1. OVERVIEW

Global growth slowed from 3.6 percent in 2018 to 3.3 percent in the first quarter of 2019 as economic activities moderated in the advanced, emerging and developing countries. This was due to increase in trade tensions and tariff hikes between the US and China, decline in business confidence, tightening of financial conditions and higher policy uncertainty across many economies from difficulties in reaching agreement on contentious issues.

Guyana's economic growth during the first quarter of 2019 is reflective of uneven sectoral performances. The agriculture sector registered increases in the output of forestry, fishing and other crops which were attributed to greater productive capacities as well as favourable market conditions. Sugar experienced a shortfall in production with restructuring of the Guyana Sugar Corporation (GUYSUCO). The rice industry contracted due to significant rice bug infestation as well as increased costs for inputs.

The mining & quarrying sector registered lower production during the period under review. The gold industry experienced a decline in declaration by the foreign gold mining companies while there were increased declarations by the local small & medium scale gold miners. Bauxite outturn plummeted on account of industrial unrest at RUSAL mining operations.

The construction sector experienced accelerated public & private investments. The outturn in the services sector was reflective of activities in the real estate and

storage subsectors. Preliminary estimates suggest that the activities of the petroleum industry has capitalized economic activities, particularly in the construction and services sectors during the first quarter of 2019.

The performance of the manufacturing sector was mixed with increased production of ice cream, margarine and non-alcoholic beverages while there was decreased output of oxygen, liquid pharmaceuticals, acetylene and nitrogen gas.

The inflation rate (year to date) was somewhat flat at 0.1 percent at the end of March 2019. This marginal uptick resulted from the increase in food price. There were declines in the price indices of housing (which comprises fuel and power), as well as transport & communication.

The overall balance of payments recorded a lower deficit of US\$71.2 million at the end of March 2019 compared to US\$94.0 million for the same period last year. This was primarily due to a higher capital account surplus. The capital account surplus resulted from increased foreign direct investments mainly on account of the oil and gas sector at end March 2019.

The overall value of transactions on the foreign exchange market increased by 23.5 percent or US\$444.7 million to US\$2,339.6 million. Transactions in the licensed bank and non-bank cambios, hard currency and foreign currency accounts were largely responsible for this outcome. In contrast, money transfer and soft currency transactions recorded lower values. Total purchases were greater than sales, resulting

in a net purchase of US\$53.5 million. The Bank's weighted mid-rate, which is the reference for official transactions, was unchanged at G\$208.50 during the first quarter of 2019.

The overall public sector recorded a surplus compared to a deficit for the corresponding period in 2018. The outturn was from the Central Government with a surplus of G\$7,215 million, and the Non-Financial Public Enterprises with a smaller deficit of G\$386 million.

The stock of public debt, which comprises both external and domestic debt, declined by 2.1 percent to US\$1,660 million compared to the end-December position. Domestic debt stock increased to G\$81,808 million or US\$392 million primarily from an increase in the stock of 364-day treasury bills by G\$3,500 million during the review period. Domestic debt service payments fell to G\$683 million and accounted for 1.3 percent of government revenue which was far below the prudential liquidity measure.

The stock of external debt declined to US\$1,268 million as a result of lower loan disbursements from the Inter-American Development Bank (IADB) and the EximBank of China. External debt service payments, which accounted for 6.7 percent of export earnings, increased by 2.8 percent primarily due to higher interest payments to multilateral creditors.

The monetary aggregates of reserve money fell by 2.4 percent while that of broad money expanded by 0.7 percent. The former was

mainly due to decreases in the net foreign assets and net domestic assets of the Bank while the latter reflected increases in net domestic credit and net foreign assets which counterbalanced a decline in other items (net)¹. Private sector credit grew marginally by G\$27 million compared with a decline of G\$4,462 million one year ago. The weighted average lending rate remained unchanged while the treasury bills rates declined during the review period.

The financial resources of the Non-Bank Financial Institutions (NBFIs), which includes depository and non-depository financial institutions, increased by 4.6 percent to G\$280,710 million. The sector's share of total assets in the financial sector increased marginally from 34.8 percent to 35.7 percent.

The financial system remained relatively stable during the first quarter with the Licensed Depository Financial Institutions (LDFIs) being adequately capitalised, highly liquid and profitable. Capital Adequacy Ratios (CAR) continued to exceed the prudential 8 percent benchmark. Asset quality remained acceptable, with a slight improvement in non-performing loans when compared with the first quarter of 2018.

The conduct of monetary policy continued to focus on price stability while ensuring adequate level of liquidity in the system to provide for private sector credit and economic growth. The Bank continued to use treasury bills in its primary Open Market Operations. At the end of the first quarter of 2019, treasury bills issued for monetary

purpose amounted to G\$5,160 million. Additionally, the Bank continued to facilitate efficient intermediation through the issuance of notes and coins. Payment system reform continued with the implementation of a new Payments System Act and the modernization of the Payment System Infrastructure which includes the Real Time Gross Settlement (RTGS) and Central Securities Depository (CSD). □

2. REVIEW OF THE FIRST QUARTER OF 2019

PRODUCTION

Guyana's economic growth is reflective of uneven sectoral performances. The agricultural sector experienced growth in forestry on account of higher output of sawnwood and roundwood by 63.0 percent and 12.7 percent respectively and was attributed to favourable market conditions. Output of logs fell by 5.4 percent due to lower demand. Fish catches increased by 15.5 percent and was driven by the operation of more fishing vessels. Output of other crops, such as fruits & vegetables, increased to satisfy local and foreign demand. Sugar output declined by 34.3 percent with the restructuring of GUYSUCO while rice output declined by 9.3 percent due to rice bug infestation and increased costs for inputs.

