Commercial banks' interest earning deposits and statutory reserve deposits with Bank of Guyana are recorded here. With effect from December 1994, special interest earning deposits of the Commercial Banks were discontinued in favour of unremunerated required free reserves. The removal of remuneration for these deposits coincided with the issue of three-year debentures to sterilise the prevailing excess liquidity levels of banks.

The data provided record balances at the end of the respective period and therefore indicates the indebtedness of the respective industries at the end of the reporting period. The value of credit obtained by each industry for a given period can be obtained by taking the difference between the balances at the end of the desired period and that immediately preceding. The balances in this table exclude inter-bank loans, real estate mortgage loans, local securities and other credit instruments. It should be noted that gross indebtedness of the sugar and rice industry can be obtained by adding the balances of sugar cane and sugar and molasses

manufacturing of sugar, and paddy and rice milling for rice respectively. See note under Loans to Non-Residents for Table 2.1(a) above. See note under Private Sector for Table 2.1(a) above.

TABLE 2.14: Commercial Banks: Liquid Assets

The liquid assets comprise Bank of Guyana notes and coins, foreign currency held by banks, (special interest-earning) deposits held at the Bank of Guyana (BOG), balances due from other Commercial Banks - both local and foreign, Government of Guyana Treasury Bills. Special deposits are stated according to Bank of Guyana records. The special reserves deposits (SDRs) established in 1969, discontinued in 1994 as the Bank of Guyana sought to develop its capacity to manage the excess reserves of the bank more effectively. Approximately, 75-80 percent of the SDRs were absorbed through a sale of three years, variable rate, and fixed date debenture to the Commercial Banks.

Prior to March 1989, the legally required level of liquid assets to be held by the Commercial Banks against their deposit liabilities was calculated as the sum of 20 percent of demand liabilities and 15 percent of time liabilities. During the period March 31, 1989 to May 15, 1991 the determination of the required liquid assets held by the banks was based on actual holdings on specified dates.

Accordingly, from March 31, 1989 to June 30, 1990 required liquid assets were stipulated as the actual holdings on March 15, 1989. Between July 30, 1990 and February 19, 1991 the required liquid assets was based on the assets held by the banks on September 30, 1989. Further, between February 20, 1991 and May 14, 1991 the required balances were set as at the end of July 30, 1990.

With effect from May 15, 1991, however, the basis for calculating required liquid assets was changed to 25 percent of demand liabilities and 20 percent of time liabilities.

Further, amendments to the liquid asset requirements became effective on October 26, 1998. The liquid assets base period has been redefined as the Monday to Friday workweek immediately proceeding the liquid asset maintenance period. The liquid asset requirement is determined by applying the prescribed percentages to the weekly average of the daily liabilities balances at the close of business of each of the five days of the liquid asset base period. Figures for Treasury Bills were reclassified from December 2000 to December 2002.

TABLE 2.15: Commercial Banks: Minimum Reserve Requirements

Prior to May 16, 1991, the minimum required reserves of the Commercial Banks were calculated as 6 percent of demand liabilities and 4 percent of time liabilities. Their percentages were changed with effect from May 16, 1991, to 11 percent of demand liabilities and 9 percent of time liabilities. Commencing April 7, 1994, the minimum required reserves of the Commercial Banks were again revised to the sum of 16 percent of demand liabilities and 14 percent of time liabilities.

On June 29, 1998, in addition to Commercial Banks, other licensed financial institutions were required to maintain balances with the Central Bank against their deposits and other liabilities. Further, the required reserve period has been changed to Monday to Friday workweek instead of the Wednesday to Thursday week used previously. The required reserve period has been referred to as the reserve base period. The week following the current reserve base period, i.e. the reserve maintenance period is also based on the Monday to Friday workweek. The deposits and other liabilities to which the required reserve ratio(s) are applied are referred to as the reserve base. During the reserve maintenance period, all licensed financial institutions subject to reserve requirement are required to maintain reserves against the relevant deposit and other liabilities.

Effective February 1, 1999, the required reserve ratio applicable to all liabilities of licensed financial institutions was lowered to twelve percent (12 %). The first reserve base period for which the revised requirements became relevant was the 1st to 5th February 1999 while the reserve maintenance period was the 8th to 12th February 1999. However, reserve balances for the non-bank licensed financial institutions are excluded from table 2.15.

TABLE 9.1 Changes in Bank of Guyana Transaction Exchange Rate

The Guyana dollar was fixed in Pound Sterling at the rate of £1 to G\$4.80 until October of 1975 when it was linked to the US\$ at the rate of US\$1 to G\$2.55.

On June 2, 1981, the Guyana dollar was pegged to a composite basket of currencies consisting of the United States dollar, Pound Sterling, Deutsche Mark, Trinidad and Tobago dollar and the Japanese Yen. The exchange rate was fixed at US\$1 to G\$3.00. The US dollar was the intervention currency used to determine the exchange rate.

From January 11, 1984 the composite basket of currencies was adjusted to include the Pound Sterling, Deutsche Mark, Japanese Yen, French Franc and the Netherlands Guilder. The US dollar, although not part of the revised basket, remained as the intervention currency.

The United States dollar/Guyana dollar exchange rate was announced weekly. From October, 1984 until January 1987, the exchange rate was maintained in the range of G\$4.15 to G\$4.40 per US dollar.

Effective January 19, 1987 the Guyana dollar was devalued to G\$10.00 per US\$1.00, effective from April 3, 1989 the Guyana dollar was devalued moving the exchange rate to G\$33 to US\$1. On June 15, 1990 the Guyana dollar was devalued from G\$33 per US\$ to

G\$45 per US\$. Transactions for this rate were confined to payments in respect of oil imports and external debt services and proceeds from sugar and rice exports.

On February 21, 1991 the Guyana dollar was devalued from G\$45 to US\$1 to G\$101.75 thereby unifying the official exchange rate with the market determined rate prevailing at that date. The US dollar continued to be the intervention currency. From February 25, 1991 the exchange rate was fixed on a weekly basis. During the period February to September, 1991, the exchange rate was determined by the previous week free market average rate of the commercial banks and non-bank dealers.

From October 1991 the average weighted daily exchange rate of telegraphic transfers for the three largest commercial banks was utilised to determine the exchange rate for the Bank of Guyana daily transactions.

Table 9.2(b) Exchange Rate (G\$/US\$)

The Period End and Period Average Exchange Rates relate to the Bank of Guyana Transactions Rate.

Table 9.6 Monthly Average Market Exchange Rate

On March 13, 1990 the authorities established the cambio system for foreign currency transactions. Under the system, transactions in the cambio market were conducted freely with licensed dealers (banks and non-banks) setting the rate at which foreign exchange could be bought and sold. The rates are referred to as the market exchange rates.

The buying rate is an unweighted average of the purchase rates of all licensed foreign exchange dealers for the month.

The selling rate is an unweighted average of the sales rates of all the licensed foreign exchange dealers for the month.

The mid-rate is the average of the buying and selling rates of all the licensed foreign exchange dealers.

The rates are based on transaction in foreign notes only.
