche with the I.M.F.: One quarter of Guyana's subscription to the International Monetary Fund (I.M.F.) quota, which comprises gold and/or convertible currencies.

Holdings of Special Drawing Rights: Unused portion of the Special Drawing Rights (S.D.R.s) allocated by the I.M.F.

Money Market Securities: Holdings of short-and long-term debt instruments of foreign governments and the International Bank for Reconstruction and Development (I.B.R.D.) recorded at cost. Figures from December 2005 to December 2006 were restated to reflect the audited statements.

Claims on the Central Government: Holdings of the Government of Guyana Treasury Bills, Debentures valued at cost and Advances from the Bank of Guyana. The Bank of Guyana Act No. 19 of 1998 section 46 has since removed the possibility of advances to Government since it restricted the Central Bank from extending credit directly or indirectly to the Government from that date.

Advances to Commercial Banks: Short term credit to Commercial Banks.

Other Assets: Include fixed assets such as land and buildings, furniture and equipment. Cheques in the process of collection, notes and coins issued by the British Caribbean Currency Board, non-interest-bearing debentures, and other miscellaneous assets are also included.

TABLE 1.2: Bank of Guyana: Liabilities

Currency Issue: Notes and Coins issued by the Bank.

Government Deposits: Current account deposits of the Central Government which includes sterilized amount from open market type operation with effect from 1994.

Deposits of International Organisations: Obligations to the I.M.F.; local currency component of the subscription to the I.M.F. quota; deposits of the I.B.R.D, the Caribbean Development Bank (C.D.B.) and foreign central banks. Other foreign liabilities of the Bank of Guyana are also included.

Bank Deposits-EPDs: Guyana dollar deposits with the Bank of Guyana made by Commercial Banks on behalf of their customers pending foreign exchange releases to meet foreign obligations which fell into arrears prior to 1990. This scheme was discontinued for foreign obligations after 1990.

Bank Deposits-Other: Commercial Banks' reserve deposits which includes statutory reserves with Bank of Guyana are recorded here. With effect from December 1994, special interest earning deposits of the Commercial Banks were discontinued in favour of unremunerated required free reserves.

Other Deposits: Includes deposits of National Insurance Scheme (N.I.S.), Guyana Gold Board (US \$ Deposits), Guyana Energy Agency (GEA) and Linden Economic Advancement among others.

Authorized Share Capital: The enactment of the Bank of Guyana Act No. 19 of 1998 provided for the increase in the capital for the Bank as part of the reform process.

Other Reserves: These reserves include General, Revaluation and Contingency Reserves.

Allocation of S.D.R.'s: Liability accruing from the SDRs allocated to Guyana, which are valued at the equivalent of Guyana dollar amount converted through the S.D.R. /U.S. dollar cross rate.

Other Liabilities: Include provision for accrued expenses, items in transit; private investment fund; and miscellaneous items. The decline in Other Liabilities from November 30, 2002 to December 31, 2002 reflects the charging of valuation changes to Other and Government Deposits.

TABLE 1.3: Bank of Guyana: Currency Notes Issue

Total issue less withdrawal of mutilated or spoiled legal tender notes. With the intent of enhancing the efficiency of the Payment System, the Bank of Guyana introduced a G\$5,000 note in 2013. In celebration of Guyana's 50th Independence Anniversary, the Bank issued a commemorative G\$50 note which was placed in circulation in May 2016.

TABLE 1.4: Bank of Guyana: Coins Issue

Total issue less withdrawals of defaced legal tender coins. The Bank of Guyana as part of its currency reform programme introduced with effect from January 1, 1997, G\$10, G\$5, G\$1 coins as legal tender and removed from the specie the use of cents. In observance of Guyana's 50th Republic Anniversary, the Bank issued a commemorative \$10,000 coin and a circulation \$100 coin which were launched on August 26, 2020.

TABLE 2.1(a): Commercial Banks: Assets

Balances due from Banks abroad: Deposits of Commercial Banks with Non-Resident foreign banks included head offices and branches.

Loans to Non-Residents: Commercial Bank lending to Non-Resident customers.

Due to re-classification at a Commercial Bank, figures for Private Sector and Non-Resident loans have been revised from December 2000 to May 2002. In keeping with the Monetary Financial Statistics Manual (MFSM), figures for loans to Non – Residents, Private Sector and Public Financial Enterprises include accrued interest with effect from December 2002.

Other Foreign Assets: Include foreign currency holdings and all other claims on Non-Residents by Commercial Banks. Due to reclassification at a Commercial Bank figures for Public Sector Other and Foreign Sector Other were revised from September 2002 to February 2003.

Securities: The total volume of Central Government Treasury Bills recorded at cost and

debentures held by commercial banks. In keeping with the Monetary Financial Statistics Manual (MFSM), figures for Securities include accrued interest from Dec. 2002.