The mining & quarrying sector registered lower production, reflecting a decline in declaration of gold by 4.9 percent. This outturn was due to lower output by the two foreign gold mining companies by 15.0 percent. Troy Resources output declined by 40.4 percent while Guyana Goldfields Inc. output increased marginally by 1.0 percent. In contrast, the local gold miners' declarations was higher by 3.6 percent. Moreover, the gold industry experienced a 2.0 percent decline in its average export price. The production of bauxite contracted by 24.4 percent due to major industrial unrest at RUSAL operations. The production of Chemical Grade Bauxite (CGB) and Metallurgical (MAZ) decreased by 47.2 percent and 24.1 percent respectively.

Construction activities increased from higher private & public investments. The outturn in the services' sector was reflective of activities in the real estate and storage subsectors. Preliminary estimates suggest that the activities of the petroleum industry has capitalized economic activities, particularly in the construction and services sector during the first quarter of the year.

The manufacturing sector registered mixed performance. Production of ice cream, margarine and non-alcoholic beverages expanded by 37.6 percent, 20.7 percent and 19.1 percent respectively. Conversely, output of oxygen, liquid pharmaceuticals, acetylene and nitrogen gas decreased by 60.1 percent, 26.2 percent, 16.6 percent and 8.5 percent respectively.

INFLATION

The inflation rate (year to date) was flat at 0.1 percent at the end of March 2019 mainly due to a 1.1 percent increase in the price index of the food category. However, there were decreases in the price indices of transport & communication by 0.6 percent and housing by 0.3 percent (which comprises fuel and power).

BALANCE OF PAYMENTS

The overall balance of payments recorded a lower deficit of US\$71.2 million compared to a deficit of US\$94.0 million for the same period last year. This was primarily due to a higher capital account surplus. The higher surplus on the capital account resulted from increased foreign direct investments mainly

on account of the oil and gas sector at end March 2019.

The current account deficit expanded to US\$403.9 million from US\$274.8 million in the previous year. This resulted from a larger merchandise trade deficit of US\$132.3 million from US\$159.1 million recorded in the corresponding period last year. This reflected a 29.8 percent growth in imports to US\$632.2 million. Merchandise imports expanded by US\$145.0 million mainly due to importation from the growing oil and gas sector in the categories of intermediate goods and capital goods by US\$96.6 million and US\$56.6 million respectively. The importation of consumption goods declined by 8.1 percent. Merchandise export receipts increased by 3.9 percent or US\$12.8 million which stemmed from higher exports of rice, gold, sugar and timber by US\$ 22.4 million, US\$ 10.7 million, US\$ 2.9 million and US\$ 0.2 million respectively.

The services account recorded a higher deficit of US\$234.1 million, an increase of 1.1 percent or US\$2.6 million from one year ago. This resulted from a rise in the payments for non-factor services, especially for services related to the oil and gas industry; and for freight and commercial services. Factor services deficit rose by 29.7 percent to US\$27.1 million. Net unrequited transfers increased by 4.9 percent or US\$5.7 million to US\$121.4 million.

The capital account registered a larger surplus of US\$337.7 million from US\$210.3 million in 2018 on account of greater inflows to the private sector in the form of foreign direct investment. Inflows from bilateral and multilateral agencies decreased by 37.5 percent to US\$11.5 million.

The overall deficit was financed by debt relief received from the Government of Kuwait as well as a drawdown on the gross international reserves of the Bank of Guyana. BOG international reserves amounted to US\$515.8 million and is equivalent to 1.7 months of import cover at the end of the first quarter.

The overall balance of payments deficit is expected to widen on account of a large current account deficit despite a surplus on the capital account. The current account deficit is expected to expand due to an increase in the merchandise trade deficit from higher imports due to the expanding oil and gas industry. The capital account is projected to register a higher surplus resulting from inflows to the private sector through foreign direct investments.

FOREIGN EXCHANGE MARKET

Foreign currency transactions increased by 23.5 percent to US\$2,339.3 million compared with US\$1,895.0 million in the first quarter of last year. Total purchases and sales were US\$1,196.5 million and US\$1,142.8 million respectively. Net purchases was US\$53.5 million.

Hard currency purchases and sales by the Bank of Guyana were US\$148.6 million and US\$151.7 million respectively compared with US\$78.2 million and US\$164.0 million respectively, for the same period in 2018. The increase in purchases stemmed from increased revenues from gold, GUYSUCO and other income. Fuel imports represented the largest category of payments, amounting to 61.0 percent. The Bank purchased foreign currency to the tune of US\$35.3 million and sold US\$0.5 million to commercial banks in the first quarter of 2019.

