STATISTICAL ANNEXE

1. OVERVIEW

Output of Guyana's major commodities was higher during the first quarter of 2007 when compared with the corresponding period in 2006. The restructuring of the mining sector continued and steady growth figures were posted for the services and construction sectors in particular. January saw a very sharp increase in prices, by 6.3 percent, primarily as a result of the introduction of Value Added Tax (VAT) at the start of the year. However, prices stabilized somewhat in the latter two months of the first quarter.

In spite of a narrowing in the current account deficit, a significant shortfall in capital receipts contributed to an overall deterioration in the balance of payments. However, an increase in economic activity facilitated a buoyant foreign exchange market and the Guyana dollar appreciated slightly against the US dollar.

Stronger remittances from corporations, higher tax receipts, and constrained expenditure by the central government contributed to an improvement in public finances. The stock of domestic debt fell as a result of GUYMINE bond redemptions and a reduction in the stock of treasury bills. External debt also contracted, by over 50 percent, primarily as a result of a US\$467 million debt relief package provided by the Inter-American Development Bank.

By the end of the first quarter reserve money was 3.6 percent below that recorded at end-December 2006, primarily due to a 23.4 percent decrease in the Bank's net domestic assets. In spite of the 2007

Cricket World Cup (CWC)-related increases in the demand for currency towards the end of the quarter, currency in circulation followed seasonal trends and fell by 6.1 percent.

Monetary liabilities (M2) grew by 2.4 percent, driven primarily by an expansion in quasi-money and private sector individual savings. Broad money also increased during the first quarter as private sector credit grew in line with the recent housing boom, construction activities related to the CWC, and an accommodating monetary policy. However, net credit to the central government fell by 12.2 percent as deposits increased by 25.5 percent.

The net foreign assets of the banking system expanded by 14.3 percent to US\$315.3 million, largely on account of increases by the commercial banks. Liquidity fell during the review period, with the ratio of liquid assets to total deposits declining by 1.5 percentage points to 12.9 percent. Overall, the financial position of the commercial banks remained relatively sound during the first quarter.

Commercial banks' interest rates remained broadly stable despite a decrease in the 91-day treasury bill rate. The latter was consistent with the levels of liquidity in the system during the quarter, as monitored by the Bank's monetary policy framework. The Bank oversaw a net redemption of treasury bills of G\$1,351 million and a contraction in base money by G\$1,820 million.

The global economy continued to grow at a robust, albeit slower, pace during the first quarter of 2007. The US economy experienced slower growth as a result of a slump in the housing market, but strong performances were recorded in Europe, Japan and emerging markets, especially China and India. Higher inflation, especially in the UK, continued to remain a downside risk in spite of interest rates in the major industrialized nations trending upwards over the review period.

During the second quarter, the economy is expected continue its steady growth path, especially in the agriculture and service sector. The construction sector is set to slow owing to the conclusion of the CWC. While inflationary risks remain, particularly with respect to oil prices as political tensions in the Middle-East heighten, the Bank's monetary policy will have a sharper focus on inflation such that prices are expected to continue following the trend experienced in the latter two months of the first quarter.

The balance of payments are projected to improve on the back of favourable export prices and increased foreign direct investment. The exchange rate is expected to remain broadly stable partly as a result of the influx of CWC-related tourists.

The Bank of Guyana will remain vigilant and tighten monetary policy as required to avoid any second round price effects from VAT. This will hinge on the central government adopting a strong fiscal stance by keeping spending in line with its budget and achieving its fiscal targets, particularly in terms of revenue collection. Base money is projected to increase by G\$2,145 million and room will be given to the commercial banks to increase credit to the private sector in order to facilitate growth.

The global economy is expected to remain healthy, driven mainly by strong growth in Europe, Japan and emerging markets. The Caribbean is likely to be disappointed with the impact the CWC will have had on their economies in the short term but are still projected to post robust growth rates for 2007. Inflation in industrialized countries will be kept in check by a tightening of monetary policy, especially in Europe and Japan, while the major downside risks will come from imbalances in the world trading system and the potential impact of the US housing slump on world markets. □

2. REVIEW OF FIRST QUARTER 2007

Output & Growth

Preliminary figures from the Bureau of Statistics suggest that output of Guyana's major commodities were higher during the first quarter of 2007 when compared with the corresponding period in 2006. This was particularly the case for sugar, rice, forestry products, and gold. The bauxite industry continued to be restructured with the 70 percent stake in the Omai Bauxite Mining Inc. owned by Canada's IAMGOLD being sold to Bosai Minerals of China. The manufacturing sector posted steady growth figures, while the service sector experienced above average growth especially in the mobile telecommunications sub-sector due to the entrance of a large regional competitor. The construction sector remained buoyant as businesses and households finalized preparations for the CWC in March and April.

Costs & Prices

The urban Consumer Price Index (CPI) for Georgetown rose by 6.6 percent in January alone, the highest monthly increase since the index was re-based in 1994 and represented a year-on-year inflation rate of 9.3 percent. This jump was primarily due to the introduction of a 16 percent VAT at the start of 2007 and confirmed public fears of widespread price increases. Even many items that were zero-rated experienced significant price rises, particularly in the food category – the highest weighted category in the basket that makes up the index.

However, after the expected VAT-related adjustments in January, the index increased by 0.3 percent in February and by 0.2 percent in March, suggesting that prices were stabilizing and the January increase was a one-off incident. The first quarter inflation rate of 7.1 percent compares unfavourably with the corresponding period in 2006, which was 3.1 percent.

The 5 percent increase in public sector salaries and bonuses awarded to private sector employees at the end of 2006 also contributed to January's high inflation rate. The annual round of pay negotiations, typically conducted in the first quarter, will have factored in the substantial price increases and this too impacted on first quarter inflation. Although oil prices fell to their lowest level in almost two years in January, they began increasing steadily in February as political tensions mounted in the Middle-East, thereby increasing the price of oil and non-oil imported goods.

Balance of Payments

Preliminary estimates indicate that the overall balance of payments surplus was lower in the first quarter of 2007 when compared with the corresponding period in 2006. This mainly reflected a shortfall in capital receipts due to a decline in inflows from bilateral and multilateral agencies. However, this was partly offset by a strengthened current account where the deficit narrowed as a result of higher unrequited transfers. Foreign direct

investment was also higher due to increased activities in the telecommunication and mining sectors.

Foreign Exchange Market Activities

The foreign exchange market was buoyant during the first quarter of 2007 facilitated by an increase in economic activities. Total foreign exchange transactions amounted to US\$744.5 million at end-March 2007. Cambio transactions accounted for 65.8 percent, while the hard currency receipts and retention accounts accounted for 33 percent. Soft currency transactions accounted for the residual. Favourable exports earnings, especially in the non-traditional agriculture sector, along with higher commodity prices led to greater foreign exchange flows.

The Bank of Guyana's total receipts for the first quarter were US\$74.5 million. This mainly comprised of non-bank purchases of US\$49.6 million from GUYSUCO and the Guyana Gold Board. Sales to the cambio market only amounted to US\$1 million as the foreign exchange market remained very liquid and there were large working balances.

