## 1. OVERVIEW

Third quarter global economic growth was 3.0 percent as the US economy continued to recover with increased output in manufacturing as well as enhanced consumer and business confidence. The core European Economies, however, continued to battle sluggish growth with lower-than-expected performances by Germany and France. The major Emerging Economies of India, China, Brazil and Russia experienced slower growth. Developing countries, as the main pillars of global economic growth, grew slower at 4.4 percent due to lower commodity prices. Inflation remained subdued due to a fall in commodity prices.

The Guyanese economic performance continued with higher output of sugar, rice and forestry. Output of gold, bauxite and fishing was lower. The manufacturing sector recorded mixed performances while activities in the services sector expanded. The construction industry was bolstered by private investments. Inflation remained low at 0.5 percent due to moderate increases in food prices.

The overall balance of payments deficit narrowed to US\$134.3 million from US\$220.4 million a year ago. This was due mainly to a contraction in the current account deficit together with increased inflows to the private sector. The contraction of the current account deficit was on account of higher inflows of current transfers and lower service payments.

The overall volume of foreign currency transactions expanded by 4.0 percent or US\$186.7 million to US\$4,879.2 million. This was due mainly to increases in hard currency transactions undertaken by the Bank and foreign currency account flows. Transactions processed at the cambios accounted for 45 percent of the total foreign currency traded. Hard currency and foreign currency account transactions were 17.5 percent and 37.3 percent respectively. CARICOM currency transactions remained negligible at 0.3 percent while the Guyana dollar depreciated against the United States dollar by 1.0 percent to end the period at G\$208.3.

The overall financial position of the public sector deteriorated on account of a deficit in the Central Government's operations due to a 16.5 percent increase in current expenditure which more than offset the 3.8 percent increase in current revenue. The Non-Financial Public Enterprises' accounts improved to a smaller deficit compared to end-September 2013.

The stock of both domestic and external debt decreased during the review period. The former was on account of the lower issuance of 364-day treasury bills while the latter contracted primarily due to higher principal and interest payments under the PetroCaribe Initiative complemented by a debt write-off under the CARICOM Multilateral Clearing Facility (CMCF). Total domestic debt service payments declined at end-September 2014 as a result of lower interest payments on treasury bills while

---

external debt service payments increased on account of debt repayments to new and existing multilateral creditors.

The monetary aggregates of reserve money declined by 2.4 percent while that of broad money grew by 0.8 percent. The former was mainly due to a decline in the net foreign assets of the Bank while the latter reflected an increase in net domestic credit. Private sector credit grew at a slower rate of 4.9 percent compared with 7.8 percent one year earlier. Commercial banks' interest rates trended downwards while treasury bill rates increased for all maturities.

The financial resources of the Non-Bank Financial Institutions (NBFIs), which include depository and non-depository licensed and unlicensed financial institutions, increased by 12.3 percent to G\$194,581 million as a result of growth in insurance premium and other liabilities.

The financial system remained relatively stable with the Licensed Depository Financial Institutions (LDFIs) being adequately capitalised, highly liquid and profitable. Capital Adequacy Ratio (CAR) continued to exceed the prudential 8.0 percent benchmark. Asset quality remained acceptable, in spite of the rise in non-performing loans when compared with the third quarter of 2013.

The conduct of monetary policy continued to focus on price stability while ensuring adequate level of liquidity in the system and

creating an enabling environment for economic growth. The Bank used treasury bills in the primary open market operations for effective management of liquidity. The Bank facilitated efficient intermediation through the issuance of notes and coins as well as the promotion of enhanced payment system operation.

The outlook for global growth is 3.3 percent for 2014 then rising further to 3.8 percent in 2015. This is based on the assumption that accommodative monetary policy and moderation of fiscal consolidation continue in the Advanced Economies.

The Guyanese economy is projected to achieve end of year growth of 4.5 percent. Output of rice, sugar, diamond, manufacturing as well as increased activities in the services sector are drivers of growth. Inflation is expected to remain low despite anticipated seasonal price increases for food.

Bank of Guyana's monetary policy remained focused on the monetary aggregates to maintain price stability and a conducive environment for credit growth so as to enhance economic activity. A prudent fiscal stance by the Central Government will contribute to a more efficient monetary policy. □

## **2. REVIEW OF THE THIRD QUARTER FOR 2014**

### **PRODUCTION**

Real economic growth continued with higher output in the major sectors of the economy. The agriculture sector recorded rising output for sugar, rice and forestry by 24.1 percent, 4.5 percent and 42.0 percent respectively. Sugar output was 138,934 tonnes due to adequate supply of cane and favourable weather conditions. Rice output was 401,060 tonnes, mainly due to favourable market conditions and higher yield per acre. The forestry output was 358,353.2 cubic metres while poultry meat production declined by 3.6 percent to 19,801.7 tonnes. Fish and shrimp catches were lower by 29.8 percent and 28.3 percent respectively.