The debits and credits of authorized foreign currency accounts at commercial banks were US\$466.8 million and US\$481.4 million respectively. The Guyana dollar vis-à-vis the United States dollar depreciated by 0.3 percent to G\$214.41. The Bank's weighted mid-rate, which is the reference for official transactions, was unchanged at G\$208.50 during the first quarter of 2019. The un-weighted rate experienced a depreciation of 0.4 percent, from G\$213.16 at the end of December 2018 to G\$214.03 at the end of March 2019.

PUBLIC FINANCE

The overall financial position of the public sector moved from a deficit to a surplus during the review period. The outturn resulted from both the Central Government's and Non-Financial Public Enterprises' operations, reflecting with current revenues.

Central Government

The Central Government overall balance amounted to a surplus of G\$7,215 million from a deficit of G\$1,779 million at end-Mar 2018. This position was on account of a G\$6,559 million increase in current revenue and a G\$746 million decline in current expenditure. This resulted in a current account surplus of G\$6,713 million from a deficit of G\$591 million the previous year.

Total current revenue increased by 14.3 percent to G\$52,504 million. This performance reflected greater collection of VAT & excise taxes by 7.0 percent to G\$21,711 million, income taxes by 22.4 percent to

G\$21,610 million, trade taxes by 12.8 percent to G\$4,997 million, and other tax revenues by 8.7 percent to G\$1,829 million. In addition, non-tax revenues grew by 24.9 percent to G\$2,356 million.

Total current expenditure (including interest charges) declined by 1.6 percent to G\$45,791 million, mainly due to a fall in transfer payments by 22.1 percent to G\$18,343 million. On the other hand, employment costs and other goods & services increased by 14.8 percent and 33.3 percent respectively. In addition, total interest charges increased by 3.1 percent to G\$2,797 million, due to increased external interest payments by 11.0 percent to G\$2,358 million; however, domestic interest charges decreased by 25.3 percent to G\$439 million.

Total capital revenue (including grants & debt relief) increased by 88.6 percent to G\$7,605 million, which resulted entirely from grants & debt relief received, since there was no local capital receipts during the review period. Grants for non-project increased by 235 percent to G\$6,368 million, whereas grants for projects declined by 15.0 percent to G\$867 million. Debt relief under the Enhanced HIPC (E-HIPC) initiative increased by 0.3 percent to G\$370 million.

Central Government financing amounted to G\$5,172 million for net domestic financing and G\$2,043 million for net external financing.

Non-Financial Public Enterprises

Non-Financial Public Enterprises (NFPEs) recorded a lower deficit of G\$386 million at end-Mar 2019 compared to a deficit of G\$6,094 million at end-Mar 2018. This position was as a result of increased total receipts by 10.3 percent to G\$28,048 million and a reduction in total expenses by 9.8 percent to G\$28,434 million.

Current receipts grew by 10.3 percent to G\$28,048 million. This was on account of increases in local sales by 3.6 percent to G\$12,659 million, receipts from debtors by 9.9 percent to G\$6,384 million, export sales by 7.7 percent to G\$1,125 million, VAT refunds by 0.1 percent to G\$576 million, and other income receipts by 26.6 percent to G\$7,305 million. The performances reflected Guyana Power & Light (GPL) Inc.'s local sales and the financing GUYSUCO received from the National Industrial and Commercial Investments Limited/Special Purpose Unit's (NICIL/SPU) syndicated bond.

Total expenditure decreased by 9.8 percent to G\$28,434 million. Non-interest current expenditures declined by 9.6 percent to G\$27,104 million, due to reductions in

payment to creditors, employment costs, material & supplies and freight by G\$1,667 million, G\$1,863 million, G\$61 million, and G\$299 million respectively. Conversely, there were increased spending for repairs & maintenance and other current expenditures that amounted to G\$230 million and G\$7,556 million respectively. Capital expenditure contracted by 31.0 percent to G\$1,050 million owing to declines in capital spending by GPL by G\$379 million.

In specific, the National Insurance Scheme's overall deficit reduced to G\$261 million at end-Mar 2019 from a deficit of G\$296 million at end-Mar 2018. This was reflective of increased current receipts by 7.8 percent to G\$5,843 million.

Furthermore, NFPEs' financing position amounted to net domestic savings of G\$47 million and net external advances of G\$433 million.

PUBLIC DEBT

The total stock of public debt, which comprises both external and domestic debt, declined by 3.0 percent to US\$1,660 million from US\$1,712 million at end-December 2018. The stock of domestic debt grew by 1.6 percent to G\$81,808 million compared with G\$80,552 million at end-December 2018 while the stock of external public debt fell by 4.1 percent to US\$1,268 million. Domestic debt stock was higher as a result of an increase in the stock of 364-day treasury bills by 5.4 percent or G\$3,500 million at end-March 2019. In contrast, the stock of 182-day treasury bills fell by 31.5 percent or G\$2,000 million while there was no issuance of the 91-

day treasury bill during the review period. There were five (5) treasury bill auctions during the first quarter of which four were issued for budgetary support, totalling G\$26,500 million. In addition, the stock of debentures fell by 2.9 percent to G\$8,049 million from G\$8,293 million for the corresponding period last year.