The Guyana dollar experienced a mild appreciation vis-á-vis the US dollar at end-March 2007. The commercial banks weighted mid-rate, which stood at G\$203.67 against the US dollar at the end of 2006, appreciated by 0.9 percent to G\$201.92 at the end of March 2007. Conversely, the Bank of Guyana exchange rate, calculated on the simple average of the three largest

cambio dealers depreciated by 0.4 percent to G\$201.75 per US dollar at the end of the first quarter. The spread between the buying and selling rate narrowed to G\$1.83, a decrease of 61.9 percent when compared to the end of 2006 and reflects higher foreign exchange inflows in the market.

Public Finance

Central Government's first quarter preliminary results marked an improvement in the corresponding period last year in light of stronger remittances from corporations, and also higher receipts from the excise tax. Receipts for both the VAT and excise tax were higher; however, returns under the recently instituted VAT were affected by implementation issues. It is nevertheless expected that submissions will improve as initial problems at the corporate level are resolved. Central government's overall surplus increased, driven largely by a rise in the current account surplus. There was also a growth in overall expenditure, particularly with respect to capital expenditure.

The Inter-American Development Bank committed to providing approximately US\$467 million in debt relief in the latter part of the quarter. The details are being worked out, with actual delivery being expected sometime during the year. The stock of external public and publicly guaranteed debt rose marginally by 0.2 percent to US\$1,055 million, while the stock of domestic debt fell by 1.4 percent from twelve months earlier to G\$72,957 million. This resulted from a negotiated settlement

between the Government of Guyana and the holders of matured GUVMINE bonds.

External debt service costs declined by 24.4 percent to US\$2.5 million, while domestic debt charges rose by 25.6 percent to G\$855 million on account of the increased volume of 364-day treasury bills redeemed during the quarter. The payment of US\$5 million charged to the government's accounts last year and due under the negotiated settlement between the Government of Guyana and the domestic GUVMINE bond holders, was effected during the review period.

Monetary Developments

Monetary developments were consistent with economic activities during the first quarter. At end-March 2007, reserve money stood at G\$48,824 million, a decline of 3.6 percent when compared with end-December 2006. This was largely associated with a 23.4 percent decrease in the net domestic assets of the Bank of Guyana, mainly on account of an improvement in the central government's position as deposits grew by G\$1,233 million and debt declined by G\$1,736 million. The decline in reserve money occurred in spite of a 3.6 percent increase in the Bank's net foreign assets.

The stock of narrow money (M1) amounted to G\$46,551 million, 3.2 percent below the end-December 2006 level, and mainly reflected decreases in currency in circulation and private sector demand

deposits by 6.1 percent and 36.7 percent, respectively.

When compared with end-December 2006, money in circulation fell by 6.1 percent in the first quarter. This reflected the lower seasonal demand for money during the review period despite an increase in CWC-related demand for currency towards the end of the quarter.

Monetary liabilities (M2), amounted to G\$146,673 million at the end of March 2007, an increase of 2 percent over end-December 2006. This compared with an increase of 1.2 percent during the corresponding period in 2006, and is consistent with the more robust expansion in economic activities during the first quarter of 2007. Growth in M2 was attributed to a 4.6 percent increase in quasi-money, which reflected a 5.7 percent increase in private sector individual savings. The growth in individual savings was associated with higher earnings- and remittances-related inflows.

Broad money increased during the first quarter mainly due to a 5.8 percent growth in net domestic credit, which stemmed primarily from a 3.7 percent expansion in private sector credit. Of the private sector credit, outstanding loans to households and businesses expanded by 4.2 percent and 3.6 percent, respectively, and reflected increased spending for the CWC. Net credit to central government fell by 12.2 percent to G\$8,534 million, influenced by a 25.5 percent net increase in deposits. The net deposits of the non-bank financial institutions declined by 3.9 percent and reflected a fall in their deposits.

The growth in private sector credit also reflected, in part, an accommodating monetary policy by the Central Bank. Broken down by economic activities, mortgages increased by 5.9 percent, largely reflecting the recent housing construction boom; personal loans grew by 4.2 percent reflecting higher credit card-related spending by consumers; and outstanding loans for manufacturing, distribution and other services showed higher levels of activity in these sectors. The increase in other services was influenced by growth in transportation and communication as well as entertainment and catering. Credit to the mining sector declined by 1.4 percent, and local securities by commercial banks increased by 3.7 percent, mainly reflecting the investment in the Berbice River Bridge.

The net foreign assets of the banking system increased by 14.3 percent to US\$315.3 million at end-March 2007. This growth was driven by a 34.9 percent increase in the net foreign assets of the commercial banks, which stood at US\$126.6 million, and reflected increases in gross foreign assets of US\$40 million and gross foreign liabilities of US\$7million. The Bank of Guyana's net foreign assets increased by 3.6 percent to US\$188.7 million. Gross reserves stood at US\$279.2 million, equivalent to three (3) months of imports.

While liquidity of the commercial banks fell during the period under review, it remained at a high level. The ratio of liquid assets to total deposits declined by 1.5 percentage points to 12.9 percent, and the ratio of loans and advances to total deposits rose by 50 basis points to 30.2 percent.

During the first quarter, the financial position of the commercial banks remained relatively stable. Both total assets and liabilities increased by 4.6 percent on average, while the overall capital and reserve position rose by 4 percent. These increases are the net result of growth in some balance sheet items and reductions in others such that some financial ratios showed minor reductions over end-December 2006 levels. The capital adequacy ratio fell to 14 percent, but this is still well above the minimum requirement of 8 percent. Non-performing loans as a percentage of total assets, total capital and reserves declined, while the reported liquidity ratios surpassed prudential requirements. Nevertheless, these changes did not trigger any major concerns for banking supervision.

Commercial banks' interest rates remained broadly stable despite a decrease in the 91-day treasury bill rate. When compared to end-December 2006, the small savings rate remained unchanged at 3.19 percent. However, the weighted time deposit rate and the weighted average lending rate declined by 20 basis points and 29 basis points, respectively.

Non-Bank Financial Institutions (NBFIs)

The financial resources of the NBFIs fell 5.2 percent by end-March 2007 when compared with end-December 2006, with the insurance companies being the main mobilizers. The sector's share of total assets in the financial sector also declined.

Total foreign assets of the sector increased sharply as the insurance companies continued to invest in foreign securities and hold large balances at foreign banks, while foreign liabilities fell. Insurance premiums increased significantly as liabilities to policy holders rose. Local investments in the public, private and banking sectors declined, while investments in other assets increased.

Monetary Policy

The objectives of the Bank of Guyana's monetary policy are the attainment of price stability and the creation of an enabling environment for credit expansion and economic growth. The Bank seeks to allow the expansion of broad money along a path consistent with projections for output and inflation. Thus weekly targets for broad money are translated into targets for base money using the money multiplier. To achieve these weekly base money targets the Bank focuses on the effective management of excess liquidity in the financial system through its Open Market Operations (OMOs).