Loans: Central Government borrowing from the Commercial Banks. See note above under loans to Non-Residents.

Public Enterprises: Loans and Advances extended by Commercial Banks to Public Financial Business Enterprises. Public Non-Financial Enterprises are defined as enterprises in which Government owns above 50 per cent of the share capital. See note above under loans to Non – Residents.

Other: Commercial Banks' claims on Local Government and the National Insurance Scheme. See note above under loans to Non-Residents

Non-Bank Financial Institutions: Loans issued to Public and Private Non-Bank Financial Institutions by Commercial Banks'. See note above under loans to Non-Residents

Private Sector: Lending through loans and advances to Private Non-Financial Business Enterprises and Individual Customers. See note above under loans to Non-Residents. The decline in Private Sector Loans and Advances resulted partly from a reclassification of some loans at one Commercial Bank. See note above under loans to Non-Residents.

The acquisition of Guyana National Co-operative Bank (GNCB)'s assets net of loans valued G\$8,473.0 million by the National bank of Industry and Commerce Limited on March 15' 2003 resulted in the decline in Private Sector Loans and Advances during March 2003.

Deposits with Bank of Guyana: Include statutory reserve deposits and interest earning deposits of the Commercial Banks. Effective December 28, 1994, interest-earning deposits were discontinued.

External Payment Deposits (E.P.D): Guyana dollar deposits with the Bank of Guyana made by Commercial Banks on behalf of their customers, pending foreign exchange releases to meet external obligations.

Currency: Commercial Banks' holdings of local notes and coins.

Other Assets: Include balances due from other Commercial Banks, Real Estate Mortgage Loans, fixed assets such as land and building, furniture, equipment and other miscellaneous assets.

TABLE 2.1(b): Commercial Banks: Liabilities, Capital and Reserves

Balances due to Other Banks abroad: Foreign claims made on local Commercial Banks by Head Offices and other banks abroad.

Non-Resident Deposits: Total deposits made by Non-Resident customers with Commercial Banks. In keeping with the Monetary Financial Statistics Manual (MFSM), figures for deposits to Non-Residents, Private Sector and Public Financial Enterprises include accrued interest with effect from December 2002.

Other: Include all other foreign claims on Commercial Banks.

Central Government Deposits: Total demand, time and savings deposits made by the Central Government with Commercial Banks. See note above under deposits to Non-Residents.

Public Enterprise Deposits: Total demand, time and savings deposits made by Public Non-Financial Enterprises with the Commercial Banks. Due to the sale of Aroaima Bauxite

Company to the government and a reclassification of its accounts from the Private to Public Sector, figures from January 2002 to April 2002 have been revised. See note above under deposits to Non-Residents.

Other Public Deposits: Include total deposits of Local Government and National

Insurance Scheme. See note above under deposits to non-residents. See note on Table 2.4 Commercial Banks: Time Deposits.

Non-Bank Financial Institutions Deposits: Consist of total deposits made by Public and Private Financial Institutions. See note above under deposits to Non-Residents. See note on Table 2.4: Commercial Banks: Time Deposits.

Private Sector Deposits: Include total demand, time and savings deposits of Private non-financial Business Enterprises and individual customers. See note above under Public Enterprises Deposits. See note above under deposits to non-residents.

External Payment Deposits: Comprise customers' deposits (public and private sector) with commercial banks on account of External Liabilities prior to 1990 and awaiting foreign exchange releases from the BOG.

Bank of Guyana: Commercial Bank short-term borrowing from the Bank of Guyana.

Other Liabilities: Other liabilities of the Commercial Banks include manager's cheques, acceptances, provision for taxes and other miscellaneous liabilities.

Capital and Reserve: The acquisition of Guyana National Co-operative Bank (GNCB)'s assets net of loans valued G\$8,473.0 million by the National Bank of Industry and Commerce Limited (now Republic Bank Guyana Limited) on March 15, 2003 resulted in the decline in the capital and reserve of the banking systems during March 2003.

TABLE 2.2: Commercial Banks: Total Deposits

Total demand, savings and time deposits of Residents and Non-Residents excluding inter-bank deposits are presented. Foreign currencies denominated deposits are also included here. See note under Public Enterprises Deposits for Table 2.1 (b) above. See note under Non – Resident Deposits for Table 2.1(b) above.

TABLE 2.3: Commercial Banks: Demand Deposits

Current account deposits of Residents and Non-Residents; inter-bank deposits are excluded. See note under Public Enterprises Deposits for Table 2.1 (b) above.