The decline in the stock of external debt resulted mainly from lower bilateral debt stock by 10.4 percent or US\$52 million. This outcome was primarily as a result of a US\$50.7 million debt cancellation from Kuwait during the first quarter of 2019. The debt reduction which represents 75.0 percent of total interest accrued is to be used for the development of social projects, according to the debt settlement agreement. The outstanding amount in both interest arrears and principal repayment will be paid in equal instalments and the balance by way of a debt swap between the two countries. Furthermore, total loan disbursements declined by 42.5 percent to US\$11 million, compared with the corresponding period in 2018.

Domestic debt service payments declined by 17.9 percent to G\$683 million when compared to the corresponding period in 2018. This was due to a significant reduction in interest payments for the 364-day treasury bills by 38.8 percent or G\$139 million from the corresponding 2018 level, as a result of a decline in the yield as well as lower redemption. The average yield for 364-day treasury bills that matured during the review period dropped by 83 basis points. In addition, interest payments for 182-day treasury bills fell by 17.9 percent to G\$29 million.

External debt service payments rose by 2.8 percent to US\$25 million due mostly to higher principal and interest payments to multilateral creditors. Debt repayments to the IADB and Caribbean Development Bank (CDB) increased by 3.1 percent and 7.1 percent respectively to US\$8 million and US\$3 million respectively, accounting for a total of 90.2 percent of total debt repayments by multilateral creditors and 42.9 percent of total external debt service. For bilateral creditors, debt repayments to the EximBank of China increased by 6.8 percent, accounting for 39.2 percent of total debt service during the review period. Indicators of liquidity risks remained well below the respective thresholds. The external debt service ratio was 6.7 percent, while the external debt service to revenue ratio was 9.9 percent.

MONETARY DEVELOPMENTS

The decrease in net domestic assets resulted from a 2.4 percent decline in both liabilities to the commercial banks and currency in circulation.

Broad money increased by 0.7 percent or G\$2,687 million due to an increase in net domestic credit and net foreign assets which offset a decline in other items (net) respectively. Net domestic credit and net foreign assets were higher by 3.9 percent or G\$9,904 million and 0.3 percent or G\$462 million while other items (net) declined by 28.6 percent or G\$7,697 million respectively.

The growth in broad money was reflected in an expansion in quasi money while narrow money declined. Quasi money, which consists of time and savings deposits, grew by 1.8 percent to reach G\$223,932 million with time and savings deposits increasing by 13.3 percent and 0.6 percent respectively. In contrast, narrow money, consisting of currency in circulation, private sector demand deposits and cashiers' cheques & acceptances, was lower by 0.7 percent resulting mainly from a 52.7 percent and 2.4 percent reduction in cashiers' cheques & acceptances and currency in circulation while demand deposits rose by 8.0 percent.

Net domestic credit of the banking system expanded by 3.9 percent to G\$263,608 million from the December 2018 level of G\$253,705 million on account of higher credit to the public sector.

Private sector credit grew marginally by G\$27 million compared with a decline of G\$4,462 million one year ago. This position reflected increases in credit to the other services sector, construction & engineering, mortgage loans and household sectors. Loans to these sectors increased by 6.2 percent, 4.3 percent, 2.6 percent and 0.9 percent respectively. Conversely, credit extended to the manufacturing, distribution,

mining, the other category of the private sector² and agriculture sectors fell by 9.3 percent, 6.8 percent, 5.8 percent, 3.3 percent and 2.8 percent respectively.

The public sector (net) credit position worsened by 17.6 percent to G\$64,417 million from G\$54,758 million at end December 2018 mainly on an account of a worsening of central government net credit position. Net credit to central government was higher by 8.6 percent or G\$8,872 million to G\$112,527 million at the end of March 2019. The public enterprises remained a net depositor increasing by 9.6 percent while the other category of public sector, which includes local government deposits, declined by 14.5 percent at the end of March 2019.

The net foreign assets of the banking system expanded marginally by 0.3 percent to US\$808.5 million. This was due mainly to a 5.3 percent increase in the net foreign assets of the commercial banks while that of the Bank of Guyana fell by 2.4 percent. At the end of March 2019, the commercial banks' net foreign assets stood at US\$296.1 million while that of the Bank of Guyana was US\$512.3 million.

The overall liquidity of the banking system increased by 4.1 percent to G\$125,146 million mainly on account of an increase in the balances due from other banks abroad. However, the ratio of excess liquid assets to total liquid assets increased from 30.2 percent at end-December 2018 to 32.6 percent at end-March 2019.

² Comprises investments in local securities and shares & other equity in local companies.