The mining and quarrying sector experienced lower gold declarations and bauxite production of 20.1 percent and 11.8 percent respectively, largely due to the downward trend in international metal prices. The average price of gold and bauxite declined by 7.6 percent and 4.3 percent respectively as at end-September 2014 from end-2013. Diamond and stone production increased by 38.7 percent and 24.9 percent respectively.

The manufacturing sector registered mixed performance in output. Ointments, stock feed and paints increased by 24.9 percent, 7.9 percent and 0.1 percent respectively. In contrast, non-alcoholic beverages, liquid pharmaceuticals and flour fell by 18.4 percent, 6.2 percent and 2.0 percent respectively.

Activities in the services sector expanded mainly on account of growth in the construction, wholesale & retail trade, information & communication and financial & insurance sub-sectors. Growth in the construction sub-sector was bolstered by higher private investment activities.

### **INFLATION**

The inflation rate, as measured by the Urban Consumer Price Index (CPI), was 0.5 percent at end-September 2014. This level of inflation was attributed to price increases of food, clothing and miscellaneous goods & services by 0.7 percent, 1.3 percent and 10.9 percent respectively. This was partially offset by the decline in the price of transport and communication by 2.6 percent. The increase in the food price index reflected increases in the prices of meat, fish & eggs and fruit products by 7.1 percent and 9.8 percent respectively while prices of vegetables and vegetable products declined by 10.9 percent.

### **BALANCE OF PAYMENTS**

The overall balance of payments deficit narrowed to US\$134.3 million from US\$220.4 million a year ago. This was due mainly to a contraction in the current account deficit together with increased inflows to the private sector. The contraction of the current account deficit was on account of higher inflows of current transfers and lower services payments.

---

On the current account, the merchandise trade deficit expanded by 28.1 percent to reach US\$465.6 million from US\$363.5 million recorded in the corresponding period last year due to lower export earnings. Merchandise imports contracted by 3.9 percent or US\$53.0 million to US\$1,302.6 million. This decline was on account of a 15.2 percent or US\$48.8 million reduction in imports of capital goods as well as a 1.7 percent or US\$5.1 million decline in consumption goods. Fuel imports increased by 3.0 percent due to an increase in import volume to offset lower prices.

Export receipts declined by 15.6 percent or US\$155.0 million to US\$837.0 million. This was mainly due to a 31.6 percent or US\$156.3 million decrease in gold export earnings, a 7.6 percent or US\$8.1 million reduction in bauxite export earnings, a 7.3 percent or US\$4.1 million decline in sugar export earnings, and a 6.1 percent or US\$9.3 million decline in earnings of "other" exports. However, there were higher export receipts from timber and rice by 37.5 percent or US\$9.6 million and 8.4 percent or US\$13.2 million respectively.

The deficit on the services account contracted by 13.5 percent or US\$28.1 million to reach US\$179.9 million on account of lower payments for non-factor services. Remittances increased by 52.6 percent or US\$105.7 million to US\$306.8 million.

The capital account surplus contracted by 5.2 percent to US\$168.5 million on account of lower inflows from bilateral and

multilateral agencies which declined by 12.7 percent or US\$18.5 million.

The overall deficit was financed mainly by a drawdown of the gross international reserves of the Bank of Guyana, which were equivalent to 3.5 months of imports at the end of the quarter.

## FOREIGN EXCHANGE MARKET

The aggregated amount of foreign currency transactions increased by 4.0 percent to US\$4,879.2 million. Total reported purchases and sales were US\$2,514 million and US\$2,365.1 million respectively. Transactions of the bank and non-bank cambio dealers fell by 10.0 percent or US\$238.2 million to US\$2,192.1 million. The non-bank cambios accounted for 7.3 percent of the market turnover while bank cambios accounted for 92.7 percent or US\$2,032.8 million. The bank cambios recorded a US\$330.2 million or 14.0 percent decline in transactions. The twelve non-bank cambios' transaction volume increased by 136.7 percent or US\$92 million to US\$159.3 million.

Foreign currency transactions by the Bank of Guyana totalled US\$851.5 million compared to US\$737.5 million one year ago. Outflows and inflows were US\$494.2 million and US\$357.2 million respectively. The principal sources of receipts were proceeds from gold and sugar exports. The Bank purchased US\$156.7 million from the Guyana Gold Board and US\$33.2 million from the Guyana Sugar Corporation (GUYSUCO). It sold US\$14.3 million to the commercial banks during the review period

---

compared with US\$112.0 million in 2013. Sales for the importation of fuel accounted for 86.8 percent or US\$383.3 million of total hard currency payments.