TABLE 2.4: Commercial Banks: Time Deposits

Fixed deposits of Residents and Non-Residents with a minimum withdrawal notice of three months; exclude inter-bank deposits. See note under Non-Resident deposits for Table 2.1(b) above. Due to a reclassification of N.I.S and Non-Bank Financial Institutions' time deposits, figures from December 2003 to April 2005 were revised.

TABLE 2.5: Commercial Banks: Savings Deposits

Deposits with minimum withdrawal notice of one day; exclude inter-bank deposits. See note under Public Enterprises Deposits for Tables 2.1 (b) above. See note non-resident deposits for Table 2.1(b) above.

TABLE 2.6: Commercial Banks: Time Deposits by Maturity

Includes deposits of both Residents and Non-Residents. See note under Commercial Banks: Time Deposits for table 2.4 above.

TABLE 2.7: Commercial Banks: Savings Deposits

Includes deposits by both Residents and Non-Residents. Ending balance on savings accounts for November 2002 do not equate to the opening balance for December 2002 due to the addition of accrued interest to the December 2002 opening balance. The ending balance for February 2003 saving accounts differs from the opening balance for March 2003 due to the reclassification from demand and time accounts to saving accounts.

TABLE 2.9: Commercial Banks: Clearing Balances

Comprise total amount of cheques cleared by and debited to the accounts of the Commercial Banks. A National Clearing House was established at the Bank of Guyana during 1998 whereby large (in excess of G\$500,000) and small valued cheques are cleared. Data recorded after 1998 in this table reflect the value of small valued cheques cleared over the reporting period.

TABLE 2.10 (a): Commercial Banks: Total Loans and Advances

The data include Loans and Advances to Residents and Non-Residents. Real Estate Mortgage Loans and inter-bank loans are excluded. The total of loans and advances to the private sector differs from total credit to the private sector in Table 3.1(Monetary Survey). The totals for credit to the private sector in Table 3.1 include local securities, other credit instruments and real estate mortgage loans. Due to a reclassification by two Commercial Banks, figures for Private Sector Credit have been revised from January 2012 to March 2013.

See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

TABLE 2.10(b): Commercial Banks: Total Loans and Advances

The data covers total Loans and Advances to Residents and Non-Residents including Real Estate Mortgage Loans effective December 2001. Due to a reclassification by two Commercial Banks, figures for Private Sector Credit and Real Estate Mortgage loans have been revised from January 2012 to March 2013.

TABLE 2.11: Commercial Banks: Demand Loans and Advances

The data cover lending for short periods including overnight loans to Residents and Non-Residents and exclude inter-bank loans. Due to a reclassification by two Commercial Banks, figures for Private Sector Credit and Real Estate Mortgage loans have been revised from January 2012 to March 2013. See note under Private Sector for Table 2.1(a) above.

TABLE 2.12: Commercial Banks: Term Loans and Advances

The Loans and Advances are for longer periods extended to Residents and Non-Residents; inter-bank lending is excluded. Due to a reclassification by two Commercial Banks, figures for Private Sector Credit and Real Estate Mortgage loans have been revised from January 2012 to March 2013. See note under Private Sector for Table 2.1(a) above. See note under loans to Non-Residents for Table 2.1(a) above.

TABLE 2.13: Commercial Banks: Loans and Advances to Residents by Sector

The data provided record balances at the end of the respective period and therefore indicates the indebtedness of the respective industries at the end of the reporting period. The value of credit obtained by each industry for a given period can be obtained by taking the difference between the balances at the end of the desired period and that immediately preceding. The balances in this table exclude inter-bank loans, real estate mortgage loans, local securities and other credit instruments. It should be noted that gross indebtedness of the sugar and rice industry can be obtained by adding the balances of sugar cane and sugar and molasses manufacturing of sugar,

and paddy and rice milling for rice respectively. Figures under the 'other purposes' sub-category has been reclassified to exclude credit card transactions effective from March 2007. Due to a reclassification by two Commercial Banks, figures under the Private Sector have been revised from January 2012 to March 2013. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

TABLE 2.14: Commercial Banks: Liquid Assets

The liquid assets comprise Bank of Guyana notes and coins, foreign currency held by banks, (special interest earning) deposits held at the Bank of Guyana (BOG), balances due from other Commercial Banks - both local and foreign, Government of Guyana Treasury Bills. The special reserves deposits (SRDs) established in 1969, discontinued in 1994 as the Bank of Guyana sought to develop its capacity to manage the excess reserves of the bank more effectively. Approximately, 75-80 per cent of the SRDs were absorbed through a sale of three year, variable rate, and fixed date debenture to the Commercial Banks.