There were marginal movements in interest rates during the review period. The yields on the 182-day and 364-day treasury bills declined by 7.0 basis points and 28.0 basis points to 0.89 percent and 0.95 percent respectively. In contrast, the 91-day treasury bill yield remained unchanged at 1.54 percent due to the non-issuance of the bill during the review period. The small savings rate and the weighted average time deposit rate fell by 4.0 basis points and 11.0 basis points to 1.00 percent and 0.99 percent respectively. The weighted average lending rate remained unchanged at 10.02 percent while the prime lending rate of the commercial banks fell by 2.38 percentage points to 10.63 percent.

The financial resources of the Non-Bank Financial Institutions (NBFIs), which includes depository and non-depository financial institutions, increased by 4.6 percent to G\$280,710 million. The sector's share of total assets in the financial sector increased marginally from 34.8 percent to 35.7 percent.

The increase in the NBFIs' assets resulted from all sources of funds. Insurance premiums and other liabilities which comprises capital and reserves increased by 10.2 percent or G\$590 million and 7.8 percent or G\$9,251 million respectively. Pension funds and deposits were also higher by 2.3 percent or G\$1,494 million and 1.6 percent or G\$826 million respectively. Foreign liabilities which accounted for 10.2 percent, grew marginally by 0.2 percent or G\$58 million to G\$28,717 million.

Investments in all sectors increased during the period under review. Claims on the non-resident sector expanded by 15.7 percent or G\$8,289 million resulting mainly from increased holdings of other foreign securities (which excludes debentures and treasury bills). Investments in the public sector and the acquisition of other assets were also higher by 6.9 percent or G\$455 million and 6.6 percent or G\$2,222 million respectively. Claims on the banking system, which accounted for 14.1 percent of total assets, expanded by 2.2 percent or G\$872 million while investments in the private sector grew marginally by 0.3 percent or \$382 million.

FINANCIAL STABILITY ASSESSMENT

Capital

The aggregate capital adequacy ratio (CAR) for the LDFIs was 31.03 percent at end-March 2019, a 1.08 percentage points decline from the 32.11 percent recorded at end-March 2018. The reduced ratio resulted from the net effect of a 7.71 percent (G\$5,917 million) growth in qualifying capital, against an 11.48 percent (G\$27,445 million) increase in risk-weighted assets.

Asset Quality

The LDFIs non-performing loans (NPLs) to total loans were 10.9 percent during the review period, a slight improvement of 0.7pp when compared with the corresponding period in 2018. The foregoing change resulted from the 0.6 percent contraction in NPLs and a 6.1 percent expansion in total loans. NPLs remained concentrated in the business enterprises sector at 68.0 percent of the LDFIs aggregate NPLs, with the services sub-sector representing 40.2 percent. The

agriculture sub-sector reflected a 30.1 percent decline while the mining and quarrying, and services sub-sectors increased by 20.0 percent and 3.9 percent respectively when compared with end-March 2018 levels. The ratio of provision for loan losses to NPLs fell from 47.0 percent at the end of March 2018 to 38.9 percent at the end of March 2019, due to the 17.8 percent reduction in provision for loan losses.

Exposure³ to the top twenty borrowers amounted to G\$68,071 million, 7.2 percent above end-March 2018 level as four of the eight LDFIs increased exposure to the industry's top twenty borrowers. The ratio of top twenty borrowers' exposure to total exposure however, only moved marginally from 15.5 percent at the end of March 2018 to 15.6 percent at the end of March 2019.

Earnings

For the first quarter of 2019, aggregate operating income of the LDFIs amounted to G\$9.4 billion, 3.1 percent above the end-March, 2018 level. The growth in operating income was as a result of increases in other operating income, fees & commissions and interest income by 29.0 percent, 5.4 percent and 4.6 percent respectively. The foregoing increase were partly offset by a 15.1 percent decline in foreign exchange gains.

The LDFIs' aggregate operating expenses grew by less than one percent to G\$5.2 billion, resulting mainly from a 6.4 percent increase in salaries & other staff costs. During the first quarter of 2019, LDFIs also wrote-off (net of recoveries) G\$81 million in bad debts, contributing to lower levels of

provision for loan losses this quarter compared to the previous year's level. In addition, interest expenses and other operating expenses contracted by 3.7 percent and 3.2 percent respectively below the previous year's level.

The 4.6 percent expansion in interest income, stemmed from increases in five institutions' interest income, while six of the eight LDFIs contributed to the 3.7 percent reduction in interest expense.

Net income before tax was 6.5 percent over the end-March 2018 level at G\$4.3 billion, while net income after tax reflected a 1.3 percent (G\$38 million) increase to G\$3.1 billion over the same comparative period. This quarter, five LDFIs reflected profits above their March 2018 level.

Liquidity

The average level of liquid assets held by the LDFIs amounted to G\$157.3 billion, 3.7 percent below the average level recorded for the corresponding period last year. This decline was mainly due to decreases in local treasury bills, marketable obligations and net balances due from local LDFIs. However, deposits with BOG were above the corresponding 2018 level.