The value of authorized foreign currency accounts was high by 20.0 percent or US\$304.2 million to US\$1,817.6 million. Inter-bank transactions among the six commercial banks increased to US\$39.5 million compared to US\$17.2 million one year ago.

The Guyana dollar depreciated by 1.0 percent against the US dollar to G\$208.3 at the end of September 2014. The weighted mid-rate, which is used for official transactions, also depreciated by 1.0 percent to G\$208.3 from G\$206.3 at the end of December 2013. The un-weighted mid-rate depreciated by 0.1 percent to G\$205.0 from G\$204.8 at end of December 2013.

The average buying and selling rates of the bank cambios moved to G\$207.19 and G\$209.74 from G\$205.47 and G\$207.86 at the end of December 2013 respectively. The non-bank cambio rates were lower with the average buying and selling rates depreciating to G\$204.99 and G\$207.63 from G\$202.80 and G\$205.29 respectively at end December 2013. The differences between the bank and non-bank cambios average buying and selling rates were G\$2.2 and G\$2.1 respectively at the end of September 2014 compared to G\$4.6 and G\$3.4 at the end of December 2013. The average cambio market spread fell to G\$2.2 in September 2014 compared to G\$4.0 at December 2013.

The major currencies exchanged on the local market were the United States dollar which accounted for 92.8 percent of total cambio transactions. The Canadian dollar, Euro and Pound Sterling market shares were 2.0 percent, 2.6 percent and 2.5 percent respectively.

The total value of CARICOM currencies traded domestically increased by 32.0 percent to US\$15.0 million. Of the three major CARICOM currency turnovers, the Barbados, the Eastern Caribbean and the Trinidad & Tobago dollar accounted for 41.0 percent, 23.7 percent and 35.0 percent respectively.

## PUBLIC FINANCE

The overall financial operations of the public sector recorded a larger deficit of G\$10,573 million, representing an average of 1.7 percent of GDP during the review period. This was mainly due to the deterioration in the Central Government's operations.

Central Government's overall fiscal position shifted from an overall surplus of G\$12,337 million to a deficit of G\$6,796 million. This outturn was primarily due to a 16.5 percent or G\$12,570 million increase in current expenditure. Current revenue grew by 3.8 percent or G\$3,875 million to G\$106,752 million on account of higher receipts from Value Added Tax (VAT), company income tax and personal income tax. Dividends from non-financial public enterprises and excise tax both declined by 88.4 percent and 9.9 percent to G\$200 million and G\$17,896 million respectively. Current

---

expenditure increased by G\$12,570 million to G\$88,799 million as a result of higher transfer payments, employment costs and the purchase of goods & services. Capital expenditure expanded by 16.6 percent or G\$3,926 million to G\$27,531 million, due to the commencement of previously deferred public sector contracts.

The non-financial public enterprises cash position improved by 95.3 percent to a surplus of G\$171 million at end-September 2014. This development was principally on account of higher current revenue, which increased by 5.3 percent to G\$89,814 million from G\$85,304 million at end-September 2013. The increase in revenue resulted from higher local sales and other income from GUYSUCO.

Current expenditure increased by 1.0 percent or G\$717 million to G\$89,642 million, reflecting higher spending on materials and supplies, freight charges and employment costs. Conversely, capital expenditure contracted by 10.8 percent or G\$359 million to G\$2,971 million.

National Insurance Scheme (NIS) contributions of the employed and the self-employed increased by 18.3 percent to G\$9,807 million, due to a one percent increase in the contribution rate for both employed and self-employed contributors.

## PUBLIC DEBT

The stock of domestic debt decreased by 8.4 percent to G\$82,699 million from end-September 2013, due to the lower issuance of 364-day treasury bills which more than

offset the increase in the issuance of the 91-day and 182-day treasury bills.

The stock of external public and publicly guaranteed debt fell by 7.0 percent to US\$1,184 million from end-September 2013. This outcome reflected a US\$35.9 million debt write off under the CARICOM Multilateral Clearing Facility (CMCF), along with higher principal and interest payments to Venezuela under the PetroCaribe agreement.

Total domestic debt service payments decreased by 56.3 percent to G\$1,054 million at the end of September 2014 compared to the corresponding period in 2013. This was attributed to lower interest payments on treasury bills, debentures and the CARICOM loan by 27.4 percent, 22.5 percent and 5.2 percent respectively. External debt service payments increased by 9.7 percent to US\$41.6 million, reflecting increased debt repayments to the Inter-American Development Bank (IDB) and the Caribbean Development Bank (CDB).