Prior to March 1989, the legally required level of liquid assets to be held by the Commercial Banks against their deposit liabilities was calculated as the sum of 20 percent of demand liabilities and 15 percent of time liabilities. During the period March 31, 1989 to May 15, 1991 the determination of the required liquid assets held by the banks was based on actual holdings on specified dates. Accordingly, from March 31, 1989 to June 30, 1990 required liquid assets were stipulated as the actual holdings on March 15, 1989. Between July 30, 1990 and February 19, 1991 the required liquid assets was based on the assets held by the banks on September 30, 1989. Further, between February 20, 1991 and May 14, 1991 the required balances were set as at the end of July 30, 1990.

With effect from May 15, 1991, however, the basis for calculating required liquid assets was changed to 25 percent of demand liabilities and 20 percent of time liabilities. Further, amendments to the liquid asset requirements became effective on 26th, October 1998. The liquid assets base period has been redefined as the Monday to Friday workweek immediately preceding the liquid asset maintenance period. The liquid asset requirement is determined by applying the prescribed percentages to the weekly average of the daily liabilities balances at the close of business of each of the five days of the liquid asset base period. Figures for Treasury Bills were reclassified from December 2000 to December 2002.

The Liquid Assets Ratio was temporarily amended to 20 percent of demand liabilities and 15 percent of time liabilities with effect from August 24, 2020 – December 31, 2020 in keeping with the agreement between the Bank of Guyana and the Commercial Banks in relation to COVID-19 supplementary relief measures.

TABLE 2.15: Commercial Banks: Minimum Reserve Requirements

Prior to May 16, 1991, the minimum required reserves of the Commercial Banks were calculated as 6 percent of demand liabilities and 4 percent of time liabilities. Their percentages were changed with effect from May 16, 1991, to 11 percent of demand liabilities and 9 percent of time liabilities. Commencing April 7, 1994, the minimum required reserves of the Commercial Banks were again revised to the sum of 16 percent of demand liabilities and 14 percent of time liabilities.

On June 29, 1998, in addition to Commercial Banks, other licensed Financial Institutions were required to maintain balances with the Central Bank against their deposits and other liabilities. Further, the required reserve period has been changed on Monday to Friday workweek instead of the Wednesday to Thursday week used previously. The required reserve period has been referred to as the reserve base period. The week following the current reserve base period, i.e. the reserve maintenance period is also based on the Monday to Friday workweek. The deposits and other liabilities to which the required reserve ratio(s) are applied are referred to as the reserve base. During the reserve maintenance period, all licensed Financial Institutions subject to reserve requirement are required to maintain reserves against the relevant deposit and other liabilities.

Effective February 1, 1999, the required reserve ratio applicable to all liabilities of licensed Financial Institutions was lowered to twelve per cent (12 %). The first reserve base period for which

the revised requirements became relevant was the 1st to 5th February 1999 while the reserve maintenance period was the 8th to 12th February 1999. However, reserve balances for the Non-Bank licensed Financial Institutions are excluded from table 2.15.

The Reserve Requirement Ratio was temporarily amended to 10 percent with effect from August 24, 2020 – December 31, 2020 in keeping with the agreement between the Bank of Guyana and the Commercial Banks in relation to COVID-19 supplementary relief measures.

TABLE 2.16(a): Foreign Exchange Intervention

This comprises Bank of Guyana's purchases and sales of US Dollars to the Commercial Banks.

TABLE 2.16(b): Interbank Trade

This comprises foreign currency (US, Euro, Pounds Sterling and Canadian) purchases and sales amongst the Commercial Banks.

TABLE 2.17: Commercial Banks holdings of treasury bills

These are short-term government securities held by the Commercial Banks with maturities of 91 days, 182 days and 364 days. Data are at face value.

TABLE 3.1: Monetary Survey

A consolidation of the balance sheets of the Bank of Guyana and Commercial Banks.

Foreign Assets (net)

Bank of Guyana: Gross foreign assets **less** gross foreign liabilities.

Commercial Banks: Gross foreign assets **less** gross foreign liabilities. See note under Loans to Non-Residents for Table 2.1 (a) above.

Domestic Credit

Government (net): Gross lending to Central Government by the banking system (a sum of Holdings of debentures, bonds, Treasury Bills and loans and advances **less** total deposits of the Central Government).

Public Enterprise (net): Gross borrowing by Non-Financial Public Enterprises from the banking system **less** their deposits. See notes under Public Enterprises Deposits for Table 2.1 (b) and Commercial Banks: Time Deposits for Table 2.4 above.

Other Public Sector (net): Gross borrowing from the banking system by local authorities and municipalities **less** their total deposits and other Public Sector funds. See note under loans to Non-Residents for Table 2.1(b) above.

Non-Bank Financial Institution (net): Gross borrowing from the banking system by the non-bank financial intermediaries with the banking system **less** their deposits. See notes under loans to Non-Residents for Table 2.1(b) and Commercial Banks: Time Deposits for Table 2.4 above.