MONETARY POLICY

Bank of Guyana's monetary policy continued to focus on the attainment of price stability while ensuring adequate level of liquidity to provide for private sector credit and economic growth. The Bank seeks to allow the expansion of broad money along a path consistent with projections for output and

³ Exposure includes loans, overdrafts, debentures, bonds, securities, and off-balance sheet items.

inflation. Thus, weekly targets for broad money are translated into targets for base money using the money multiplier. To achieve these weekly base money targets, the Bank focuses on the effective management of excess liquidity in the financial system through its Open Market Operations (OMOs). The Bank may also purchase and sell foreign currency to achieve its primary objective.

During the review period, reserve money declined by G\$4,482 million compared with an increase of G\$2,148 million for the corresponding period in 2018. There were two (2) issues of treasury bills for monetary purpose, amounting to G\$5,160 million while redemptions of bills issued for monetary purpose amounted to G\$20,160 million. Treasury bills were issued when reserve money exceeded the targeted levels and was deemed likely to adversely affect the economy.

Additionally, purchases from and sales to the commercial banks by the Bank amounted to US\$35.3 million and US\$0.5 million respectively, during the review period.

The inter-bank market activities, which also provide an indication of the total liquidity condition of the financial system, had two (2) trades during the review period. The value of funds traded on the market amounted to G\$1.5 billion. In comparison, there were nine (9) trades, amounting to G\$8.9 billion on the inter-bank market during the first quarter of 2018.

BANK ACTIVITIES

Currency Operations

The Bank has a statutory obligation to issue the country's notes and coins under Section 21(1) of the Bank of Guyana Act No. 19 of 1998. This obligation was discharged through the Currency Division of the Operations Department. The total supply of currency in the first quarter of 2019 registered an increase of 12.6 percent from G\$61.8 million notes to G\$69.6 million notes over the corresponding period in 2018. The increase was due to a higher opening stock.

Notes

The total value of currency notes in circulation (including notes held in the vaults of commercial banks) at the end of the first quarter of 2019 amounted to G\$106.5 billion, an increase of 11.4 percent when compared with a circulation of G\$95.6 billion in the first quarter of 2018. The share of the G\$5000 note in total value of notes in circulation increased to reach 82.8 percent from 79.4 percent in 2018. The share of the G\$1,000 note decreased to 13.5 percent from 16.6 percent while that of the G\$500 notes decreased to 1.3 percent from 1.5 percent in the previous year. The G\$100 decreased to 1.6 percent from 1.7 percent and \$50 remained at 0.1 percent. The \$20 notes also remained at 0.7 percent.

The policy of ensuring that only acceptable quality notes are in circulation continued. This was achieved by regular withdrawals of mutilated, defaced or otherwise poor quality notes and replacing them with new notes. Mutilated, defaced and poor quality notes amounting to G\$110.3 million were submitted for replacement in the first

quarter of 2019 compared with G\$132.7 million for the corresponding period in 2018.

Coins

Coins issued by the Bank amounted to G\$1,086 million at the end of the first quarter of 2019, an increase of 2.8 percent above the G\$1,056 million recorded at the end of the corresponding period in 2018. The share of the G\$10 coin (45.3 percent) in the total value of coins in circulation was 7 percentage points more than that of the G\$5 coin (38.3 percent). The G\$1 coin continued to have the lowest share of coins in circulation (16.4 percent). In terms of the total quantity of coins issued, the G\$1 coin accounted for a 57.3 percent share. The shares of G\$5 and G\$10 coins accounted for 26.8 percent and 15.8 percent respectively.

Payments System

During the first quarter of 2019, low-value transactions (LVT) settled through the National Clearing House (NCH) amounted to 221,026 - an increase of 1.2 percent when compared with the volume recorded for the corresponding period in 2018. The volume of high-value transactions (HVT) increased by 1.5 percent to reach 33,133. The overall value of total transactions decreased by 3.6 percent to G\$301.5 billion when compared to the corresponding period in 2018. High-value transactions increased from G\$190.2 billion to G\$200.4 billion and low-value transactions increased from G\$100.7 billion to G\$101.1 billion in 2019. The share of HVT in total value of transactions increased to 66.5 percent in 2019 from 65.3 percent in 2018. Conversely, the share of LVT decreased to 33.5 percent in 2019 from 34.6 percent in the previous year. The average value of HVT rose by 3.7 percent in 2019 to G\$6.1 million,

while the average value of LVT rose to G\$0.46 million in 2019.

THE GLOBAL ECONOMY

Global growth slowed from 3.6 percent in 2018 to 3.3 percent in the first quarter of 2019 as economic activities moderated in the advanced, emerging and developing countries. This was due to increase in trade tensions and tariff hikes between the US and China, decline in business confidence, tightening of financial conditions and higher policy uncertainty across many economies from difficulties in reaching agreement on contentious issues.

Advanced Economies

Advanced economies grew at 1.8 percent in comparison with growth of 2.2 percent in 2018 reflecting slower prospects for the Euro Area with growth of 1.3 percent. The Euro Area experienced weaker consumer and business sentiments as well as fiscal policy uncertainty while Japan gently grew at 1.0 percent due to natural disasters in the previous quarter. In addition, growing concerns about a no-deal Brexit also likely weighed on investment spending within the Euro Area. The US economy declined to 2.3 percent from 2.9 percent amid tight labor market and strong consumption growth, however, investments appeared to have moderated as the sizable US fiscal stimulus diminished.