Monetary policy is also conducted with due regard for the operations of government. Government operations affect monetary policy insofar as it either adds or withdraws liquidity from the system. During the first quarter, government net operations increased the level of liquidity in the system by G\$855 million. However, breaking this down into the government's weekly operations shows that this injection of liquidity is concentrated in the third week of

each month. In the other weeks of each month it is a net withdrawer from the system.

During the first quarter there was a net redemption of treasury bills of G\$1,351 million. This was broken down as nine (9) issues of treasury bills amounting to G\$21,764 million, while redemptions amounted to G\$23,115 million. Treasury bills were issued when there were surges in liquidity above the desired levels. This was done through the Reserve Money Program, which is the bank's monetary policy framework that compares preset weekly targets with weekly (updated) estimates for base money. The system is deemed to have an excess of liquidity when the weekly (updated) projections for base money are significantly higher than the comparable weekly targets. In such situations treasury bills are issued to reduce the level of base money to bring it in line with the targeted levels.

Base money contracted by G\$1,820 million compared with the targeted decline of G\$2,803 million. The decline in base money stemmed from the seasonally high levels of base money in December 2006. The main objective of restraining the growth of base money is to keep the growth of the money supply at an acceptable rate. This in turn will mitigate some of the negative impacts of money growth on inflation. The inflation figure for the quarter was higher than expected due to the introduction of VAT at the start of the year and salary increases at the end of December 2006. Indeed, the implementation of VAT reduced the effectiveness of monetary policy.

Notwithstanding a significant increase in the price level in January 2007, base money was allowed to increase along a targeted path to facilitate growth in the economy.

As mentioned above, apart from controlling inflation, the Bank's monetary policy was also aimed at creating a favourable macroeconomic environment to facilitate growth. Thus banks were given the freedom to expand credit to the private sector in keeping with this objective. Credit to the private sector, which reflected the active intermediation by commercial banks, increased by 3.7 percent during the quarter compared with 2.4 percent for the first quarter of 2006. This scenario was consistent with growth in some sectors for the first quarter of 2007.

The Bank's monetary policy was also reflected in the prevailing interest rates. Treasury bill discount rates trended downwards during the first quarter while the savings and lending rates at the commercial banks either remained unchanged or declined marginally. This brought about interest rates that were consistent with the levels of liquidity in the system.

The Global Economy

During the first quarter, the global economy continued to grow at a robust, albeit slower, pace. This reflected the performance of the

major emerging markets of China and India and the industrialized economies of the EU and Japan. Output in the latter grew by 5.5 percent in the year to March 2007 driven by private sector investment and higher consumer spending. The US economy experienced slower growth as a result of a slump in the housing market after a five year boom came to an end. However, the Latin America and Caribbean (LAC) region continued to post healthy GDP figures, with output growth particularly strong in Chile and Argentina.

While the US and Euro area experienced slower increases in prices when compared to the corresponding period in 2006, at 2.8 percent and 1.9 percent, respectively, in the UK they rose to 3.1 percent as the economy continued to suffer from lack of excess capacity. Higher inflation continued to remain a downside risk in spite of interest rates in the major industrialized nations trending upwards during the first quarter. Although the Central Bank's base rates remained at 5.25 percent in the US, they increased by 25 basis points in both the Euro area and the UK to 3.75 percent and 5.25 percent, respectively. Inflation remained subdued in Japan but increased slightly in the LAC region. □

CORE vs. HEADLINE INFLATION & MONETARY POLICY

The mention of inflation in Guyana may strike fear into many people who remember the situation in the late 1980's and early 1990's when very high rates prevailed. But today, with rates at far more respectable levels, a more controversial issue is whether the operational target for inflation should be the headline or core measure. In Guyana, the inflation rate is broadly defined as the consumer price index (CPI) for Georgetown which measures the price changes in a standard "basket" of goods and services consumed by an average family on a monthly basis. This type of inflation is often referred to as overall or "headline inflation" and is the figure people use to measure the rate at which the cost of living is rising and often the focus of wage negotiations.

However, for the purpose of conducting monetary policy, central bankers and economists focus more on "core inflation." This is calculated in the same way as headline inflation but items within the basket deemed volatile to supply shocks, and therefore beyond the control of monetary authorities, are excluded – typically food and energy items. If economists were to look only at measures of inflation that include items with more sensitive price fluctuations, they may be fooled into believing that general prices are rising or falling more rapidly than they really are. Furthermore, supply shocks may cause the inflation rate to temporarily diverge away from the long-term trend thereby plausibly making the headline measure an inaccurate indicator of future inflation.

Thus core inflation is often referred to as the underlying rate as it better reflects the interplay of supply and demand in domestic markets. These are important considerations for policymakers, particularly central bankers in the formulation of monetary policy, because even though price changes for volatile items in the CPI have substantial effects on the overall index, they are often quickly reversed and so do not require a monetary policy response.¹

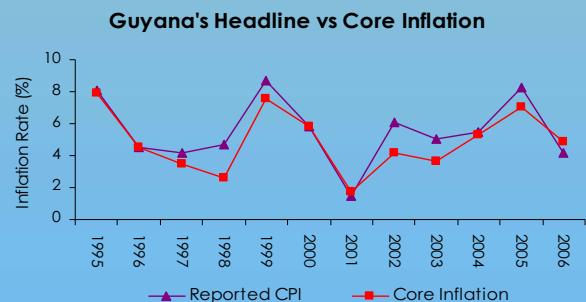

Nevertheless, as with many economic concepts, consensus on which measure is superior is split with a debate currently raging between Europe and the US – the former in the headline camp and the latter in the core camp. While the US extols the aforementioned arguments for focusing on core inflation, Europe argues that rises in energy prices are not only related to supply disruptions such as the Iraq war and hurricanes but also reflect an upward, long-term, trend in the demand for energy resources driven by industrialization and urbanization in China and India.

Indeed, calculating core inflation varies from country to country and raises an issue of the degree of arbitrariness in its definition. The US follows the majority of countries and excludes food and energy items; the UK and New Zealand only exclude interest charges; Canada excludes food, energy and the effects of indirect taxes whereas Germany

¹ There are other methods of calculating inflation, such as the outlier's method which removes the items that have the largest price changes (as, for example, Chile uses), but for the purpose of this commentary the focus will be on the core versus headline measures.

only excludes indirect taxes. Although Guyana does not have an official definition of core inflation, the IMF defines Guyana's core rate as the CPI excluding housing, energy costs, transport services and communication. Changes in the prices of food, which are frequently influenced by exogenous factors, are in fact not excluded because this component represents a significant part of the CPI figure (44 percent) and if excluded would make the core rate almost irrelevant.