Private Sector: Gross borrowing from the banking system. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

Money and Quasi-Money

Money: Currency outside banks **plus** private sector demand deposits, managers' cheques and acceptances. See note under Public Enterprises Deposits for Table 2.1 (b) above

Currency: Currency issue (Table 1.2) **less** currency holdings by Commercial Banks (Table 2.1(a)).

Quasi-money: Time and savings deposits held by the Private Sector. See note under Public Enterprises Deposits for Table 2.1 (b) above.

Demand deposits: Balances of the Private Sector including managers' cheques and acceptances. See note under Public Enterprises Deposits for Table 2.1 (b) above.

Savings and Time deposits: Balances held by Private Sector. See note under Loans to Non- Residents for Table 2.1 (a) above.

Other (net): Includes the net sum of all assets and liabilities of the Bank of Guyana and the Commercial Banks not shown elsewhere.

TABLE 4.1: Guyana: Selected Interest Rates

Reflects interest rates at Commercial Banks and Non-Bank Financial Institutions on loans and deposits. The small savings rate represents an arithmetic average of savings deposit rates as reported by the Commercial Banks. Treasury bill rates for all maturities reflect rates at the end of the reporting period. Special deposits have been discontinued with effect from December 1994.

TABLE 4.2: Commercial Banks: Selected Interest Rates

Arithmetic average of interest rates as reported by the Commercial Banks.

TABLE 4.3: Comparative Treasury Bills Rates and Bank Rates

The average discount rate on three month Treasury Bills for the U.K., U.S.A., Barbados, Trinidad, Guyana and Jamaica. The U.K. and U.S. rates are the average discount rates at the last tender in each month. The rates for the CARICOM territories are those rates of monthly tender held towards

TABLE 5.1: The New Building Society: Assets and Liabilities

Assets

Foreign Assets: Includes holdings of foreign assets.

Cash and Deposits: Holdings of cash and total deposits (demand, time and savings) at Commercial Banks.

Government of Guyana Treasury Bills: Holdings of Treasury Bills recorded at book value.

Government of Guyana Securities: Holdings of debentures and defence bonds at book value.

Government of Guyana Debentures: Holdings of debentures at book value.

Local Authorities Securities: Bonds at book value.

Liabilities

Share Deposits: A total of Five Dollar and Save and Prosper Share deposits.

Other Deposits: Ordinary Saving deposits

TABLE 5.2 (a): Trust Companies: Assets

Trust Companies reflect the consolidated operations of Trust Company (Guyana) Limited and Hand-In-Hand Trust.

Cash: Currency (local notes and coins) held by the institution.

Deposits: Balances of savings and time deposits at Bank of Guyana and the Commercial Banks.

Government of Guyana Treasury Bills: Recorded at book value.

Local Government Securities: Recorded at book value.

TABLE 5.2 (b): Trust Companies: Liabilities

Deposits – Business Firms: Balances held by private sector businesses.

Deposits – Individual Customers: Balances held by private individuals.

Deposits – Other Customers: Balances held by other private sector agencies including non-financial organizations.

TABLE 5.2 (c): Finance Companies: Assets

Finance Companies reflect the consolidated operations of Secure International Finance Company, Beharry Stock Brokers Limited and one merchant bank.

Cash: See note under Cash for Table 5.2 (a) above.

Deposits: Balances of savings and time deposits at Commercial Banks.

Private Sector Shares: Ownership of equity such as bonds, bills, shares etc. in private companies.

TABLE 5.2 (d): Finance Companies: Liabilities

Loans: Loans received from Companies' affiliates.

Capital and Reserves: Includes retained earnings and reserves.

Deposits – Other Customers: Balances held by other private sector agencies including non-financial organizations.

TABLE 5.3: Domestic Insurance Companies: Assets and Liabilities

The data covers four life insurance companies: Demerara Mutual Life Assurance Company; Guyana and Trinidad Mutual Life Insurance Company; Hand-In-Hand Mutual Life Insurance Company and North American Life Insurance Company Limited and five non-life insurance companies: Demerara Fire Insurance Company, . Guyana and Trinidad Mutual Fire Insurance Company; Hand-In-Hand Mutual Fire Insurance Company, North American Fire Insurance Company Limited and Diamond Fire and General Insurance Company.

Assets

Foreign Commercial Bank Deposits: Deposits held in Foreign Commercial Banks.

Foreign Securities: Holdings of the Government of the United Kingdom and CARICOM countries and other foreign securities.

Other Foreign Assets: Balances due from reinsurance abroad, and other foreign assets.

Government of Guyana Debentures: Holdings are recorded at book value.

Local Government Securities: Holdings are recorded at book value.