## MONETARY DEVELOPMENTS

Reserve money contracted by 2.4 percent or G\$2,809 million to G\$112,452 million from its December 2013 level due to a decline in the net foreign assets of the Bank. Net domestic assets improved by G\$18,389 million from one year ago, reflecting a 5.2 percent decline in liabilities to commercial banks.

Broad money grew marginally by 0.8 percent and was primarily due to an increase in net domestic credit. The growth

---

in broad money was reflected in an expansion in quasi-money which offset the marginal decline in narrow-money. Quasi-money, which consists of time and savings deposits, grew by 1.6 percent or G\$3,118 million to reach G\$201,344 million. Time and savings deposits increased by 2.9 percent and 1.4 percent respectively. Narrow-money, consisting of currency in circulation, private sector demand deposits and cashiers' cheques & acceptances, declined by 0.5 percent primarily on account of lower cashiers' cheques & acceptances.

Total deposits by residents fell by 0.8 percent to G\$327,415 million while non-resident deposits contracted by 11.2 percent to G\$1,153 million. Private sector deposits, which accounted for 76.6 percent of total deposits by residents, increased by 3.2 percent.

Net domestic credit of the banking system expanded by 20.3 percent to G\$148,895 million. This expansion was on account of a 33.1 percent growth in net credit to the public sector, as well as a 15.8 percent decline in the net deposits of financial institutions.

Private sector credit grew at a slower rate of 4.9 percent compared with 7.8 percent one year ago. The growth stemmed from credit to the other services, construction & engineering, real estate mortgage, mining and manufacturing sectors which increased by 17.7 percent, 15.9 percent, 10.6 percent, 10.1 percent and 5.9 percent respectively. However, credit to the other sector (which comprises investments in local securities), agriculture, personal and distribution sectors

were lower by 13.0 percent, 11.7 percent, 3.0 percent and 1.6 percent respectively.

The public sector (net) position worsened by 33.1 percent or G\$11,977 million from G\$36,143 million at end-2013. Net credit to the Central Government grew by 55.9 percent or G\$9,329 million to G\$26,005 million while the public enterprises remained a net depositor of G\$34,509 million. However, the net deposits of the other public sector, which includes local government and NIS, increased by 23.2 percent.

The net foreign assets of the banking system contracted by 7.0 percent to US\$888.8 million. This was due to a 14.4 percent or US\$103.5 million decline in the net foreign assets of the Bank of Guyana. Conversely, the net foreign assets of the commercial banks increased by 15.5 percent or US\$37 million to reach US\$275.6 million.

The overall liquidity of the banking system decreased by 12.6 percent or G\$15,585 million to G\$108,446 million mainly on account of lower holdings of treasury bills. Consequently, the ratio of excess liquid assets to total liquid assets decreased from 45.1 percent at end-December 2013 to 35.0 percent at end-September 2014.

There were marginal movements in interest rates during the review period. The 91-days treasury bill yield increased by 13 basis points to 1.58 percent while the yields on the 182-days and 364-days treasury bills were higher at 1.85 percent and 2.38 percent respectively. This was as a result of

---

the competitive bidding for treasury bills. The small savings rate declined by 7 basis points while the weighted average time deposit rate increased by 4 basis points. The weighted average lending rate of the commercial banks declined by 26 basis points while the average prime lending rate was stable at 12.83 percent.

## **NON-BANK FINANCIAL INSTITUTIONS (NBFIs)**

The financial resources of the Non-Bank Financial Institutions (NBFIs), which includes depository and non-depository financial institutions, increased by 12.3 percent to G\$194,581 million at end-September 2014. The sector's share of total assets in the financial sector increased from 30.2 percent to 32.3 percent as at end September 2014.

The increase in the NBFIs' assets was due to a 55.0 percent or G\$1,214 million and 22.1 percent or G\$18,330 million growth in insurance premiums and other liabilities respectively. Pension funds and share deposits also expanded by 3.0 percent to G\$29,309 million and 1.3 percent to G\$39,803 million respectively. Similarly, there was a 5.8 percent increase in other deposits while foreign liabilities remained unchanged at G\$14,043 million.

Investments in all sectors except in the banking system recorded increases during the period under review. Holdings of Government of Guyana's securities increased by 32.5 percent or G\$1,421 million. Similarly, private sector investments expanded by 20.1 percent or G\$18,481

million and represented 56.8 percent of total assets. Acquisition of other assets and claims on the foreign sector were higher by 30.2 percent or G\$6,225 million and 7.4 percent or G\$1,978 million respectively. Conversely, claims on the banking system declined by 11.8 percent or G\$3,038 million to G\$22,690 million.