Over the period 1995 to present, the graph shows that on average Guyana's core inflation has been lower than headline (CPI) inflation as reported by the Bureau of Statistics – 4.9 percent versus 5.5 percent, respectively. However, the graph also shows that, contrary to what theory may suggest the core rate is not always a less volatile measure of inflation. For example, the core rate is less stable between 1998 and 1999, and again between 2003 and 2004, when compared to the headline rate. This may be because Guyana's definition of core inflation, as determined by the IMF, is less encompassing of exogenous factors that have temporary shocks on CPI when compared to many other developing countries - it excludes goods and services that carry a weight of only 14.8 percent in the CPI.²

² In Thailand, for example, the core rate excludes goods and services with a total weighting of 23 percent in the CPI, and in Peru 21.2 percent is excluded. These figures compare well with the US, at 22.3 percent.

Nevertheless, one year in particular clearly shows how the use of the core rate has been effective at insulating out temporary disturbances on the price level. In 1998, a year with record high inflation in the transport and communication category, while the headline rate registered an increase from 4.2 percent in 1997 to 4.7 percent, the core rate actually came down from 3.5 percent in 1997 to 2.6 percent.

The trend since 2002 has shown how the rising price of crude oil on international markets³ over the past four years poses somewhat of a challenge to the rationale for focusing on the core rate. Over this period headline inflation has run hotter than core inflation (with the exception of 2006), the former averaging 6.2 percent and the latter 5 percent. In such circumstances, and given Guyana's core rate could arguably be extended to exclude more goods and services⁴, there are still strong arguments in favour of the monetary authorities focusing on the headline rate as its preferred policy target. The sustained higher prices for crude oil⁵ adds weight to the argument from some economists that early signals of higher overall inflation may be missed if price changes in volatile items are ignored. Indeed, a major concern for policymakers is that the more rapid trend in headline inflation will bring about higher inflationary expectations, which in turn will inevitably serve to raise prices and lower growth prospects. This is a scenario that all monetary authorities seek to avoid.

³ Which has significant pass-through effects on the prices of many other goods in the CPI.

⁴ Which, in all likelihood, would have brought about a lower average core rate.

⁵ That has come about as a result of a rise in demand for energy resources mentioned above.

3. OUTLOOK

GDP Growth

A severe external shock notwithstanding, growth in the agriculture sector is expected to continue on its path of recovery and post healthy growth figures in 2007. The second quarter is traditionally the least productive for the sugar and forestry industries but the most productive for the rice industry and this trend is expected to continue. Attracted by Guyana's large potential mineral reserves and government incentives to establish long-term gold operations and exploration into other high value minerals, the mining industry is set to receive significant investment from additional large foreign mining companies in 2007. This should bring about a moderate recovery in the mining sector with output figures in the second quarter reflecting this development. The construction sector is expected to slow in the second quarter owing to the completion of CWC-related projects, while the service sector is projected to continue its steady growth into the second quarter.

Inflation

With prices having stabilized after substantial increases in January, inflation is expected to continue following the trend experienced in the latter two months of the first quarter. However, downside risks include heightened political tensions in the Middle-East, with the oil price rises associated with the capture of British sailors by Iran towards the end of the first quarter doing little to dispel expectations of future

rises in oil prices. This would be borne out in higher prices not only for the transportation and fuel categories of the CPI but also in the food category as costs of production and transportation of goods to markets would increase. Conversely, concerns that price rises associated with hosting the CWC will have a significant impact on the cost of living are unlikely to materialize as these would have been mainly limited to items that carry smaller weights within the CPI index and such price rises are likely to be temporary in nature.

Nevertheless, there are significant uncertainties surrounding this projection. These include: the expansion of liquidity and its implications for monetary policy; the momentum in consumption and investment expenditure; exchange rate developments; and the rate of growth of imports. Given the extraordinary price increases in January, the Bank believes it would be wise to first assess what transpires in the second quarter before determining whether inflation in 2007 is projected to exceed the expected rate stated in the government's Budget Report.

Foreign Exchange Market Activities

A more favourable balance of payments situation is projected for the second quarter on the back of higher export earnings and remittances. The deepening of the foreign exchange market means the Bank of Guyana does not expect any demand from

the cambio market, while the Bank's purchases are projected at US\$50 million from GUYSUCO and the Guyana Gold Board. These developments will translate into a continued favourable foreign exchange position with the exchange rate expected to remain broadly stable. The influx of CWC-related tourists will also contribute to this stability.

For 2007, the Bank of Guyana's hard currency budget projects an increase in gross foreign reserves to US\$311.5 million. This will be met mainly by foreign inflows of US\$28.7 million from International Financial Institutions, returns on investment and other foreign exchange operations of US\$74.6 million, and non-bank purchases of US\$203.8 million from GUYSUCO and the Guyana Gold Board.

Monetary Policy

The monetary policy objectives will remain the same for the second quarter. However, there will be a sharper focus on inflation in light of the substantial price rises in January. The Bank of Guyana will remain vigilant and tighten monetary policy as required to avoid any second round price effects from the implementation of VAT. Furthermore, the Bank will continue to monitor liquidity and sterilize the excess to keep inflation under control.

A strong fiscal stance will be central in the fight against inflation, and the Bank expects fiscal targets to be achieved. To do so, the government must keep spending in line with

its budget and ensure that its efforts at revenue collection remain aggressive.

The Bank will continue to manage the expansion in base money, which is targeted to increase by G\$2,145 million. Therefore, while the principal focus will be on achieving low inflation, some room will be given to the commercial banks to increase credit to the private sector in order to facilitate growth.

The Global Economy

While growth projections for the US have been downgraded slightly for 2007 as a result of a housing slump, robust growth and a strong recovery are expected for Europe and Japan, respectively. The fast growing emerging markets, particularly China and India, are expected to maintain pace and record healthy growth figures for 2007. Growth in the Caribbean is projected at 5.4 percent for 2007 but the region's economies will be disappointed by a lower than expected number of tourists visiting for the CWC.

Inflation in industrialized countries will be kept in check by a tightening of monetary policy, especially in Europe and Japan. While Japan again fell back into a situation of deflation in February, strong consumer spending has prompted calls for a rise in interest rates. Inflation is expected to come down sharply in the UK so that it falls more in line with the 2 percent target. However, if the US housing slump begins to have a more pronounced impact on US growth the Federal Reserve will be under pressure to reduce interest rates.

The major downside risk will remain to be imbalances in the world trading system, particularly the large deficits and surpluses experienced by the US and China, respectively. However, the depreciation of the US dollar against all major currencies and the slow appreciation of the Chinese Yuan will improve the US' trade deficit and

contribute towards a steadyng of the global economy. While US consumer spending has not yet been muted by the housing slump, its potential to impact negatively on the world economy also presents a significant downside risk - as evidenced by the recent turmoil on world stock markets.