Securities in Firms: Holdings of commercial bills, shares and other securities recorded at book value.

Liabilities

Life Insurance Fund: Insurance premia received.

Foreign Liabilities: Claims by non-residents, balances due to insurance companies abroad, non-resident life insurance funds and other liabilities.

TABLE 5.4: Pension Schemes: Assets and Liabilities

Assets

Foreign Sector: Includes foreign deposits and foreign securities.

Government of Guyana Treasury Bills: Holdings recorded at book value.

Government of Guyana Debentures: Holdings recorded at book value.

Local Government Securities: Holdings of Local Government Securities recorded at book value.

Liabilities:

Pension Fund: Receipts from the twenty-seven pension funds in Guyana which submit returns to the Bank of Guyana.

TABLE 6.1 Central Government Finances: Summary

Current Revenue: The data include collection of taxes, other charges and fees. The data are recorded on a cash basis.

Current Expenditure: The data includes interest payment, interest

charges and other expenditure. Repayment of Principal is not included. The data are recorded on a cash basis.

Current Surplus/Deficit: Current revenue **less** current expenditure.

Capital Receipts: These include proceeds from sale of assets and external grants.

Capital Expenditure: Investment expenditure; the data also include net transfers and lending to the public enterprises for financing development projects.

Overall Surplus/Deficit: The total of current revenue and capital receipts **less** the total of current and capital expenditure.

Borrowing from abroad:

Net short term: Gross borrowing with a maturity of up to 1 year **less** repayment of principal.

Long term net borrowing: Gross borrowing with a maturity of over 1 year **less** repayment of principal.

Domestic Borrowing:

Borrowing from the banking system (net): The banking system holdings of Government debentures, bonds, Treasury Bills and loans and advances **less** Government deposits.

Non-bank borrowing: Borrowing outside the banking system. Short-term (net) includes Treasury bill holdings **less** redemptions and local suppliers' credits. Long-term (net) borrowing comprises holdings of debentures and development bonds **less** redemptions. Holdings of debentures and Treasury Bills by sinking funds are excluded.

Other Financing: Comprises mainly accumulated arrears on external debt repayment, rescheduling of debt and financing from counterpart funds.

TABLE 6.4 Public Corporations Finances: Summary

The table summarizes the financial operations of the public corporations and companies. All data from 1990 are based on cash flow statements. Prior to 1990 the data were on an accrual basis.

TABLE 7.1 Domestic Public and Publicly Guaranteed Debt

Comprises Government of Guyana Defence Premium Bonds, Guymine Bonds, Debentures, Treasury Bills and Publicly Guaranteed Debt.

Defence Premium Bonds: These are non-interest bearing savings certificates of six months duration. They are no longer used to raise funds. Data are at face value.

NICIL Bond: In May 2018, the GOG guaranteed a 5-year syndicated NICIL Bond not exceeding \$30 billion, of which \$17.6 billion was issued. In December 2020, a decision was taken to have this Bond transferred to the books of the Central Government.

Government of Guyana Debentures: These are long term government securities with maturities in excess of one year. Figures are at face value.

Government Treasury Bills: These are short-term government securities with maturities of 91 days, 182 days and 364 days. Data are at face value.

In May 2018, the Bank of Guyana commenced issuance of Treasury Bills, on behalf of the Government, for budgetary support.

Other: Includes the Central Government's gross overdraft with the Bank of Guyana, which was

included in domestic debt with effect from December 2020 in order to regularize and accurately reflect government's liabilities.

Publicly Guaranteed Debt: The Government of Guyana made the decision to include publicly guaranteed debt so as to provide a complete picture of the country's debt position. Includes the 5-year syndicated NICIL Bond which was guaranteed by the Government of Guyana in May 2018. In December 2020, a decision was taken to have this Bond transferred to the books of the Central Government. The guarantee of the Deposit Insurance Corporation amount of G\$500 million from June 2019 is also included in this category.

TABLE 7.2

Government of Guyana: Treasury Bills by Holders

The holdings of Treasury Bills are recorded at face value. Consequently, figures in this table will differ from those reported in the balance sheet of the Bank of Guyana, Commercial Banks and Non-Bank Financial Institutions, which are recorded at book value.

Other Financial Institutions: Consist of non-bank financial institutions viz:- building societies, insurance companies, trust companies and pension funds.

Public Sector: Include Public Enterprises, National Insurance Scheme, other funds and sinking funds.

Private Sector: excludes financial institutions.

Non-residents: include foreign missions and organizations.

TABLE 7.3

Government of Guyana: Debentures by Holders and Other Debt

The holdings of Debentures and Defence Bonds are at face value. The debentures are long term government securities with maturities in excess of one year. Non-interest bearing debentures held by the Bank of Guyana are excluded. The Defence Bonds have a six-month duration. They are no longer issued.