## **FINANCIAL STABILITY ASSESSMENT**

The average capital adequacy ratio (CAR) for the LDFIs was 22.7 percent at end-September 2014, 155 basis points improvement from 21.1 percent recorded at end-September 2013. The improved ratio resulted from a 16.6 percent (G\$7.0 billion) growth in qualifying capital along with an 8.3 percent (G\$17.3 billion) rise in risk-weighted assets.

Non-performing loans (NPLs) of LDFIs as a share of total loans were 6.6 percent (G\$15.7 billion) at the close of the review period, compared with 4.7 percent recorded for the corresponding period in 2013. The higher ratio was due to the 60.0 percent rise in NPLs. The ratio of reserve for loan losses to NPLs fell from 74.3 percent at end-September 2013 to 50.8 percent at the end of September 2014 due to the 60.0 percent increase in NPLs and only an 8.8 percent rise in reserve for loan losses.

NPLs remained concentrated in the business enterprises sector at 73.3 percent of the LDFI's aggregate NPLs and within that sector were further concentrated in the services and manufacture sub-sectors which held 47.6 percent and 30.9 percent

---

respectively. NPLs in the services sub-sector represented 34.9 percent of the LDFIs' aggregate NPLs, up slightly from 34.8 percent at end-September 2013.

Exposure to the top twenty borrowers amounted to G\$56.1 billion, less than one percent above the level at end-September 2013. The ratio of exposure to the top twenty borrowers to total exposure was 15.6 percent at the end of September 2014, down from 16.3 percent at the end of September 2013.

For the period January-September 2014 gross income for the LDFIs grew 7.6 percent above the corresponding 2013 period to reach G\$25.1 billion. This increase was largely attributed to the 8.2 percent increase in interest income. Two of the other income sources (fees and commission, and other operating income) recorded respective increases of 7.6 percent and 33.9 percent. On the other hand, foreign exchange gains recorded a 2.8 percent contraction.

The LDFIs' aggregate operating expenses rose by 7.0 percent to reach G\$12.6 billion largely on account of increases in other operating expenses, and salaries and other staff costs of 7.2 percent and 8.1 percent respectively. Interest expense increased by 1.6 percent over the corresponding 2013 period.

Net income before tax for the LDFIs increased by 7.9 percent to reach G\$12.5 billion for the January-September 2014 period, while net income after tax recorded an 11.0 percent (G\$0.9 billion) expansion

over the same comparative period moving to G\$8.9 billion. Six LDFIs contributed to the improved after tax results with respective increases ranging between 2.0 percent and 33.9 percent.

The average level of liquid assets held by the LDFIs amounted to G\$140.3 billion, 2.0 percent above the average level held as at end-September 2013. This growth reflected increases in net balances due from Head Office and other branches abroad, local treasury bills, marketable obligations, and net balances due from other banks abroad, stymied by declines in foreign investments, deposits with Bank of Guyana, cash-in-hand, and net balances due from LDFIs in Guyana.

## MONETARY POLICY

Bank of Guyana's monetary policy continued to focus on the attainment of price stability and provision of adequate level of liquidity for credit expansion and economic growth. The Bank seeks to allow the expansion of broad money along a path consistent with projections for GDP and inflation. Thus, weekly targets for broad money are translated into targets for base money using the money multiplier. To achieve these weekly base money targets the Bank focuses on the effective management of excess liquidity in the financial system through its Open Market Operations (OMOs).

Reserve money was G\$112,452 million, G\$3,094 million below the target due to a decrease in the net foreign assets of the Bank. There were twenty-five issues of

---

treasury bills amounting to G\$69,066 million. Redemptions amounted to G\$85,166 million. Consequently, there was a net redemption of treasury bills of G\$16,100 million. Treasury bills were issued when reserve money exceeded the targeted levels and it was deemed likely to adversely affect the stability of the major financial indicators.

The inter-bank market activities, which also provide an indication of the total liquidity condition of the financial system, had 125 trades during the review period. The value of funds traded on the market amounted to G\$103.4 billion which was 17.1 percent or G\$15.1 billion more than the corresponding period in 2013.

## BANK ACTIVITIES

### Currency Operations

The Bank has a statutory obligation to issue the country's notes and coins under section 21(1) of the Bank of Guyana Act 1998, No. 19 of 1998. This obligation is discharged through the Currency Division of the Operations Department. The total supply of currency in 2014 registered an increase of 17 percent over 2013. The increase was as a result of a higher opening stock and notes purchased when compared to 2013.