- 5.1 The New Building Society: Assets and Liabilities
- 5.2(a) Trust Companies: Assets
- 5.2(b) Trust Companies: Liabilities
- 5.2(c) Finance Companies: Assets
- 5.2(d) Finance Companies: Liabilities
- 5.3(a) Life Domestic Insurance Companies: Assets and Liabilities
- 5.3(b) Non-Life Domestic Insurance Companies: Assets and Liabilities
- 5.3(c) Consolidated Domestic Insurance Companies: Assets and Liabilities
- 5.4 Pension Schemes: Assets and Liabilities
- 5.5 Guyana Co-Operative Mortgage Finance Bank: Assets and Liabilities

6. PUBLIC FINANCE

- 6.1 Central Government Finances: Summary
- 6.2 Central Government: Current Revenue
- 6.3 Central Government: Current Expenditure
- 6.4 Public Corporations Finances: Summary

7. PUBLIC DEBT

- 7.1 Domestic Public Bonded Debt
- 7.2 Government of Guyana: Treasury Bills by Holders and Defence Bonds
- 7.3 Government of Guyana: Debentures By Holders and Defence Bonds
- 7.4 Government of Guyana: Debentures by Maturity and Terms
- 7.5 External Public Debt

8. INTERNATIONAL TRADE AND PAYMENTS

- 8.1(1) Imports by End-Use
- 8.1(2) Imports by End-Use (G\$ Summary)
- 8.1(2a) Imports by End-Use (US\$ Summary)
- 8.2 Domestic Exports (G\$)
- 8.2(a) Domestic Exports (US\$)
- 8.3 Guyana: Selected Exports by Volume, Value and Unit Value
- 8.4 Visible Trade (G\$)
- 8.4(a) Visible Trade (US\$)
- 8.5 International Reserves and Foreign Assets
- 8.6(a) Foreign Exchange Market: Purchases
- 8.6(b) Foreign Exchange Market: Sales
- 8.7 Balance of Payments

9. FOREIGN EXCHANGE RATES AND COMMODITY PRICES

- 9.1 Changes in Bank of Guyana Transaction Exchange Rate
- 9.2(a) Exchange Rates of CARICOM Countries
- 9.2(b) Exchange Rate (G\$/US\$)
- 9.3 Exchange Cross-Rates of CARICOM Countries
- 9.4 Exchange Rates Against the U.S. Dollar
- 9.4(a) Fixed Exchange Rates Of EMU-Member Countries Against the Euro
- 9.5 Selected Exchange Rates Against the U.S. Dollar
- 9.5(a) Commodity Prices
- 9.6 Monthly Average Market Exchange Rates

10. NATIONAL INCOME ACCOUNTS AND PRODUCTION INDICATORS

- 10.1 Gross Domestic Product, Income And Expenditure (At Current Prices)
- 10.2 Gross Domestic Product (At 1988 Prices)
- 10.3(a) Production of Major Commodities
- 10.3(b) Production Indicators: Agriculture
- 10.3(c1) Production Indicators: Manufacturing
- 10.3(c2) Production Indicators: Manufacturing

11. CONSUMER PRICES

- 11.1 Georgetown: Urban Consumer Price Index
- 11.2 Caricom Countries: Consumer Price Indices

12. APPENDICES

- I. General Notes
- II. Notes to the Tables

1) End of period rates.

2) The prime lending rate reported by the banks has been weighted by the amount of loans issued at the corresponding rate.

3) The average prime lending rate actually used by commercial banks applicable to loans and advances.

4) Effective from March 2004 GNCB Trust Company has been re-named Hand-in Hand Trust Corp. Inc.

5) Small savings rate

¹ Bureau of Statistics and Bank of Guyana (Base year shifted from 1994 to 2000).

I. GENERAL NOTES

Symbols Used

- ... Indicates that data are not available;
- Indicates that the figure is zero or less than half the final digit shown or that the item does not exist;
- Used between two period (eg 1989-90 or July-September) to indicate the years or months covered including the beginning and the ending year or month as the case may be;
- / Used between years (eg 1989/90) to indicate a crop year or fiscal year.
- † Means incomplete data due probably to under-reporting or partial response by respondents.
- * Means preliminary figures.
- ** Means revised figures.

In some cases, the individual items do not always sum up to the totals due to rounding.

Acknowledgement

The Bank of Guyana wishes to express its appreciation for the assistance received from the Ministry of Finance, State Planning Secretariat, Commercial Banks, Bureau of Statistics, some Public Corporations and other Private Sector agencies in the compilation of the data.

II. NOTES TO THE TABLES

TABLE 1.1: Bank of Guyana: Assets

Foreign Assets

Balances with Foreign Banks: Deposits of the Central Bank with Foreign Banks. The data also include holdings of foreign notes and gold. Figures from December 2005 to December 2006 were restated to reflect the audited statements.

Gold Tranche with the I.M.F.: One quarter of Guyana's subscription to the International Monetary Fund (I.M.F.) quota, which is made in gold and/or convertible currencies.

Holdings of Special Drawing Rights: Unused portion of the Special Drawing Rights (S.D.R.s) allocated by the I.M.F.

Money Market Securities: Holdings of short-and long-term debt instruments of foreign governments and the International Bank for Reconstruction and Development (I.B.R.D.) recorded at cost. Figures from December 2005 to December 2006 were restated to reflect the audited statements.

Claims on the Central Government: Holdings of the Government of Guyana Treasury Bills, Debentures valued at cost and Advances from the Bank of Guyana. The Bank of Guyana Act No. 19 of 1998 section 46 has since removed the possibility of advances to Government since it restricted the Central Bank from extending credit directly or indirectly to the Government from that date.

Advances to Commercial Banks: Short term credit to Commercial Banks.

Other Assets: Include fixed assets such as land and buildings, furniture and equipment. Cheques in the process of collection, notes and coins issued by the British Caribbean Currency Board, non-interest-bearing debentures, and other miscellaneous assets are also included.

TABLE 1.2: Bank of Guyana: Liabilities

Currency Issue: Notes and Coins issued by the Bank.

Value of notes issued for October 1999 and August 2000 does not correspond with figures in table 1.3 due to an accounting discrepancy.

Government Deposits: Current account deposits of the Central Government which includes sterilised amount from open market type operation with effect from 1994.

Deposits of International Organisations: Obligations to the I.M.F.; local currency component of the subscription to the I.M.F. quota; deposits of the I.B.R.D, the Caribbean Development Bank (C.D.B.) and foreign central banks. Other foreign liabilities of the Bank of Guyana are also included.

Bank Deposits-EPDs: Guyana dollar deposits with the Bank of Guyana made by Commercial Banks on behalf of their customers pending foreign exchange releases to meet foreign obligations which fell

into arrears prior to 1990. This scheme was discontinued for foreign obligations after 1990.

Bank Deposits-Other: Commercial Banks' interest earning deposits and statutory reserve deposits with Bank of Guyana are recorded here. With effect from December 1994, special interest earning deposits of the Commercial Banks were discontinued in favour of unremunerated required free reserves. The removal of remuneration for these deposits coincided with the issue of three-year debentures to sterilise the prevailing excess liquidity levels of banks.