TABLE 7.4

Government of Guyana: Debentures by Maturities and Terms

Data include all fixed date, equated annuity and special issues; at face value.

Fixed Date Debentures: These debentures have fixed dates for payments of principal and interest.

Special Issues: Comprise fixed date and equate annuity debentures issued to Bank of Guyana and the National Insurance Scheme. In 1994 the Central Bank absorbed between 75 percent to 80 percent of the excess reserves of the banking system, through a forced sale of a long term (3 years) variable rate fixed date debenture. The interest is calculated at a rate of point five percent (0.5 %) per annum above the regular three month treasury bill yield rate averaged over the calendar months prior to the interest due date. In 2003, the Government of Guyana made a special issue of debentures to the National Bank of Industry and Commerce (NBIC) (now Republic Bank (Guyana) Limited) to capitalize the Guyana National Co-operative Bank (GNCB) at the time of its privatization.

TABLE 7.5

External Public Debt

The data comprise the stock of Central Government and Government guaranteed debt outstanding, Bank of Guyana's debt is excluded.

Bilateral Debt: Debt contracted with foreign investments.

Multilateral Debt: Debt contracted with international lending institutions such as the World Bank, the Inter-American Development Bank, the Caribbean Development Bank and the European Investment Bank.

Financial Institutions Debt: These debts include borrowing from foreign commercial banks and specialized official lending agencies.

Suppliers Credit: Obligations to suppliers for deferred payment after delivery of goods and/or services.

Nationalization Debt: Amounts owing to foreigners in compensation for nationalized assets.

TABLE 8.1(a) Imports by End-Use

The data are compiled on a cost-insurance-freight (c.i.f.) basis as recorded on customs returns. Figures for all commodities are compiled by the Bureau of Statistics and forwarded to the Bank of Guyana.

TABLE 8.2 Domestic Exports

The data are compiled on a free-on-board (f.o.b.) basis as recorded on customs returns. Figures for all commodities are compiled by the Bureau of Statistics and forwarded to the Bank of Guyana.

TABLE 8.5 International Reserves and Foreign Assets

International Reserves

Bank of Guyana Foreign Assets: Data include gold holdings, balances with foreign banks, foreign notes, foreign cash in the process of collection, gold tranche with I.M.F., S.D.R. holdings and money market securities.

Bank of Guyana Foreign Liabilities: Data include total short-term current liabilities, short-term liabilities in arrears and total medium liabilities in arrears. The liabilities include interest obligations. Rescheduled short-term liabilities are excluded.

Foreign Assets

Bank of Guyana Foreign Assets: The composition of the assets is identical to that of International Reserves Foreign Assets above.

Bank of Guyana Foreign Liabilities: Data include all short-term liabilities (current, arrears and rescheduled) and all medium term liabilities (current, arrears and rescheduled). The liabilities include interest obligations.

Commercial Banks' Foreign Assets: Data include foreign currencies in banks, net balances due from Head Offices and other branches abroad, balances due from other banks abroad, foreign treasury bills and securities and credit to non-residents.

Commercial Banks' Foreign Liabilities: Data include net balances due to Head Offices and other branches abroad, balances due to other banks abroad and deposits of non-residents. See note under Loans to Non-Residents for Table 2.1(a) above.

TABLE 8.7 Balances of Payments

Exports: The data are compiled on a free on board (f.o.b.) basis as recorded on customs returns. Data for all commodities are compiled by the Bureau of Statistics and forwarded to the Bank of Guyana. The Conversion rate is an average rate for the period for the United States Dollar against the Guyana Dollar.

Imports: The data are compiled on a cost-insurance-freight (c.i.f.) basis as recorded on customs

returns. Data for all commodities are compiled by the Bureau of Statistics and forwarded to the Bank of Guyana. The Conversion rate is an average rate for the period for the United States Dollar against the Guyana Dollar.

TABLE 8.8 Balances of Payments (BPM6)

With effect from June 2023, the Bank of Guyana began publishing data on Guyana's Balance of Payments using the methodologies and presentation of the IMF's BPM6

Exports: The data are compiled on a free on board (f.o.b.) basis.

Imports: The data are now compiled on a free on board (f.o.b.) basis.

Services: Previously called Non-Factor Services. The data now includes Government goods and services previously recorded under Current Transfers.

Primary Income: Previously called Factor Services.

Secondary Income: Previously called Current Transfers. Remittances by Foreign Embassies now recorded as Government goods and services under the Services Account.

Financial Account: Consists of:

Direct Investment: Previously referred to as Foreign Direct Investment.

Portfolio Investment:

Other Investment: Other investment includes currency & deposits, loans, insurance, trade credits and other.