### Notes

The total value of currency notes in circulation (including notes held in the vaults of commercial banks) at the end of the third quarter of 2014 amounted to G\$64 billion, an increase of 14.1 percent compared with a circulation of G\$56.1 billion in 2013. The G\$5000 note which was introduced in

December of 2013 accounted for 31.2 percent in the share of total value while the G\$1000 fell to 63.8 percent in light of this from 94.5 percent. The G\$500 fell from 2.2 percent to 2 percent, the G\$100 fell from 2.3 percent to 2.1 percent and the G\$20 fell to 0.9 percent.

The policy of ensuring that only acceptable quality notes are in circulation was continued. This was achieved by regular withdrawals of mutilated, defaced or otherwise poor quality notes and replacing them with new notes. Mutilated, defaced and poor quality notes amounting to G\$126.7 million were replaced in 2014, compared with G\$98.4 million in 2013.

### Coins

Coins issued by the Bank amounted to G\$895.3 million at the end of the third quarter of 2014, an increase of 5.7 percent above the G\$847.2 million in 2013. The G\$10 coin continued to account for the highest proportion of the total value of coins, followed by the G\$5 and the G\$1 coins respectively. In value terms the share of G\$10 accounted for 43.6 percent, the G\$5 accounted for 39.1 percent and the G\$1 for 17.3 percent.

### Payments System

During the review period, 695,671 low-value transactions (LVT) were settled through the National Clearing House (NCH), a marginal decrease of 2.2 percent when compared with the volume recorded in 2013. The volume of high-value transactions (HVT) increased by 1.2 percent to reach 103,381. Continuing the trend over the past five years, the overall value of total transactions

---

fell by 2.9 percent in 2014 to G\$847.5 billion. A decrease was recorded in the value of the high-value transactions which decreased to G\$573.2 billion whereas the low value transactions rose to G\$274.3 billion in 2014. The shares of HVT in total value of transactions fell to 67.6 percent in 2014 from 69.3 percent in 2013. As a result, the share of LVT rose to 32.4 percent in 2013 from 30.7 percent in the previous year. The average value of HVT fell by 6.3 percent in 2014 to 5.5 million, while the average value of LVT rose by 4.8 percent in 2014 to reach G\$0.39 million.

## THE GLOBAL ECONOMY

Third quarter global economic growth was 3.0 percent as the US economy continued to recover with increased output in manufacturing as well as enhanced consumer and business confidence. The core European Economies, however, continued to battle sluggish growth with lower-than-expected performances by Germany and France. The major Emerging Economies of India, China, Brazil and Russia experienced slower growth. Developing countries, as the main pillars of global economic growth, grew slower at 4.4 percent due to lower commodity prices. Inflation remained subdued due to a fall in commodity prices.

### Advanced Economies

The Advanced Economies recorded modest growth driven mainly by the economic growth of the United States. The US economy grew by 2.7 percent in the third quarter of 2014, buoyed by improved productivity and increased competitiveness

of the manufacturing sector. However, major areas of vulnerability exist as the economy is being eased off from unconventional monetary policy.

The Euro Area continued to experience slow growth of 0.8 percent in the third quarter of 2014. The financial system has been fragile with banks repairing their balance sheets. In addition, consumer confidence in this Region has been low. The economies of Germany and France grew by 1.9 percent and 0.7 percent respectively. The United Kingdom grew by 2.6 percent with its recovery strengthening after the Scottish Referendum and increased exports. Japan's economy contracted by 1.2 percent as consumption suffered due to a tax increase in April 2014.

Inflation rate was 1.7 percent due to lower commodity prices. The inflation rate in the Euro Area and the US were 0.7 percent and 1.7 percent respectively. Japan's inflation rate was 3.1 percent mainly due to the increase in the consumption tax from 5.0 percent to 8.0 percent. The UK inflation rate was 1.9 percent. Monetary policy continued to be accommodative by the Federal Reserve Bank with the continuation of the zero interest rate policy. The European Central Bank rate was 0.05 percent in keeping with accommodative monetary policy in this Region. The US dollar gained strength against the world's major currencies especially the Euro and Yen.

### Emerging Economies

Growth in the Emerging Economies slowed during the review period, reflecting lower productivity which affected the commodity

---

exporting economies of Russia, Mexico and South Africa. China's growth slowed to 7.0 percent due to lower property investment and weaker industrial production while India experienced some momentum after the election of a new government to grow by 5.3 percent with an increase in FDI flows and business confidence.

Inflationary pressures subsided in most Emerging Economies due to lower oil prices. China's inflation rate was 1.5 percent. However, India's inflation rate was 7.7 percent while Brazil continued to experience high inflation rate of 6.8 percent due to higher cost of imported food and the impact of drought on its agricultural sector.