Other Deposits: Includes deposits of National Insurance Scheme (N.I.S.), Livestock Development Fund, Guyana Pension Scheme, Mayor and City Council, Sinking Funds, Guyana Co-operative Agricultural and Industrial Development Bank, Export Development Fund No. 1, Guyana/Libya Agricultural Development Company Limited, and Guyana/Libyan Fishing Company among others.

Authorised Share Capital: The enactment of the Bank of Guyana Act No. 19 of 1998 provided for the increase in the capital for the Bank as part of the reform process.

Other Reserves: These reserves include General, Revaluation and Contingency Reserves.

Allocation of S.D.R.'s: Liability accruing from the SDRs allocated to Guyana, which are valued at the equivalent of Guyana dollar amount converted through the S.D.R./U.S. dollar cross rate.

Other Liabilities: Include provision for accrued expenses, items in transit; private investment fund; and miscellaneous items. The decline in Other Liabilities from November 30, 2002 to December 31, 2002 reflect the charging of valuation changes to Other and Government Deposits.

TABLE 1.3:

Bank of Guyana: Currency Notes Issue

Total issue of less withdrawal of mutilated or spoiled legal tender notes. In December 1996, the Bank of Guyana introduced a G\$1,000 as part of its currency reform process. This was followed by the removal from the legal tender of the G\$10, G\$5, and G\$1 notes with effect from January 1997 and their conversion to coins the new legal tender until June 30, 1997.

TABLE 1.4:

Bank of Guyana: Coins Issue

Total issue of less withdrawals of defaced legal tender coins. The Bank of Guyana as part of its currency reform programme introduced with effect from January 1, 1997, G\$10, G\$5, G\$1 coins as legal tender and removed from the specie the use of cents.

TABLE 2.1(a): Commercial Banks: Assets

Balances due from Banks abroad: Deposits of Commercial Banks with Non-Resident foreign banks included head offices and branches.

Loans to Non-Residents: Commercial Bank lending to Non-Resident customers.

Due to re-classification at a Commercial Bank, figures for Private Sector and Non-Resident loans have been revised from December 2000 to May 2002. In keeping with the Monetary Financial Statistics Manual (MFSM), figures for loans to Non – Residents, Private Sector and Public Financial Enterprises include accrued interest with effect from December 2002.

Other Foreign Assets: Include foreign currency holdings and all other claims on Non-Residents by Commercial Banks. Due to reclassification at a Commercial Bank figures for Public Sector Other and Foreign Sector Other were revised from September 2002 to February 2003.

Securities: The total volume of Central Government Treasury Bills recorded at cost and debentures held by commercial banks. In keeping with the Monetary Financial Statistics Manual (MFSM), figures for Securities include accrued interest from Dec. 2002.

Loans: Central Government borrowing from the Commercial Banks. See note above under loans to Non-Residents.

Public Enterprises: Loans and Advances extended by Commercial Banks to Public Financial Business Enterprises. Public Non-Financial Enterprises are defined as enterprises in which Government owns above 50 per cent of the share capital. See note above under loans to Non – Residents.

Other: Commercial Banks' claims on Local Government and the National Insurance Scheme. See note above under loans to Non-Residents

Non-Bank Financial Institutions: Loans issued to Public and Private Non-Bank Financial Institutions by Commercials Banks'. See note above under loans to Non-Residents

Private Sector: Lending through loans and advances to Private Non-Financial Business Enterprises and Individual Customers. See note above under loans to Non-Residents.

The decline in Private Sector Loans and Advances resulted partly from a reclassification of some loans at one Commercial Bank. See note above under loans to Non-Residents.

The acquisition of Guyana National Co-operative Bank (GNCB)'s assets net of loans valued G\$8,473.0 million by the National bank of Industry and Commerce Limited on March 15' 2003 resulted in the decline in Private Sector Loans and Advances during March 2003.

Deposits with Bank of Guyana: Include statutory reserve deposits and interest earning deposits of the Commercial Banks. Effective December 28, 1994, interest-earning deposits discontinued.

External Payment Deposits (E.P.D): Guyana dollar deposits with the Bank of Guyana made by Commercial Banks on behalf of their customers, pending foreign exchange releases to meet external obligations.

Currency: Commercial Banks' holdings of local notes and coins.

Other Assets: Include balances due from other Commercial Banks, Real Estate Mortgage Loans, fixed assets such as land and building, furniture, equipment and other miscellaneous assets.

TABLE 2.1(b): Commercial Banks: Liabilities, Capital and Reserves

Balances due to Other Banks abroad: Foreign claims made on local Commercial Banks by Head Offices and other banks abroad.

Non-Resident Deposits: Total deposits made by Non-Resident customers with Commercial Banks. In keeping with the Monetary Financial Statistics Manual (MFSM), figures for deposits to Non-Residents, Private Sector and Public Financial Enterprises include accrued interest with effect from December 2002.

Other: Include all other foreign claims on Commercial Banks.

Central Government Deposits: Total demand, time and savings deposits made by the Central Government with Commercial Banks. See note above under deposits to Non-Residents.

Public Enterprise Deposits: Total demand, time and savings deposits made by Public Non-Financial Enterprises with the Commercial Banks. Due to the sale of Aroaima Bauxite Company to the government and a reclassification of its accounts from the Private to Public Sector, figures from January 2002 to April 2002 have been revised. See note above under deposits to Non-Residents.

Other Public Deposits: Include total deposits of Local Government and National Insurance Scheme. See note above under deposits to non-residents. See note on Table 2.4 Commercial

Banks: Time Deposits.

Non-Bank Financial Institutions Deposits: Consist of total deposits made by Public and Private Financial Institutions. See note above under deposits to Non-Residents. See note on Table 2.4: Commercial Banks: Time Deposits.

Private Sector Deposits: Include total demand, time and savings deposits of Private non-financial Business Enterprises and individual customers. See note above under Public Enterprises Deposits. See note above under deposits to non-residents.

External Payment Deposits: Comprise customers' deposits (public and private sector) with commercial banks on account of External Liabilities prior to 1990 and awaiting foreign exchange releases from the BOG.

Bank of Guyana: Commercial Bank short-term borrowing from the Bank of Guyana.

Other Liabilities: Other liabilities of the Commercial Banks include manager's cheques, acceptances, provision for taxes and other miscellaneous liabilities.

Capital and Reserve: The acquisition of Guyana National Co-operative Bank (GNCB)'s assets net of loans valued G\$8,473.0 million by the National Bank of Industry and Commerce Limited on March 15, 2003 resulted in the decline in the capital and reserve of the banking systems during March 2003.

TABLE 2.2: Commercial Banks: Total Deposits

Total demand, savings and time deposits of Residents and Non-Residents excluding inter-bank deposits are presented. Foreign currencies denominated deposits are also included here. See note under Public Enterprises Deposits for Tables 2.1 (b) above. See note under Non – Resident Deposits for Table 2.1(b) above.

TABLE 2.3: Commercial Banks: Demand Deposits

Current account deposits of Residents and Non-Residents; inter-bank deposits are excluded. See note under Public Enterprises Deposits for Tables 2.1 (b) above.