TABLE 8.9 International Investment Position

With effect from December 2019, the Bank of Guyana began reporting data on Guyana's International Investment Position.

Direct Investment: Direct Investment includes equity investment and debt investment.

Portfolio Investment: Portfolio Investment includes equity and debt securities.

Other Investment: Other investment includes currency & deposits, loans, insurance, trade credits and other.

TABLE 9.1 Changes in Bank of Guyana Transaction Exchange Rates

The Guyana dollar was fixed in Pound Sterling at the rate of £1 to G\$4.80 until October 1975 when it was linked to the US\$1 to G\$2.55.

On June 2, 1981, the Guyana dollar was pegged to a composite basket of currencies consisting of the United States dollar, Pound Sterling, Deutsche Mark, Trinidad and Tobago dollar and the Japanese Yen. The exchange rates was fixed at US\$1 to G\$3.00. The US dollar was the intervention currency used to determine the exchange rate.

From January 11, 1984, the composite basket of currencies was adjusted to include the Pound Sterling, Deutsche Mark, Japanese Yen, French Franc and the Netherlands Guilder, the US dollar, although nor part of the revised basket, remained as the intervention currency. The United States dollar/Guyana dollar exchange rate was announced weekly. From October 1984 until January 1987, the exchange rate was maintained in the range of G\$4.15 to G\$4.40 per US dollar.

Effective January 19, 1987, the Guyana dollar was devalued to G\$10 to US\$1, effective from April 3, 1989 the Guyana dollar was devalued moving from G\$33 per US\$ to US\$1. On June 15, 1990, the Guyana dollar was devalued from G\$33.00 per US\$ to G\$45.00 per US\$. Transactions for this rate were confined to payments in respect of oil imports and external debt

services and proceeds from sugar and rice exports.

On February 21, 1991, the Guyana dollar was devalued from G\$45.00 to US\$ to G\$101.75 thereby unifying the official exchange rate with the market determined rate prevailing at that date. The US dollar continued to be the intervention currency. From February 25, 1991, the exchange rate was fixed on a weekly basis. During the period February to September 1991, the exchange rate was determined by the previous week free market exchange rate of the Commercial Banks and Non-Bank dealers.

From October 1991, the average weighted daily exchange rate was telegraphic transfers for the three largest Commercial Banks was utilized to determine the exchange rate for the Bank of Guyana daily transactions.

TABLE 9.2(b) Exchange Rate (G\$/US\$)

The end of period exchange rate is the weighted official rate used by the Bank of Guyana for transactions. The period average exchange rate reflects the weighted average rate for the respective periods.

TABLE 9.5: Monthly Average Market Exchange Rate

On March 13, 1990, the authorities established the cambio system for foreign currency transactions. Under the system, transactions in the cambio market were conducted freely with licensed dealers (banks and non-banks) setting the rate at which foreign exchange could be bought and sold. The rates are referred to as the market exchange rates. Data collection for the Euro started in January 2004.

The buying rate is a weighted average of the purchase rates of all licensed foreign exchange dealers for the month.

The selling rate is a weighted average of the sales rates of all licensed foreign exchange dealers for the month.

The mid-rate is the average buying and selling rates of all licensed foreign exchange dealers. The rate is based on transactions in foreign notes only.

TABLE 10.1 Gross Domestic Product (at Current Basic Prices)

GDP compiled at current basic prices, for the respective year, is the production of goods and services undertaken by firms, households, government bodies within the borders of the country during a calendar year, at the amount receivable by the producer from the purchase of a unit of good or service less any tax payable, plus any subsidy receivable as a consequence of its production or sale.

TABLE 10.2 Gross Domestic Product (at 2012 Prices)

Real GDP – taking the quantities of goods and services produced (at the current basic year) and priced at the base year of 2012 prices, it is therefore adjusted for any variation in prices (inflation or deflation).

TABLES 10.3 National Production

This accounts for the major commodities that account for a significant portion of national production and economic activities within a calendar year. It is sourced from the Bureau of Statistic (BOS) as well as the respective industries, such as for rice: Guyana Rice Development Board, sugar: GUYSUICO, forestry: Guyana Forestry Commission and gold: Guyana Gold Board, etc.

Table 11.1 Georgetown: Urban Consumer Price Index

The Urban Consumer Price Index measures the overall level of price movement for a specified basket of consumer goods and services in the urban area. It is compiled and computed by the Bureau of Statistics, and the basket is made up of nine (9) sub-categories, (this table highlights four: Food, Housing, Transport & Communication and Miscellaneous), which comprises of 217 items (goods and services). The current base year is December 2009.

Table 11.2 CARICOM Countries: Consumer Price Indices

This table reflects the consumer price movements for selected CARICOM countries (current base year 2010).