### **Developing Countries**

Developing Countries' growth was 4.4 percent, buoyed by favourable output of goods and services. However, the pace of growth in developing countries was checked by lower commodity prices. Sub-Saharan Africa recorded growth of 5.0 percent. The Latin America and Caribbean Region's growth declined to 1.3 percent due to lower output in the two larger economies of Brazil and Argentina. Tighter monetary policies and fiscal space allowed most Developing Countries to control inflation. However, inflation continued to be high in the Latin America and Caribbean Region at 6.1 percent at the end of September 2014.

### **Caribbean Economies**

Economic performance continued to be mixed with commodity dependent economies of Guyana, Suriname and Belize experiencing positive growth. The tourist dependent economies, such as those in the OECS and Barbados struggling with high debt, recorded low growth. The Jamaican economy grew by 1.1 percent

The exchange rate of the Caribbean Economies namely Barbados, Eastern Caribbean Currency Union and Bahamas continued to be fixed vis-à-vis the US dollar. Guyana, Trinidad and Tobago and Jamaica operated floated currency regimes. Guyana and Trinidad and Tobago's currencies were stable for the third quarter while Jamaica's currency, after a sharp depreciation, stabilized at J\$112.47 in the third quarter of 2014.

### **Commodity Prices**

Most commodity prices declined during the review period. Sugar and rice prices declined to US\$0.17 per pound and US\$436.5 per metric tonne respectively. The price of gold fluctuated between US\$1,230 per ounce and US\$1,300 per ounce while the price of oil (Brent Crude) declined by 12.8 percent to US\$97.3 per barrel in the third quarter of 2014. □

### **3. OUTLOOK**

Global economic growth is revised to 3.3 percent for 2014, then rising further to 3.8 percent in 2015. This outlook is based on the assumption that accommodative monetary policy and moderation of fiscal consolidation continue in the Advanced Economies. Growth in Emerging Asian Economies will be robust while that of Developing Countries is expected to grow at the same pace.

The Guyanese economy is expected to achieve real growth of 4.5 percent. This outturn is to be driven by improved performances of the services, agriculture and manufacturing sectors. The rate of inflation is projected at 2.0 percent due to the modest movements in seasonal food prices.

The overall balance of payments is expected to record a lower deficit of US\$103.7 million for 2014 due to an expansion of the capital account's surplus from higher bilateral and multilateral inflows as well as foreign direct investment. The current account deficit is projected to expand on account of a higher import bill and lower export earnings.

The exchange rate is expected to remain relatively stable from net capital inflows and a lower balance of payments deficit. The gross foreign reserves of the Bank are projected to be US\$632.0 million at end-2014. This level of reserves will be achieved mainly by foreign inflows of US\$219.2 million from investments and non-bank purchases of US\$276.5 million from

GUYSUCO and the Guyana Gold Board. Sales to finance essential imports and payments for external debt obligations are projected at US\$524.2 million.

The overall financial operation of the public sector is expected to record a larger deficit due to the deterioration in the position of both Central Government and the Non-Financial Public Enterprises.

The Central Government's overall balance is forecasted to deteriorate mainly on account of higher current and capital expenditures. This position will cause a decrease in the current account balance. The capital account deficit is expected to increase on account of higher capital expenditure while grant flows are expected to remain stable at the end of 2014.

Non-Financial Public Enterprises' overall balance is expected to deteriorate to a larger deficit on account of lower current revenue and higher current expenditure from GUYSUCO and NIS.

The stock of external debt is estimated to increase at the end of 2014 while domestic debt stock is expected to decrease. The former is expected to increase due to higher disbursements from bilateral and multilateral creditors while the latter is due to the lower issuance of treasury bills.

External debt service is expected to increase end-2014 due to schedule interest and principal repayments to bilateral and multilateral creditors, while domestic debt

---

service is estimated to decrease due to lower interest payments on treasury bills.

Bank of Guyana continues to manage the expansion in base money through its Open

Market Operations and seeks to maintain low inflation. The Bank will also ensure that credit to the private sector is encouraged to facilitate growth in the economy. □

It should be noted that gross indebtedness of the sugar and rice industry can be obtained by adding the balances of sugar cane and sugar and molasses manufacturing of sugar, and paddy and rice milling for rice respectively. Figures under the 'other purposes' sub-category has been reclassified to exclude credit card transactions effective from March 2007. Due to a reclassification by two Commercial Banks, figures under the Private Sector have been revised from January 2012 to March 2013. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

**TABLE 2.14: Commercial Banks: Liquid Assets**

The liquid assets comprise Bank of Guyana notes and coins, foreign currency held by banks, (special interest earning) deposits held at the Bank of Guyana (BOG), balances due from other Commercial Banks - both local and foreign, Government of Guyana Treasury Bills. The special reserves deposits (SRDs) established in 1969, discontinued in 1994 as the Bank of Guyana sought to develop its capacity to manage the excess reserves of the bank more effectively. Approximately, 75-80 per cent of the SRDs were absorbed through a sale of three year, variable rate, and fixed date debenture to the Commercial Banks.