TABLE 2.4: Commercial Banks: Time Deposits

Fixed deposits of Residents and Non-Residents with a minimum withdrawal notice of three months; exclude inter-bank deposits. See note under Non-Resident deposits for Table 2.1(b) above. Due to a reclassification of N.I.S and Non-Bank Financial Institutions' time deposits, figures from December 2003 to April 2005 were revised.

TABLE 2.5: Commercial Banks: Savings Deposits

Deposits with minimum withdrawal notice of one day; exclude inter-bank deposits. See note under Public Enterprises Deposits for Tables 2.1 (b) above. See note non-resident deposits for Table 2.1(b) above.

TABLE 2.6: Commercial Banks: Time Deposits by Maturity

Includes deposits of both Residents and Non-Residents. See note under Commercial Banks: Time Deposits for table 2.4 above.

TABLE 2.7: Commercial Banks: Savings Deposits

Includes deposits by both Residents and Non-Residents. Ending balance on savings accounts for November 2002 do not equate to the opening balance for December 2002 due to the addition of accrued interest to the December 2002 opening balance. The ending balance for February 2003 saving accounts differs from the opening balance for March 2003 due to the reclassification from

demand and time accounts to saving accounts.

TABLE 2.9: Commercial Banks: Clearing Balances

Comprise total amount of cheques cleared by and debited to the accounts of the Commercial Banks. A National Clearing House was established at the Bank of Guyana during 1998 whereby large (in excess of G\$500,000) and small valued cheques are cleared. Data recorded after 1998 in this table reflect the value of small valued cheques cleared over the reporting period.

TABLE 2.10: Commercial Banks: Total Loans and Advances

The data include Loans and Advances to Residents and Non-Residents. Real Estate Mortgage Loans and inter-bank loans are excluded. The total of loans and advances to the private sector differs from total credit to the private sector in Table 3.1(Monetary Survey). The totals for credit to the private sector in Table 3.1 include local securities, other credit instruments and real estate mortgage loans. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above

TABLE 2.11: Commercial Banks: Demand Loans and Advances

The data cover lending for short periods including overnight loans to Residents and Non-Residents and exclude inter-bank loans. See note under Private Sector For Table 2.1(a) above.

TABLE 2.12: Commercial Banks: Term Loans and Advances

The Loans and Advances are for longer periods extended to Residents and Non-Residents; inter-bank lending is excluded. See note under Private Sector for Table 2.1(a) above. See note under loans to Non-Residents for Table 2.1(a) above.

TABLE 2.13: Commercial Banks: Loans and Advances to Residents by Sector

The data provided record balances at the end of the respective period and therefore indicates the indebtedness of the respective industries at the end of the reporting period. The value of credit obtained by each industry for a given period can be obtained by taking the difference between the balances at the end of the desired period and that immediately preceding. The balances in this table exclude inter-bank loans, real estate mortgage loans, local securities and other credit instruments. It should be noted that gross indebtedness of the sugar and rice industry can be obtained by adding the balances of sugar cane and sugar and molasses manufacturing of sugar, and paddy and rice milling for rice respectively. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

TABLE 2.14: Commercial Banks: Liquid Assets

The liquid assets comprise Bank of Guyana notes and coins, foreign currency held by banks, (special interest earning) deposits held at the Bank of Guyana (BOG), balances due from other Commercial Banks - both local and foreign, Government of Guyana Treasury Bills. The special reserves deposits (SRDs) established in 1969, discontinued in 1994 as the Bank of Guyana sought to develop its capacity to manage the excess reserves of the bank more effectively. Approximately, 75-80 per cent of the SRDs were absorbed through a sale of three year, variable rate, fixed date debenture to the Commercial Banks.

Prior to March 1989, the legally required level of liquid assets to be held by the Commercial Banks against their deposit liabilities was calculated as the sum of 20 percent of demand liabilities and 15 percent of time liabilities. During the period March 31, 1989 to May 15, 1991 the determination of the required liquid assets held by the banks was based on actual holdings on specified dates. Accordingly, from March 31, 1989 to June 30, 1990 required liquid assets were stipulated as the actual holdings on March 15, 1989. Between July 30, 1990 and February 19, 1991 the required liquid assets was based on the assets held by the banks on September 30, 1989. Further, between February

20, 1991 and May 14, 1991 the required balances were set as at the end of July 30, 1990.

With effect from May 15, 1991, however, the basis for calculating required liquid assets was changed to 25 percent of demand liabilities and 20 percent of time liabilities. Further, amendments to the liquid asset requirements became effective on 26th, October 1998. The liquid assets base period has been redefined as the Monday to Friday workweek immediately preceding the liquid asset maintenance period. The liquid asset requirement is determined by applying the prescribed percentages to the weekly average of the daily liabilities balances at the close of business of each of the five days of the liquid asset base period. Figures for Treasury Bills were reclassified from December 2000 to December 2002.

TABLE 2.15: Commercial Banks: Minimum Reserve Requirements

Prior to May 16, 1991, the minimum required reserves of the Commercial Banks were calculated as 6 percent of demand liabilities and 4 percent of time liabilities. Their percentages were changed with effect from May 16, 1991, to 11 percent of demand liabilities and 9 percent of time liabilities. Commencing April 7, 1994, the minimum required reserves of the Commercial Banks were again revised to the sum of 16 percent of demand liabilities and 14 percent of time liabilities.

On June 29, 1998, in addition to Commercial Banks, other licensed Financial Institutions were required to maintain balances with the Central Bank against their deposits and other liabilities. Further, the required reserve period has been changed on Monday to Friday workweek instead of the Wednesday to Thursday week used previously. The required reserve period has been referred to as the reserve base period. The week following the current reserve base period, i.e. the reserve maintenance period is also based on the Monday to Friday workweek. The deposits and other liabilities to which the required reserve ratio(s) are applied are referred to as the reserve base. During the reserve maintenance period, all licensed Financial Institutions subject to reserve requirement are required to maintain reserves against the relevant deposit and other liabilities.

Effective February 1, 1999, the required reserve ratio applicable to all liabilities of licensed Financial Institutions was lowered to twelve per cent (12 %). The first reserve base period for which the revised requirements became relevant was the 1st to 5th February 1999 while the reserve maintenance period was the 8th to 12th February 1999. However, reserve balances for the Non-Bank licensed Financial Institutions are excluded from table 2.15.

TABLE 3.1: Monetary Survey

A consolidation of the balance sheets of the Bank of Guyana and Commercial Banks.

Foreign Assets (net)

Bank of Guyana: Gross foreign assets **less** gross foreign liabilities.

Commercial Banks: Gross foreign assets **less** gross foreign liabilities. See note under Loans to Non-Residents for Table 2.1 (a) above.

Domestic Credit

Government (net): Gross lending to Central Government by the banking system (a sum of Holdings of debentures, bonds, Treasury Bills and loans and advances **less** total deposits of the Central Government).