Germany's growth weakened at 0.8 percent due to light private consumption and weak industrial production while France's growth was 1.3 percent resulting from the negative impact of street protests. The Canadian economy experienced growth of 1.5 percent while growth in the United Kingdom slowed

to 1.2 percent reflecting the negative effect of prolonged uncertainty about the Brexit outcome.

Headline inflation in advanced economies declined to 1.6 percent while core consumer price inflation- excluding fuel and food prices- remained varied. Inflation in the US was calculated at 2.0 percent while in the United Kingdom it reduced to 1.8 percent. The Euro Area continued to experience stable inflation at 1.3 percent while that of Japan remained stable at 1.1 percent due to stable energy and food prices and continued domestic demand.

The labour market in advanced economies remained smooth. Spain and Italy recorded unemployment levels of 14.2 percent and 10.7 percent respectively. Unemployment in France was 8.8 percent followed by the Euro Area with 8.0 percent. While UK's unemployment stood at 4.2 percent, the US unemployment rate marginally declined to 3.8 percent with Germany at 3.4 percent.

Emerging Economies

Growth in emerging economies decreased marginally to 4.4 percent reflecting lower growth in China and the recession in Turkey, with an important carryover from weaker activity in late 2018, as well as a deepening contraction in Iran. India's growth increased to 7.3 percent followed by China with a growth rate of 6.3 percent. Brazil experienced positive growth of 2.1 percent while Russia and Mexico both grew at 1.6 percent.

Inflation increased in emerging economies to 4.9 percent reflecting developments in a few economies. China's inflation was

approximated at 2.3 percent while inflation in India was high at 3.9 percent reflecting strong demand conditions. Inflation in Brazil remained subdued at 3.6 percent however, Russia's inflation spiked to 5.0 percent reflecting a higher value-added tax rate.

Unemployment in China was 3.8 percent. Russia's unemployment rate was 4.8 percent while Brazil's unemployment was 11.4 percent.

Developing Economies

Developing economies grew at 4.4 percent compared to 4.5 percent in the previous period due to a marginal decline in activities in the trading sector. The favourable commodity prices impacted positively on the Latin American and Caribbean Region resulting in a growth of 1.4 percent.

Inflation in developing countries also increased slightly to 4.9 percent influenced through developments in the geographical group.

Caribbean Economies

Caribbean economies grew at 2.1 percent as its growth prospects partly depends on positive growth developments in the global economy as well as from improvements from the construction, tourism and the extractive industries. The Grenada economy grew the fastest due to increased activity in construction, tourism, agriculture and private education. Higher growth rates were also experienced in Guyana, Suriname and Trinidad and Tobago driven by developments in the energy sectors. Growth returned in Anguilla and continued in the British Virgin Islands and Dominica as recovery from the 2017 hurricanes

continued. Tourism development, construction, agriculture and business services continued to drive growth in most other Caribbean economies. However, growth in Barbados remained even as continued fiscal retrenchment dampened the effects of favourable tourism performance.

Unemployment continued to be a major problem in the Caribbean, however, it fell slightly to 7.8 percent reversing a three year trend of rising unemployment. Further, improvements in commodity prices and tourists arrivals are expected to increase jobs.

Barbados, Belize and ECCU continue their policy of fixed exchange rate vis-à-vis the US dollar. The Guyana dollar was relatively stable at \$208.50 during the first quarter while the Jamaican dollar depreciated to JAM\$133.54 against the US dollar. The Trinidad & Tobago dollar hovered around TT\$6.76 vis-à-vis the US dollar.

Commodity Prices

Gold price was around US\$1,300.90 per ounce, a decline of 1.8 percent at the end of the first quarter of 2019. Rice price declined by 5.2 percent to US\$382.43 per metric tonne while sugar price remained stable at US\$0.28 per kilogram. Oil price decreased by 0.1 percent to US\$66.41 per barrel. □

3. OUTLOOK FOR 2019

Guyana's economy is projected to grow by 4.4 percent at the end of 2019 on account of growth in the major economic sectors. The inflation rate is forecasted at 2.5 percent from moderate increases in food and fuel prices.

The overall balance of payments deficit is expected to widen on account of a large current account deficit despite a surplus on the capital account. The current account deficit is expected to expand due to an increase in the merchandise trade deficit from higher imports due to the expanding oil and gas industry. The capital account is projected to register a higher surplus resulting from inflows to the private sector through foreign direct investments.

Total receipts by the Bank are projected at US\$670.8 million. The main sources of inflows are expected from cambio purchases of US\$242.0 million, non-bank purchases of US\$214.4 million and other receipts of US\$190.3 million. Total payments are targeted at US\$683.9 million. The two major outflow categories anticipated are imports of US\$656.8 million and debt servicing totalling US\$26.2 million. The value of fuel imports is expected to account for 71.4 percent or US\$488.5 million of total hard currency payments.