Prior to March 1989, the legally required level of liquid assets to be held by the Commercial Banks against their deposit liabilities was calculated as the sum of 20 percent of demand liabilities and 15 percent of time liabilities. During the period March 31, 1989 to May 15, 1991 the determination of the required liquid assets held by the banks was based on actual holdings on specified dates. Accordingly, from March 31, 1989 to June 30, 1990 required liquid assets were stipulated as the actual holdings on March 15, 1989. Between July 30, 1990 and February 19, 1991 the required liquid assets was based on the assets held by the banks on September 30, 1989. Further, between February 20, 1991 and May 14, 1991 the required balances were set as at the end of July 30, 1990.

With effect from May 15, 1991, however, the basis for calculating required liquid assets was changed to 25 percent of demand liabilities and 20 percent of time liabilities. Further, amendments to the liquid asset requirements became effective on 26<sup>th</sup>, October 1998. The liquid assets base period has been redefined as the Monday to Friday workweek immediately preceding the liquid asset maintenance period. The liquid asset requirement is determined by applying the prescribed percentages to the weekly average of the daily liabilities balances at the close of business of each of the five days of the liquid asset base period. Figures for Treasury Bills were reclassified from December 2000 to December 2002.

**TABLE 2.15: Commercial Banks: Minimum Reserve Requirements**

Prior to May 16, 1991, the minimum required reserves of the Commercial Banks were calculated as 6 percent of demand liabilities and 4 percent of time liabilities. Their percentages were changed with effect from May 16, 1991, to 11 percent of demand liabilities and 9 percent of time liabilities. Commencing April 7, 1994, the minimum required reserves of the Commercial Banks were again revised to the sum of 16 percent of demand liabilities and 14 percent of time liabilities.

On June 29, 1998, in addition to Commercial Banks, other licensed Financial Institutions were required to maintain balances with the Central Bank against their deposits and other liabilities. Further, the required reserve period has been changed on Monday to Friday workweek instead of the Wednesday to Thursday week used previously. The required reserve period has been referred to as the reserve base period. The week following the current reserve base period, i.e. the reserve maintenance period is also based on the Monday to Friday workweek. The deposits and other liabilities to which the required reserve ratio(s) are applied are referred to as the reserve base. During the reserve maintenance period, all licensed Financial Institutions subject to reserve requirement are required to maintain reserves against the relevant deposit and other liabilities.

Effective February 1, 1999, the required reserve ratio applicable to all liabilities of licensed Financial Institutions was lowered to twelve per cent (12 %). The first reserve base period for which the revised requirements became relevant was the 1<sup>st</sup> to 5<sup>th</sup> February 1999 while the reserve maintenance period was the 8<sup>th</sup> to 12<sup>th</sup> February 1999. However, reserve balances for the Non-Bank licensed Financial Institutions are excluded from table 2.15.

1975 when it was linked to the US\$1 to G\$2.55.

On June 2, 1981, the Guyana dollar was pegged to a composite basket of currencies consisting of the United States dollar, Pound Sterling, Deutsche Mark, Trinidad and Tobago dollar and the Japanese Yen. The exchange rates were fixed at US\$1 to G\$3.00. The US dollar was the intervention currency used to determine the exchange rate.

From January 11, 1984, the composite basket of currencies was adjusted to include the Pound Sterling, Deutsche Mark, Japanese Yen, French Franc and the Netherlands Guilder, the US dollar, although not part of the revised basket, remained as the intervention currency. The United States dollar/Guyana dollar exchange rate was announced weekly. From October 1984 until January 1987, the exchange rate was maintained in the range of G\$4.15 to G\$4.40 per US dollar.

Effective January 19, 1987, the Guyana dollar was devalued to G\$10 to US\$1, effective from April 3, 1989 the Guyana dollar was devalued moving from G\$33 per US\$ to US\$1. The US dollar continued to be the intervention currency. From February 25, 1991, the exchange rate was fixed on a weekly basis. During the period February to September 1991, the exchange rate was determined by the previous week free market exchange rate of the Commercial Banks and Non-Bank dealers.