Public Enterprise (net): Gross borrowing by Non-Financial Public Enterprises from the banking system **less** their deposits. See notes under Public Enterprises Deposits for Table 2.1 (b) and Commercial Banks: Time Deposits for Table 2.4 above.

Other Public Sector (net): Gross borrowing from the banking system by local authorities and municipalities **less** their total deposits and other Public Sector funds. See note under loans to Non-

Residents for Table 2.1(b) above.

Non-Bank Financial Institution (net): Gross borrowing from the banking system by the non-bank financial intermediaries with the banking system **less** their deposits. See notes under loans to Non-Residents for Table 2.1(b) and Commercial Banks: Time Deposits for Table 2.4 above.

Private Sector: Gross borrowing from the banking system. See note under Loans to Non-Residents for Table 2.1 (a) above. See note under Private Sector for Table 2.1(a) above.

Money and Quasi-Money

Money: Currency outside banks **plus** private sector demand deposits, managers' cheques and acceptances. See note under Public Enterprises Deposits for Table 2.1 (b) above

Currency: Currency issue (Table 1.2) **less** currency holdings by Commercial Banks (Table 2.1(a)).

Quasi-money: Time and savings deposits held by the Private Sector. See note under Public Enterprises Deposits for Table 2.1 (b) above.

Demand deposits: Balances of the Private Sector including managers' cheques and acceptances. See note under Public Enterprises Deposits for Table 2.1 (b) above.

Savings and Time deposits: Balances held by Private Sector. See note under Loans to Non-Residents for Table 2.1 (a) above.

Other (net): Includes the net sum of all assets and liabilities of the Bank of Guyana and the Commercial Banks not shown elsewhere.

TABLE 3.2: International Reserves and Foreign Assets

International Reserves

Bank of Guyana Foreign Assets: Data include gold holdings, balances with foreign banks, foreign notes, foreign cash in the process of collection, gold tranche with I.M.F., S.D.R. holdings and money securities.

Bank of Guyana Foreign Liabilities: Data include total short-term liabilities, short-term liabilities in arrears and total medium-term liabilities in arrears. The liabilities include interest obligations. Rescheduled short-term liabilities are excluded.

Foreign Assets

Bank of Guyana Foreign Assets: The composition of the assets is identical to that of International Reserves foreign assets above.

Bank of Guyana Foreign Liabilities: Data includes all short-term liabilities (current, arrears and rescheduled) and all medium-term liabilities (current, arrears and rescheduled). The liabilities include interest obligations.

Commercial Bank Foreign Assets: Data includes foreign currencies in banks, net balances due from Head Office and other branches abroad, balances due from other banks abroad, foreign treasury bills and securities and credit to non-residents. See note under loans to Non-Residents for Table 2.1(a) above.

Commercial Bank Foreign Liabilities: Data includes net balances due to Head Office and other branches abroad, balances due to other banks abroad and deposits of non-residents.

TABLE 4.1:**Guyana: Selected Interest Rates**

Interest rates at Commercial Banks and Non-Bank Financial Institutions on loans and deposits. The small savings rate represents an arithmetic average of savings deposit rates as reported by the Commercial Banks. Treasury bill rates for all maturities reflect rates at the end of the reporting period. Special deposits have been discontinued with effect from December 1994. NBS deposit rate for September, October and December 2001 have been revised. Small savings rate for November 2001 has been revised. The rates for the Five dollar shares, Save and prosper shares and the deposits for NBS have been revised for July 2002. The average deposit rates for GNCB Trust Company has been revised for the period of September 2002. Due to the modification of the interest rate structure, figures for the Commercial Banks' weighted average lending rate from September 2005 have been revised.

TABLE 4.2:**Commercial Banks: Selected Interest Rates**

Arithmetic average of interest rates as reported by the Commercial Banks.

TABLE 4.3:**Comparative Treasury Bills Rates and Bank Rates**

The average discount rate on three month Treasury Bills for the U.K., U.S.A., Barbados, Trinidad, Guyana and Jamaica. The U.K. and U.S. rates are the average discount rates at the last tender in each month. The rates for the CARICOM territories are those rates of monthly tender held towards the end of the month. Treasury bills rates for Barbados for 2001 have been revised. The Euro area Bank Rate is the rate at which other Monetary Financial Institutions obtain overnight liquidity from the National Central Bank against eligible assets.

TABLE 4.4:**Changes in Bank of Guyana Transaction Exchange Rates**

The Guyana dollar was fixed in Pound Sterling at the rate of £1 to G\$4.80 until October of 1975 when it was linked to the US\$1 to G\$2.55.

On June 2, 1981, the Guyana dollar was pegged to a composite basket of currencies consisting of the United States dollar, Pound Sterling, Deutsche Mark, Trinidad and Tobago dollar and the Japanese Yen. The exchange rates was fixed at US\$1 to G\$3.00. The US dollar was the intervention currency used to determine the exchange rate.

From January 11, 1984, the composite basket of currencies was adjusted to include the Pound Sterling, Deutsche Mark, Japanese Yen, French Franc and the Netherlands Guilder, the US dollar, although nor part of the revised basket, remained as the intervention currency. The United States dollar/Guyana dollar exchange rate was announced weekly. From October 1984 until January 1987, the exchange rate was maintained in the range of G\$4.15 to G\$4.40 per US dollar.

Effective January 19, 1987, the Guyana dollar was devalued to G\$10 to US\$1, effective from April 3, 1989 the Guyana dollar was devalued moving from G\$33 per US\$ to US\$1. On June 15, 1990, the Guyana dollar was devalued from G\$33.00 per US\$ to G\$45.00 per US\$. Transactions for this rate were confined to payments in respect of oil imports and external debt services and proceeds from sugar and rice exports.

On February 21, 1991, the Guyana dollar was devalued from G\$45.00 to US\$ to G\$101.75 thereby unifying the official exchange rate with the market determined rate prevailing at that date. The US dollar continued to be the intervention currency. From February 25, 1991, the exchange rate was fixed on a weekly basis. During the period February to September 1991, the exchange rate was determined by the previous week free market exchange rate of the Commercial Banks and Non-Bank dealers.

From October 1991, the average weighted daily exchange rate was telegraphic transfers for the three largest Commercial Banks was utilised to determine the exchange rate for the Bank of Guyana daily transactions.

TABLE 4.5: Exchange Rate

Yearly figures were revised to reflect the average for the year.

TABLE 4.6: Monthly Average Market Exchange Rate

On March 13, 1990, the authorities established the cambio system for foreign currency transactions. Under the system, transactions in the cambio market were conducted freely with licensed dealers (banks and non-banks) setting the rate at which foreign exchange could be bought and sold. The rates are referred to as the market exchange rates. Data collection for the Euro started in January 2004.

The buying rate is a weighted average of the purchase rates of all licensed foreign exchange dealers for the month.

The selling rate is a weighted average of the sales rates of all licensed foreign exchange dealers for the month.

The mid-rate is the average buying and selling rates of all licensed foreign exchange dealers. The rate is based on transactions in foreign notes only.