The Central Government's fiscal deficit is budgeted to widen to G\$41,497 million at end-Dec 2019. This is a result of projected increases in current and capital expenditures by 11.1 percent and 25.7 percent respectively. Current revenue is projected to increase by

10.0 percent to G\$238,323 million reflecting expected increases in tax revenues for VAT & excise taxes and income taxes.

The NFPEs' deficit position is budgeted to reduce to G\$13,301 million at end-Dec 2019, due to estimated increases in current receipts by 17.4 percent to G\$135,200 million. Current and capital expenditures are projected to increase by G\$6,948 million and G\$9,121 million respectively.

The stock of domestic debt is estimated to decline at end-December 2019 as a result of lower issuance of treasury bills, while external debt stock is expected to be higher on account of a rise in multilateral debt.

Domestic debt service is estimated to fall below the end-December 2018 level due to lower interest payments for the 182-day and 364-day treasury bills as a result of lower yield for the respective bills. Alternatively, external debt service payments are projected to increase on account of higher principal and interest payments to multilateral creditors.

Global economic growth is projected to be stable at 3.3 percent by the end of 2019. Stronger activity along with more robust global demand would help commodity prices to further recover. Economic performance in both emerging and developing countries are expected to be robust during the year. The Latin America and Caribbean Region are expecting positive growth of 2.0 percent. Higher commodity prices will help headline inflation and reduce deflationary pressures.

The balances in this table exclude inter-bank loans, real estate mortgage loans, local securities and other credit instruments. It should be noted that gross indebtedness of the sugar and rice industry can be obtained by adding the balances of sugar cane and sugar and molasses manufacturing of sugar, and paddy and rice milling for rice respectively. Figures under the 'other purposes' sub-category has been reclassified to exclude credit card transactions effective from March 2007. Due to a reclassification by two Commercial Banks, figures under the Private Sector have been revised from January 2012 to March 2013. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

TABLE 2.14: Commercial Banks: Liquid Assets

The liquid assets comprise Bank of Guyana notes and coins, foreign currency held by banks, (special interest earning) deposits held at the Bank of Guyana (BOG), balances due from other Commercial Banks - both local and foreign, Government of Guyana Treasury Bills. The special reserves deposits (SRDs) established in 1969, discontinued in 1994 as the Bank of Guyana sought to develop its capacity to manage the excess reserves of the bank more effectively. Approximately, 75-80 per cent of the SRDs were absorbed through a sale of three year, variable rate, and fixed date debenture to the Commercial Banks.

Prior to March 1989, the legally required level of liquid assets to be held by the Commercial Banks against their deposit liabilities was calculated as the sum of 20 percent of demand liabilities and 15 percent of time liabilities. During the period March 31, 1989 to May 15, 1991 the determination of the required liquid assets held by the banks was based on actual holdings on specified dates. Accordingly, from March 31, 1989 to June 30, 1990 required liquid assets were stipulated as the actual holdings on March 15, 1989. Between July 30, 1990 and February 19, 1991 the required liquid assets was based on the assets held by the banks on September 30, 1989. Further, between February 20, 1991 and May 14, 1991 the required balances were set as at the end of July 30, 1990.

With effect from May 15, 1991, however, the basis for calculating required liquid assets was changed to 25 percent of demand liabilities and 20 percent of time liabilities. Further, amendments to the liquid asset requirements became effective on 26th, October 1998. The liquid assets base period has been redefined as the Monday to Friday workweek immediately preceding the liquid asset maintenance period. The liquid asset requirement is determined by applying the prescribed percentages to the weekly average of the daily liabilities balances at the close of business of each of the five days of the liquid asset base period. Figures for Treasury Bills were reclassified from December 2000 to December 2002.

TABLE 2.15: Commercial Banks: Minimum Reserve Requirements

Prior to May 16, 1991, the minimum required reserves of the Commercial Banks were calculated as 6 percent of demand liabilities and 4 percent of time liabilities. Their percentages were changed with effect from May 16, 1991, to 11 percent of demand liabilities and 9 percent of time liabilities. Commencing April 7, 1994, the minimum required reserves of the Commercial Banks were again revised to the sum of 16 percent of demand liabilities and 14 percent of time liabilities.

On June 29, 1998, in addition to Commercial Banks, other licensed Financial Institutions were required to maintain balances with the Central Bank against their deposits and other liabilities. Further, the required reserve period has been changed on Monday to Friday workweek instead of the Wednesday to Thursday week used previously. The required reserve period has been referred to as the reserve base period. The week following the current reserve base period, i.e. the reserve maintenance period is also based on the Monday to Friday workweek. The deposits and other liabilities to which the required reserve ratio(s) are applied are referred to as the reserve base. During the reserve maintenance period, all licensed Financial Institutions subject to reserve requirement are required to maintain reserves against the relevant deposit and other liabilities.

Effective February 1, 1999, the required reserve ratio applicable to all liabilities of licensed Financial Institutions was lowered to twelve per cent (12 %). The first reserve base period for which the revised requirements became relevant was the 1st to 5th February 1999 while the reserve maintenance period was the 8th to 12th February 1999. However, reserve balances for the Non-Bank licensed Financial Institutions are excluded from table 2.15.
